

Ozarks Transportation Organization  
117 Park Central Square Suite 107, Springfield Missouri 65806

20 May 2009

The Ozarks Transportation Organization staff is working with the Bicycle Pedestrian Advisory Committee to address bicycle and pedestrian needs in the OTO region. We are selecting projects to be considered for prioritization in the Bicycle Pedestrian Plan. This will enable the OTO to know the priorities relating to bicycle and pedestrian projects in the area. This will not replace existing processes for distributing funding, but rather will provide information regarding the needs which exist regionally.

Please complete the attached form for your community by June 5, 2009. OTO is currently asking for two priority needs in seven categories, for a total of fourteen priority needs. If you do not have a need for a particular category, it may be left blank. Please include the information on the need location as well as a brief description of the need and why it should be a priority.

The Needs Submission form may be e-mailed to [NLongpine@OzarksTransportation.org](mailto:NLongpine@OzarksTransportation.org) or faxed to 417-862-6013. Please let me know if you have any questions about the process.

Thank you,

Natasha L. Longpine  
Planner

# Bike/Ped Priority Submission Form
