## INTRODUCTION

The Transportation Improvement Program (TIP) is the short-range capital improvement program for various transportation systems located in the Springfield metropolitan planning area. The Ozarks Transportation Organization (OTO) is the designated Metropolitan Planning Organization for the Springfield, Missouri Urbanized Area. Metropolitan planning organizations serve to conduct and lead a continuing, cooperative, and comprehensive transportation planning process. In an effort to make the transportation planning process cooperative and collaborative, elected officials from jurisdictions within the urban area and major transportation providers are members of the Ozarks Transportation Organization. The OTO is comprised of four components – the Board of Directors, the Technical Planning Committee, the Bicycle and Pedestrian Advisory Committee, and the Local Coordinating Board for Transit. The Board of Directors consists of elected officials and representatives from transportation providers. The Technical Planning Committee consists of technical staff and appointed transportation representatives. The Bicycle and Pedestrian Advisory Committee is also comprised of technical staff and appointed bicycle and pedestrian representatives. The Local Coordinating Board for Transit is composed of local human service transportation providers.

The TIP is a financially constrained four-year program outlining the most immediate implementation priorities for area transportation projects, carrying out the goals and vision of the OTO's long range transportation plan. It serves to allocate limited financial resources among the various transportation needs of the community and to program the expenditure of federal, state, and local transportation funds. In order to receive federal highway or transit funds, a project must be included in the TIP, though the TIP should also include any regionally significant projects, including those funded from non-federal funding sources. A regionally significant project is on a facility that serves regional transportation needs (such as access to and from the area outside the region; major activity centers in the region; major planned developments such as new retail malls, sports complexes, or employment centers; or transportation terminals) and would normally be included in the modeling of the metropolitan area's transportation network. The TIP is developed through a collaborative process in which each jurisdiction or federal recipient of transportation funds is given the opportunity to submit projects to be considered for placement in the TIP.

The TIP is created in compliance with the OTO public involvement policy. Each individual agency allows for public participation in the TIP process. Once the TIP submittals are received, OTO staff compiles the submittals and distributes them to the Technical Planning Committee. The Technical Planning Committee then reviews the TIP and forwards it to the Board of Directors. Public comment is taken prior to the approval of the TIP. Once approved by the Board of Directors, the Governor of Missouri must also approve the TIP. The TIP is approved by the Missouri Department of Transportation to be incorporated into the Statewide Transportation Improvement Program (STIP) by reference, following MoDOT's receipt of the Governor's review for concurrence and U.S. DOT approval of the MoDOT STIP amendment. Finally, the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA) approve the STIP.

This TIP document is intended to serve as a project implementation guide for those agencies participating in the OTO transportation planning process for the Springfield metropolitan planning area (MPA). The projects outlined in this TIP are a reflection of the policies and plans adopted by the OTO. The TIP, as approved by the Board of Directors and the Missouri Department of Transportation, constitutes the selection document for project implementation. The projects in the TIP represent the agreed list of projects that are programmed to be delivered in each year of the four-year TIP horizon period.

## OZARKS TRANSPORTATION ORGANIZATION MEMBERSHIP

### BOARD OF DIRECTORS

Voting Members include:

- One (1) Elected Official from Christian County
- Two (2) Greene County Commissioners
- One (1) Elected Official from the City of Battlefield
- One (1) Elected Official from the City of Nixa
- One (1) Elected Official from the City of Ozark
- One (1) Elected Official from the City of Republic
- Three (3) Springfield City Council Members
- One (1) City Utilities Board Member
- One (1) Springfield-Branson National Airport Board Member
- Four (4) Citizen At-Large Representatives
  - One (1) Member nominated by the Board of Directors and Appointed by the MPO
  - Two (2) Members nominated by Springfield and Appointed by the MPO
  - One (1) Member nominated by the Christian County Commission and Appointed by the MPO. The Cities of Ozark and Nixa may submit candidates to the Christian County Commission for consideration
- One (1) Elected Official from the City of Strafford
- One (1) Elected Official from the City of Willard

Non-Voting Members include:

- Federal Aviation Administration Representative
- Federal Highway Administration Representative
- Federal Transit Representative
- District Engineer, Missouri Department of Transportation (MoDOT)

### TECHNICAL PLANNING COMMITTEE

Voting Members include:

- Representative from the City of Battlefield
- BNSF Representative
- City Utilities Director of Transit Services
- Representative from Christian County
- Administrator, Greene County Highway Department
- Director, Greene County Planning Department
- Greene County Highway Department Chief Engineer
- Transit Representative of Missouri State University
- MoDOT (Central Office), Assistant Administrator of Transit
- MoDOT (Central Office), MPO Planning Liaison
- MoDOT Southwest District Office, Assistant District Engineer
- MoDOT Southwest District Office, Transportation Planning Manager
- Representative from the City of Nixa
- Representative from the City of Ozark
- Representative of Ozark Greenways
- Private Transportation/Transit Provider Representative
- Representative from the City of Republic
- Springfield-Branson National Airport Director of Aviation
- Representative of the Springfield Area Chamber of Commerce
- Springfield Director of Planning and Development
- Springfield Director of Public Works
- Representative from the City of Strafford
- Trucking Representative
- Representative from the City of Willard

Non-Voting Members include:

- Federal Aviation Administration Representative
- Federal Highway Administration Representative
- Federal Transit Administration Representative
- Southwest Missouri Council of Governments Transportation Advisory Committee Member

#### BICYCLE PEDESTRIAN ADVISORY COMMITTEE

- Representative from Christian County
- Representative from the City of Battlefield
- Representative from the City of Nixa
- Representative from the City of Ozark
- Representative from the City of Republic
- Representative from the City of Springfield
- Representative from the City of Strafford
- Representative from the City of Willard
- Representative from City Utilities
- Representative from Greene County
- Representative from Missouri State University
- Representative from MoDOT
- Representative from Ozark Greenways
- Citizen Representative

#### LOCAL COORDINATING BOARD FOR TRANSIT

- Arc of the Ozarks
- Burrell Center
- City Utilities Transit
- FTA Transit Administration Region 7
- MoDOT Central Office
- MoDOT Southwest District Office
- OATS, Inc.
- Southwest Center for Independent Living
- Southwest Missouri Council of Governments
- Southwest Missouri Office on Aging
- Ozark Senior Center
- Springfield Regional Office – Dept. of Mental Health
- Springfield Workshop Industrial Solutions

#### TRANSPORTATION PLAN COMPLIANCE

The FY 2023-2026 Ozarks Transportation Organization Transportation Improvement Program considers the Long Range Transportation Plan, *Destination 2045*, for the metropolitan planning area when placing projects in the program. Improvements are considered on a regional basis. Projects considered for placement in the Transportation Improvement Program must appear in the Long Range Transportation Plan.

Federal funding is used to improve highways and major intersections located in the metropolitan planning area, which serve not only the residents of the incorporated city limits or a single jurisdiction, but residents of unincorporated areas and multiple jurisdictions that use the state highway system to meet daily transportation needs. Many of the projects listed for consideration in the Long Range Transportation Plan are being improved through this program.

Federal funding is utilized to make transit improvements and to help fund the operations of the City Utilities and Missouri State University transit systems. The improvements financed are ranked and funded accordingly. As part of the ranking criteria, consideration is given to adherence to the Long Range Transportation Plan.

Federal funding is also used to aid in the purchase of vans for non-profit agencies in the region. These paratransit agencies serve populations that are not served by the fixed-route transit system.

## PUBLIC INVOLVEMENT PROCESS

### OZARKS TRANSPORTATION ORGANIZATION

OTO conducts its own public involvement process. This includes the notification of transportation agencies and other interested groups concerning the TIP project development and selection process and how to participate. OTO also publishes written notices and press releases to alert the public to those meetings at which the proposed TIP will be discussed. Public comment is solicited and copies of the draft are made available for public examination around the region, as well as the OTO offices and online at <http://www.OzarksTransportation.org>.

OTO provides annual notice to the agencies and groups considered interested parties and to the agencies that have previously submitted projects. This list may be found Section I of this document. The notice includes information concerning the transportation issues and processes used in developing a TIP submittal. This notice will provide the information required to propose projects for inclusion in the TIP and the timetable to be followed. OTO staff will be available to give these agencies and groups any assistance they might require in developing projects for submittal for the TIP.

Agencies submitting projects for inclusion in the TIP must include written documentation showing that public comment has been sought. If written or oral comments that question the need, scope or scheduling of TIP projects, or that propose alternative projects are received during the TIP preparation process, the submitting agency will submit a summary, analysis, and report on the disposition of the comments, which will be made a part of the approved TIP and can be found in Section I.

Public comment is taken prior to Board of Directors approval of the TIP. The draft TIP is to be made available for comment for 30 days. Prior to approval a public notice will be published in the Springfield News-Leader or other community paper. The draft TIP will be available on the OTO website, at the OTO offices, the Springfield-Greene County Library, City Utilities Transit Office, and the Missouri Department of Transportation Southwest District Office. Any public comment received during this review period will be taken into account by OTO staff and will be presented to the Technical Planning Committee and the Board of Directors as part of the approval process. The public notice regarding the availability for review of the draft TIP will include the following text: "THIS PUBLIC NOTICE OF PUBLIC INVOLVEMENT ACTIVITIES AND TIME ESTABLISHED FOR PUBLIC REVIEW AND COMMENTS ON THE TIP DEVELOPMENT PROCESS WILL SATISFY THE FTA'S PROGRAM OF PROJECTS REQUIREMENTS OF THE URBANIZED AREA FORMULA PROGRAM. IF NO COMMENTS OR CHANGES ARE MADE TO THE PROGRAM, THE PROGRAM AS PROPOSED WILL BE THE FINAL PROGRAM."

**OTO has adopted a public participation plan, available on the OTO website at [www.OzarksTransportation.org](http://www.OzarksTransportation.org).**

### CITY UTILITIES OF SPRINGFIELD

City Utilities of Springfield has adopted a public involvement policy that offers public and private entities the opportunity to participate in the transit planning process and to present views concerning the development of local transportation plans and programs. City Utilities holds an annual public hearing on their budget and projects for the coming year. The City Utilities Board of Public Utilities must also approve the budget and projects with the Springfield City Council making the final approval.

In January of 2015, City Utilities of Springfield, Missouri – Transit (CU) and the OTO executed a memorandum of understanding (MOU) wherein, CU agreed to rely on the locally adopted public participation process requirements

for the TIP as outlined in the PPP in lieu of the process required to develop its Program of Projects (POP). Per the MOU with CU, the OTO public participation process for the TIP satisfies CU's public participation process for the POP and has agreed to the following:

1. The OTO will be responsible to conduct the project selection process and to publish the annual Program of Projects for the FTA 5307 and 5339 programs.
2. The OTO will conduct the public participation process for the Springfield Urbanized Area for the FTA 5307 and 5339 programs.
3. The OTO's public participation plan should state that the OTO's public participation process satisfies CU's public participation process.
4. CU will assist the OTO with the public involvement process by allowing notices for public input opportunities to be placed in CU buses and facilities at no charge to the OTO.
5. CU will rely on the OTO's public involvement process for the TIP and requires public notices be published annually by the OTO. If the proposed POP is not amended, the OTO must include a statement that the proposed program will be the final program, unless amended, and satisfies the requirements regarding the final POP.
6. The OTO's public notice for the TIP must have an explicit statement that public notice of public involvement activities and time established for public review of and comments on the TIP will satisfy the POP requirements.
7. CU will rely on the public involvement process for the TIP conducted by the OTO to satisfy Section 5307 and 5339 public involvement requirements for the POP.
8. CU will report performance measure indicators to the OTO for reporting to the USDOT and informing the public of the improved performance of the transportation system resulting from federal investment.

OTO advertises City Utilities' program of projects each year in the Springfield News-Leader. A public hearing is required, and an equity analysis may also be performed, prior to implementing either an increase in transit fares or a significant reduction in service. The CU public involvement process for fare increases or route changes is aligned with FTA guidelines. A significant reduction in service is defined by the following criteria:

- A decrease of 25 percent or more in the revenue miles of a route, either at one time or cumulative during any twelve (12) month period; or
- An increase in headway for a route of more than 15 minutes; or
- A rerouting that will last more than 180 days and decrease the revenue miles of a route by 25 percent or more.

## MISSOURI DEPARTMENT OF TRANSPORTATION

Local input is important in statewide transportation planning. The Missouri Department of Transportation (MoDOT), the regional planning commissions (RPCs), MPOs, city officials, and county officials form regional partnerships to gather and evaluate local input on transportation needs. This allows members with common interests and goals to tailor their level of participation as they desire. Their roles can then evolve as participants gain more experience in transportation planning. Although members' roles and specific processes may differ from group to group, some common themes exist among them. Public comments concerning transportation needs are gathered from many sources, including county-wide public meetings, calls to MoDOT's customer service center, public surveys, and comments received by local officials from their constituents. The local officials, generally in conjunction with the RPC and MPO, use these comments in their process for identifying and prioritizing

transportation needs in the region. Each RPC and MPO develops a prioritized list of needs for MoDOT's consideration in programming.

In addition to public input, MoDOT continuously evaluates the condition of Missouri's road and bridges. State bridge inspectors evaluate the structural integrity of each bridge component. Interstate and primary system roads are evaluated every year, along with approximately one-third of the secondary system roads. During the pavement evaluation, physical factors such as rut depth, roughness, cracking, and joint integrity are reviewed. The road and bridge inspection data for the entire system is analyzed to provide indices for pavement and bridges. All of this data is used in programming.

MoDOT uses a combination of factors to determine what would be the best expenditure of funds in a particular year. These factors may include the MPO's and RPC's prioritized lists, public comment and priority time necessary to produce plans and estimated costs, as well as the recommendations of the long range transportation plan, safety factors, traffic information, condition ratings, construction scheduling and sequencing, duration of the construction, coordination with other construction projects (both MoDOT's and others), economic development, and the availability of outside funding sources. The combination of these factors, and more, are used to develop project priorities for programming.

## ENVIRONMENTAL JUSTICE

Environmental justice is a fundamental ideal that ensures federally funded plans and projects do not create a disproportionately adverse effect on minorities, low-income, disabled, elderly and/or under age 18 populations. This ideal is built on the framework of Title VI of the Civil Rights Act of 1964, which states, "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." In 1994, President Clinton issued an Executive Order directed to all Federal agencies to consider and address the effects of all program, policies, and activities on "minority and low-income populations." This has been further expanded to include the elderly, disabled, and the under 18-years of age populations. President Bush signed an Executive Order in 2000, expanding protection against national origin discrimination, by ensuring programs are accessible by people with limited English proficiency.

Federally funded recipients are to ensure that there are no disproportionate adverse impacts in these communities, or those considered transportation dependent due to age or physical limitations, when allocating or spending federal funds. These recipients are also required to review the benefits and burdens of projects and programs (in this case, transportation improvements) are balanced between the population at large and those traditionally underserved in the planning and programming process.

While it is difficult to make any significant change to the transportation system without negatively affecting someone, the focus of environmental justice is on these impacts and alternative solutions. Any major transportation system change should first consider whether society will be better off with the change, and second, determine the distributional impacts. The first consideration addresses the economic efficiency of a project; that is benefit-cost analysis. The second addresses the equity of who will receive more of the benefits and who will pay more of the costs. This question of equity is the concern of environmental justice. If it is determined that a project negatively impacts a population, the project can be rejected or the population impacted can be compensated. Should a project still move forward, attempts should be made to minimize the negative impacts.

OTO has identified minority and Hispanic, low-income, disabled, elderly and youth, and limited English proficiency

populations within the OTO region. Federal guidance identifies significant areas as those which contain more of the vulnerable population than the average for the region. The location of these populations has been compared to the location of the constrained projects included in the Long Range Transportation Plan. The projects included in the TIP, which identify with this analysis, have been marked as projects of potential Environmental Justice concern via a checkmark on the individual project detailed report page. This is to alert project sponsors that these projects could need additional analysis during the NEPA process.

## CONGESTION MANAGEMENT PROCESS

Urban areas with a population over 200,000, like the Ozarks Transportation Organization urbanized area, are known as Transportation Management Areas (TMAs). These areas must develop a Congestion Management Process (CMP) that both identifies and evaluates projects and strategies that reduce traffic congestion and increase the mobility of people and goods. The CMP can be found on the OTO website at [www.OzarksTransportation.org](http://www.OzarksTransportation.org).

## FUNDING SOURCES

### FEDERAL

The U.S. Department of Transportation allocates Highway Trust Funds collected from gasoline and other federal transportation-related taxes to major transportation programs administered by the Federal Highway Administration and the Federal Transit Administration as authorized by the Infrastructure Investment and Jobs Act, also known as the Bipartisan Infrastructure Law (BIL), signed November 15, 2021. It authorizes the federal surface transportation programs for highways, highway safety, transit, and rail for the five-year period from 2022 through 2026. The following is a list of some of the federal transportation programs from which funding is available:

Major Federal-Aid Highway Programs under BIL		
Program	Eligible Uses	Percent (%) Federal Share of Funded Projects
<b>Bridge Formula Program</b>	Formula program to replace, rehabilitate, preserve, protect, and construct highway bridges.	In accordance with 23 USC 120 unless used on a locally-owned off-system bridge (100)
<b>Congestion Mitigation and Air Quality (CMAQ)</b>	A wide range of projects in air quality non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter, which reduce transportation-related emissions.	80
<b>Carbon Reduction Program</b>	Provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO <sub>2</sub> ) emissions from on-highway sources.	In accordance with 23 USC 120

<b>Major Federal-Aid Highway Programs under BIL</b>		
<b>Program</b>	<b>Eligible Uses</b>	<b>Percent (%) Federal Share of Funded Projects</b>
<b>Highway Safety Improvement Program</b>	Any strategy, activity or project on a public road that is consistent with the data-driven State Strategic Highway Safety Plan (SHSP) and corrects or improves a hazardous road location or feature or addresses a highway safety problem.	90
<b>Metropolitan Planning (PL)</b>	All planning activities are eligible (e.g., modeling, air quality analysis, public outreach, environmental analysis).	80 unless the Secretary determines that changing this contribution level is warranted
<b>National Electric Vehicle Infrastructure Formula Program</b>	Provide funding to states to strategically deploy electric vehicle charging infrastructure and to establish an interconnected network to facilitate data collection, access, and reliability.	80
<b>National Highway Freight Program</b>	Contributes to the efficient movement of freight on the National Highway Freight Network and be identified in a freight investment plan included in the State's freight plan.	In accordance with 23 USC 120
<b>National Highway Performance Program</b>	Support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.	80
<b>Highway Infrastructure Program (as defined in annual appropriations funding)</b>	As defined by Section 133(b)(1)(A) of Title 23, U.S.C. – construction of highways, bridges, tunnels, including designated routes of the Appalachian development highway system and local access roads under Section 14501 of Title 40, U.S.C.	80
<b>Off-System Bridge Replacement and Rehabilitation Program</b>	Replacement and rehabilitation of deficient bridges located on roads functionally classified as local or rural minor collectors.	80
<b>Surface Transportation Block Grant Program (STBG)</b>	Broad range of surface transportation capital needs, including many roads, transit, sea and airport access, vanpool, bike, and pedestrian facilities.	80
<b>Transportation Alternatives Program – STBG Set-Aside</b>	A variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs.	80
<b>Transportation and Community and System Preservation (TCSP)</b>	Research and grants to investigate the relationships among transportation, community, and system preservation plans and practices and identify private sector-based initiatives to improve such relationships.	80

Major Federal-Aid Highway Programs under BIL		
Program	Eligible Uses	Percent (%) Federal Share of Funded Projects
<b>Discretionary Programs</b>	IJJA continued several discretionary programs and introduced several new ones, each with their own emphasis areas. Notices of Funding Opportunity (NOFOs) provide details on each program at the time applications are accepted.	Varies

Federal Transit Administration Urban-Related Programs under BIL		
Program	Eligible Uses	Percent (%) Federal Share of Funded Projects/Services
<b>Metropolitan Planning Program Funds – Section 5303</b>	Transportation Planning.	80
<b>Urbanized Area Formula Grants – Section 5307</b>	For public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances.	80 for capital 50 for operating 80 for paratransit
<b>Capital Investment Grants – Section 5309</b>	For new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors.	80
<b>Enhanced Mobility of Seniors and Individuals with Disabilities – Section 5310</b>	Enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit.	80 for capital 50 for operating
<b>Mobility on Demand (MOD) Sandbox Demonstration Program – Section 5312</b>	Funds projects that promote innovative business models to deliver high quality, seamless and equitable mobility options for all travelers.	80
<b>Bus and Bus Facilities Program – Section 5339</b>	Provides funding through a statutory formula to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. Additionally, this program includes two discretionary components – the Bus and Bus Facilities Discretionary Program and the Low or No Emissions Bus Discretionary Program.	80

## STATE OF MISSOURI

The State of Missouri receives state revenue for transportation from fuel taxes, licensing fees, sales taxes, interest earned on invested funds and other miscellaneous collections, and General Revenue.

## LOCAL GOVERNMENT

There are a variety of options available for transportation funding by local governmental entities. These include taxes, improvement districts, obligation bonds, development districts, Community Development Block Grants, special assessments, impact fees, excise taxes, development agreements, tax increment financing, gasoline taxes, licensing and motor vehicle fees, service fees and property taxes. **Additional information on revenues may be found later in this document in Section G: Fiscal Constraint.**

## ANNUAL LISTING OF OBLIGATED PROJECTS

### EXPLANATION OF SEPARATE PUBLICATION

An Annual Listing of Obligated Projects is required according to 23 CFR 450.334. This list is published by the Ozarks Transportation Organization each year in December. The list is online at [www.OzarksTransportation.org](http://www.OzarksTransportation.org); at the OTO offices (2208 W. Chesterfield Boulevard, Suite 101, Springfield, MO); or can be mailed/faxed by contacting 417.865.3042. This list includes all funding obligated during the preceding federal fiscal year. An obligation is a commitment of the federal government's promise to pay for the federal share of a project's eligible cost. This commitment occurs when the project scope of work is authorized and the federal funds are obligated in the FHWA Federal Management Information System (FMIS).

# PERFORMANCE BASED PLANNING

## SECTION B

NATIONAL GOALS AND PERFORMANCE MEASURES

OTO GOALS AND PERFORMANCE MEASURES

PROGRAMMING FOR PERFORMANCE

## PERFORMANCE MEASURES

### NATIONAL GOALS AND PERFORMANCE MEASURES

The Moving Ahead for Progress in the 21<sup>st</sup> Century Act, or MAP-21, integrated performance measures into the planning and programming aspects of transportation investment. MAP-21 established seven National Goals as the focus of the Federal-aid highway program. The FAST (Fixing America's Surface Transportation) Act and Infrastructure Investment and Jobs Act both provided for continuation of these goals. Guidance has been released listing the required performance measures to achieve the national goals. The state DOTs, MPOs, and transit agencies are required to coordinate target setting for these measures. MPOs must set their targets within 180 days of the state. MPOs may choose to set their own targets or to program in support of the state and transit agency targets. OTO will make this decision on a case-by-case basis.

#### 1. Safety

To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.

*Measures:*

- Number of Fatalities
- Rate of Fatalities per 100 million VMT
- Number of Serious Injuries
- Rate of Serious Injuries per 100 million VMT
- Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries

#### 2. Transit Safety

To achieve a reduction in transit-related fatalities, serious injuries, and safety events, and improve mechanical reliability.

*Measures:*

- Fatalities: Total Number of Reportable Fatalities by Mode
- Fatalities: Rate per Total Vehicle Revenue Miles by Mode
- Injuries: Total Number of Reportable Injuries by Mode
- Injuries: Rate per Total Vehicle Revenue Miles by Mode
- Safety Events: Total Number Reportable Events by Mode

#### 3. Transit Asset Management:

To maintain transit assets in a state of good repair.

*Measures:*

- Equipment (non-revenue service vehicles) State of Good Repair
- Facilities State of Good Repair
- Infrastructure State of Good Repair
- Rolling Stock State of Good Repair
- Safety Events: Rate per Total Vehicle Revenue Miles by Mode
- System Reliability: Mean Distance between Major Mechanical Failures by Mode

#### 4. Infrastructure Condition

To maintain the highway infrastructure asset system in a state of good repair.

*Measures:*

- Percentage of NHS Bridges Classified as in Good Condition
- Percentage of NHS Bridges Classified as in Poor Condition

- Percentage of Pavements of the Interstate in Good Condition
- Percentage of Pavements of the Interstate in Poor Condition
- Percentage of Pavements of the non-Interstate NHS in Good Condition
- Percentage of Pavements of the non-Interstate NHS in Poor Condition

#### **5. System Reliability**

To improve the efficiency of the surface transportation system.

*Measures:*

- Interstate Travel Time Reliability Measure – Percent of Person-Miles Traveled on the Interstate that are Reliable
- Non-Interstate NHS Travel Time Reliability Measure – Percent of Person-Miles Traveled on the non-Interstate NHS that are Reliable

#### **6. Freight Movement and Economic Vitality**

To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.

*Measures:*

- Freight Reliability Measure – Truck Travel Time Reliability (TTTR) Index

#### **7. Congestion Reduction**

To achieve a significant reduction in congestion on the National Highway System.

*Measures:*

- Peak Hour Excessive Delay (PHED) Measure – Annual Hours of PHED per Capita (not applicable to OTO)
- Non-Single Occupancy Vehicle Travel (SOV) Measure – Percent of non-SOV Travel (not applicable to OTO)

#### **8. Environmental Sustainability**

To enhance the performance of the transportation system while protecting and enhancing the natural environment.

*Measures:*

- Emissions Measure – Total Emissions Reduction (not applicable to OTO)

#### **9. Reduced Project Delivery Delays**

To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

## **SAFETY TARGETS**

After review of the information, at its meeting on November 18, 2021, the OTO Board of Directors voted to support the statewide safety targets for Calendar Year (CY) 2022, which are based on a rolling five-year average.

Besides the programming efforts described at the end of this Section, the OTO works with many safety programs in the region, including the MoDOT Southwest District Coalition for Roadway Safety (Show-Me Zero) and the hosting of the Traffic Incident Management Committee. Through the Southwest Coalition, OTO has been able to secure cones and safety vests for emergency responders in the region. Bicycle and pedestrian safety is monitored by the OTO Bicycle and Pedestrian Advisory Committee through review of crash data and discussion among local jurisdictions on ways to improve safety.

## TRANSIT SAFETY TARGETS

---

City Utilities, the sole fixed-route transit operator and recipient of FTA 5307 funding, has developed and adopted their own Public Transit Agency Safety Plan. At its meeting on December 17, 2020, the OTO Board of Directors voted to support the safety targets set by City Utilities Transit. The targets in the CU PTASP have been reviewed annually, however, there have been no changes, and so additional Board of Directors action has not been necessary.

## TRANSIT ASSET MANAGEMENT TARGETS

---

City Utilities, as a Tier II transit agency, has partnered with the State of Missouri on their Transit Asset Management (TAM) Plan, which was adopted in October 2018. MoDOT collected and evaluated transit data and used this information to set targets, which will be evaluated on an annual basis as inventory changes. These targets were coordinated with the applicable transit agencies and MPOs. City Utilities agrees to manage their assets in support of the state targets. At its regularly scheduled meeting on December 20, 2018, the OTO Board of Directors accepted the Transit Asset Management Targets in the MoDOT TAM Plan. The targets in the MoDOT TAM plan have been reviewed annually, however, there have been no changes, and so additional Board of Directors action has not been necessary.

## INFRASTRUCTURE CONDITION TARGETS

---

Pavement and Bridge Targets are a combination of two- and four-year targets. At its meeting on December 17, 2020, the OTO Board accepted the MoDOT Pavement and Bridge Targets, agreeing to plan and program in support of these targets.

## SYSTEM PERFORMANCE TARGETS

---

System Performance, which includes system reliability and freight reliability, is also a combination of two- and four-year targets. At its meeting on December 17, 2020, the OTO Board accepted the MoDOT System Performance Targets, agreeing to plan and program in support of these targets.

## OTO GOALS AND PERFORMANCE MEASURES

Federal surface transportation authorizing legislation further requires a discussion of performance target achievement in the Transportation Improvement Program. OTO did, however, adopt regional, non-federally required goals and performance measures in its long range transportation plan, *Journey 2035*, adopted in December 2011. These same regional performance measures were carried into *Transportation Plan 2040*, as well as *Destination 2045*.

**Integration of these regional performance measures into the OTO prioritization process for the statewide transportation improvement program can be found in Section E: Federal Highway/MoDOT Eligible Projects.**

## DESTINATION 2045 GOALS

---

1. A safe transportation system for all users on all modes
2. Preserve existing transportation assets and promote fiscal responsibility

3. Connected, integrated, multi-modal system
4. Build a transportation system that supports a resilient region that is prepared for the future
5. Build quality projects that implement best design and engineering practices

#### *DESTINATION 2045 PERFORMANCE MEASURES*

<b>Performance Measure</b>	<b>Target</b>	<b>FY 2023-2026 TIP Projects</b>
Vehicle Miles Traveled per Capita	That VMT per Capita will grow no more than 5 percent from its peak in 2004, at a value of 19, by 2035. Growth should be captured in other modes	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Modal Balance	Decrease “Drove Alone” to 75 percent for the region by 2035	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Bicycle/Pedestrian Network Completion	If, on average, 4 miles of sidewalk are added each year within the OTO area, but no new roadways, by 2035, the total percent of roadways with sidewalks would be 33.5	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit stop connections
Total Disabling Injury and Fatal Crashes per Million Vehicle Miles Traveled	That disabling injury and fatal crashes/MVMT will continue a downward trend as shown in the above graphic	Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
On-Time Performance of Transit System	The CU service standard is 90 percent. The system will be considered to have acceptable on-time performance at this 90 percent level	Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Housing Units within ¼-mile of a Bus Route	That the percent of housing units within the CU Transit service area and the OTO area within ¼-mile of a bus route is on the upward trend between now and 2035	Transit operations; Transit service coordination

Performance Measure	Target	FY 2023-2026 TIP Projects
Average Commute Time	Keep the average commute time less than 25 minutes by 2035	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Peak Travel Time	That less than 20 percent of the OTO area roadways will be severely delayed	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Roadways in Good Condition	That 85 percent or more of the Major Roads in the OTO region are in Good condition	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Bridge Condition	That the percent of bridges in fair or better condition will stay above 90 percent	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Ozone Levels	That the region will be able to demonstrate transportation conformity for its plans, programs, and projects	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination

### DESTINATION 2045 GOALS

OTO is currently developing its next long range transportation plan, *Destination 2045*. The goals and performance measures adopted as part of that process will be incorporated into future prioritization efforts. These will be incorporated into the next TIP.

## PROGRAMMING FOR PERFORMANCE

The projects included in the FY 2023-FY 2026 Transportation Improvement Program address these national and regional measures, targets, and goals in a variety of ways. Programmed projects include ADA, pedestrian, and bicycle accommodations. This adds to the reduction of VMT per capita, increased modal balance, bicycle/pedestrian network completion, improved average commute and peak travel time, and maintaining acceptable air quality. Over \$100 million is programmed for bicycle and pedestrian projects and projects that include bicycle and pedestrian accommodations.

The TIP includes numerous safety projects that address roadway and bicycle/pedestrian infrastructure, work-zone safety, and the safety and security of the transit system. These projects support a reduced crash rate and the improved condition of area roads and bridges. Many pavement improvements and railroad crossing improvements benefit these factors as well. Over \$28 million in safety projects has been programmed, with over \$213 million in projects addressing safety regardless of their funding source.

Several roadways and intersections in the region suffer from congestion, per the OTO Congestion Management Process. These bottlenecks are addressed through capacity and efficiency improvements. The LRTP and STIP Prioritization processes emphasize system performance in the criteria used to score projects.

Infrastructure condition is addressed through numerous resurfacing and reconstruction projects. The MoDOT funding distribution process puts funding toward asset management before it can be used for system expansion and other types of projects. With MoDOT's focus on taking care of the existing system, this is even more pronounced in how funding is applied in the OTO region. About 20 percent of funding is dedicated to Asset Management projects. Other major projects on the system have the benefit of improving infrastructure also in need of maintenance, even if that is not the overall goal of the project.

The TIP continues to support the transit system as well, including technology projects that will improve transit operations. Coordination of service, with support for service outside of the City Utilities Transit region is also addressed. Transit State of Good Repair is provided by preventative maintenance and bus replacement projects totaling over \$11 million. Transit Safety is provided through funds available to City Utilities Transit and is programmed at nearly \$174,000 over the life of this TIP.

# PROJECTS

## SECTION C – STATUS OF PRIOR YEAR PROJECTS

## STATUS OF PRIOR YEAR PROJECTS

The tables below show the status of projects that appeared in the prior Transportation Improvement Program, but do not appear in the FY 2023-2026 TIP.

### SECTION D

TIP #	Project Description	Type of Improvement	Status
<b>NA1300</b>	Runway Pavement Condition Study and Master Plan Update	Master Plan Update	Under Construction
<b>NA1603</b>	Taxiway Bravo Reconstruction and Direct Access Mitigation	Pavement mitigation to prevent aircraft direct access to runway from Taxiways Bravo at Taxiway November.	Under Construction
<b>NA2103</b>	Taxiway November Reconstruction from Taxiway Alpha to Runway 20	Reconstruct Taxiway November from approach end of Runway 20 to Taxiway Alpha. Construction of General Aviation Apron Rehabilitation.	Under Construction

### SECTION E

TIP #	Project Description	Type of Improvement	Status
<b>BA2201</b>	Route FF through Battlefield Study	Corridor Study to develop cross section and roadway type recommendations based on public input and projected volumes and function.	In Progress
<b>CC2101</b>	Route 14 High Friction Surface Treatment	High friction surface treatment from west of Carroll Road to west of Hilltop Court and at Richwood Road.	Under Construction
<b>EN1904</b>	Battlefield Third St. Sidewalk Connection	Sidewalk connections in Battlefield along Third St./Clairborne St./Fourth St./Elm St. into Cherokee Trail of Tears Park from Route FF to Battlefield City Hall.	Obligated
<b>EN2008</b>	Chadwick Flyer Jackson to Clay	Construction of (1) approximately 3,200 linear feet of the Chadwick Flyer trail between Clay Street and Jackson Street, (2) approximately 500 linear feet of trail running northwest from Jackson, west of 12th Street, to Diane Street, and (3) two pedestrian underpasses along Highway 14 connecting the trail segments to the south side of Highway 14.	Under Construction
<b>EN2011</b>	Trail of Tears Elm to Somerset	Constructing approximately 2,200 feet of trail connecting Elm Street and Somerset Street through the Trail of Tears Park, including the widening of some existing trail.	Under Construction

TIP #	Project Description	Type of Improvement	Status
<b>EN2103</b>	Norton Road ADA Improvements in Springfield	Upgrade pedestrian facilities to comply with the ADA Transition Plan on Norton Road near Rte. 13 in Springfield and on Rte. Z at the Frisco Highline Trail north of Jackson Street in Willard.	Under Construction
<b>GR1901</b>	Kansas Extension Phase I	New roadway from Republic Road to Plainview with bicycle and pedestrian accommodations.	Under Construction
<b>GR2106</b>	Mill/Fill and ADA Upgrades on FR 135 and FR 102	Mill/Fill and ADA upgrades on Farm Road 135 (Golden Ave.) from Republic Road to City Limits and Farm Road 102 (Valley Water Mill) from Farm Road 171 to Farm Road 175.	Obligated
<b>GR2206</b>	Rt KK Culvert Replacement East of Hidden Lake Lane	Replace culvert east of Hidden Lake Lane. Project involves culvert T0150.	Under Construction
<b>GR2209</b>	MO 360/US 60 Bridge Rehabilitations	Bridge rehabilitation on eastbound bridge over Farm Road 156 and BNSF Railroad and on Rte. 60 eastbound bridge over South Creek west of Rte. 160. Project involves bridges A5842 and A4148.	Under Construction
<b>MO2008</b>	On-Call Work Zone Enforcement (2022)	On-call work zone enforcement at various locations in the urban Southwest District.	Complete
<b>MO2104</b>	ITS Operations and Management (2022)	Operations and management of Ozarks Traffic Intelligent Transportation System in the Ozarks Transportation Organization area.	Complete
<b>MO2106</b>	Add ITS for Ozarks Traffic in Various Locations in OTO Area	Add ITS for Ozarks Traffic at various locations on Route 60 (James River Freeway) in Springfield, Route FF (West Bypass) near Battlefield, and various locations in Ozark.	Under Construction
<b>MO2107</b>	Upgrade ITS Message Boards in OTO Area	Upgrade ITS message boards at various locations in the Urban Southwest District.	Obligated
<b>MO2202</b>	Various Routes Pavement Preservation	Pavement preservation treatment on Rte. 14 from Antler Drive to Rte. M in Nixa, on Rte. F from Riverdale Road to Rte. 65 in Ozark, and on Rte. DD from Rte. 125 to the end of state maintenance near Strafford.	Under Construction
<b>MO2203</b>	Various Routes Safety Improvements	Safety improvements at various locations in the urban Southwest District.	Reprogrammed to MO2309
<b>MO2204</b>	Job Order Contracting Pavement Repair (2022)	Job Order Contracting for pavement repair in the Ozarks Transportation Organization area.	Complete
<b>MO2208</b>	Job Order Contracting for Bridge Repairs (2022)	Job Order Contracting for bridge repairs at various locations in the urban Southwest District.	Complete
<b>MO2211</b>	Concrete Repairs at Various Locations (2022)	Concrete repairs at various locations in the urban Southwest District.	In Progress
<b>MO2403</b>	Safety Projects at Various Locations	Safety projects at various locations in the urban Southwest District.	Reprogrammed to SP2308
<b>MS2201</b>	Grand Street Pedestrian Underpass & Streetscape Improvements	Phase I includes improvements to the Grand Street Underpass at the Missouri State University Campus, including accessibility. Phase II includes streetscape improvements on Grand Street.	Phase II reprogrammed to SP2501

TIP #	Project Description	Type of Improvement	Status
<b>NX2102</b>	North Street Maplewood Hills to Cheyenne	Engineering for North Street Improvements from east of Maplewood Hills to the intersection at Cheyenne.	In Progress
<b>OK2205</b>	US 65 Scoping for Ramp and Intersection Improvements at Rt CC/J	Scoping for ramp and intersection improvements at Rtes. CC and J in Ozark. Project involves bridge A3860.	Reprogrammed to OK2203
<b>OK2206</b>	Chadwick Flyer Highway Crossing Study	Phase 1: Pedestrian Crossing location study to determine the best location and cost estimate for the Chadwick Flyer Trail to cross US 65 and Phase 2: US 65 interchange general concept and siting.	Complete
<b>SP1815</b>	Kearney and West Bypass Intersection Improvements	Add intersection turn lanes on West Bypass (Rte. 160) at Kearney Street (Rte. 744) in Springfield.	Under Construction
<b>SP1818</b>	Campbell and Republic Road Intersection	Add lanes, replace sidewalk, replace signal at Campbell Avenue and Republic Road.	Under Construction
<b>SP1902</b>	Republic Road Lane Widening	Widen to five lanes, add curb and gutter, sidewalks, and access control as needed.	Under Construction
<b>SP2008</b>	West Bypass Resurfacing I-44 to Sunshine	Pavement resurfacing on West Bypass from I-44 to Sunshine Street (Rte. 413).	Under Construction
<b>SP2009</b>	West Bypass Resurfacing Sunshine to 60	Pavement resurfacing on West Bypass from Sunshine Street (Rte. 413) to north of James River Freeway (Rte. 60).	Under Construction
<b>SP2015</b>	Grant Avenue Connect Parkway Project	The project will reconstruct approximately 3.3 miles of a multi-use bicycle and pedestrian path on Grant Avenue starting at Downtown Springfield, ending at Sunshine Street, including bike lanes, traffic calming, intersection improvements, a grade-separated crossing at Fassnight Creek, bridge enhancement, utility upgrades, fiber connectivity, additional crossing and signal timing improvements, outdoor incubator, and creek daylighting.	Under Construction
<b>SP2016</b>	Traffic Signal System Improvements	Traffic signal system improvements in Springfield at various locations, including cabinet replacements, and advanced vehicle detection installations.	In Progress
<b>SP2101</b>	OR 44 Pavement Resurfacing in Springfield	Pavement resurfacing from Farm Road 112 to 0.2 miles west of Rte. 13 in Springfield.	Under Construction
<b>SP2102</b>	Norton Road Pavement Resurfacing	Pavement resurfacing on various outer roads locations near Rte. 13 in north Springfield.	Under Construction
<b>SP2103</b>	I-44 Outer Road Pavement Resurfacing	Pavement resurfacing on various outer roads in Springfield and Strafford.	Under Construction
<b>SP2204</b>	James River Freeway Add Lanes Kansas to Campbell	Add lanes on James River Freeway from Kansas Expressway (Rte. 13) to west of Campbell Avenue (Rte. 160) in Springfield.	Under Construction

TIP #	Project Description	Type of Improvement	Status
<b>SP2205</b>	James River Freeway Add Lanes Campbell to National	Add lanes and sound abatement on James River Freeway from west of Rte. 160 (Campbell Avenue) to National Avenue in Springfield. Project involves bridges A4182 and A4183.	Under Construction
<b>SP2207</b>	US 60 Pavement Resurfacing on Aux Ramps Kansas to Campbell	Pavement resurfacing on Rte. 60 (James River Freeway) auxiliary ramps from Kansas Expressway (Rte. 13) to Campbell Avenue (Rte. 160) in Springfield.	Under Construction
<b>SP2216</b>	North 13 Corridor Study	Study to determine improvements needed to improve Route 13 near I-44, including the I-44 interchange.	Complete

## SECTION F

TIP #	Project Description	Type of Improvement	Status
<b>CU2200</b>	FY 2022 Operating Assistance - Fixed Route	Operating assistance up to 75% of apportionment to operate public transit service.	Obligated
<b>CU2201</b>	FY 2022 Preventive Maintenance	Subsidy of preventive maintenance expenses for existing public transit service.	Obligated
<b>CU2202</b>	FY 2022 Transit Planning - FTA 5307	This project is listed in the OTO Unified Planning Work Program each year for short range transit planning activities.	Obligated
<b>CU2203</b>	FY 2022 Transit Security - FTA 5307	This project is for the purchase of capital security equipment to meet the 1% requirement for Section 5307 funding.	Obligated

# PROJECTS

## SECTION D – FEDERAL AVIATION ELIGIBLE PROJECTS

(NA) SPRINGFIELD-BRANSON NATIONAL AIRPORT

## EXPLANATION OF FUNDING

### AIRPORT IMPROVEMENT PROGRAM

The current aviation program, known as the Airport Improvement Program (AIP), was established by the Airport and Airway Improvement Act of 1982 (Public Law 97-248). Since then, the AIP has been most recently authorized with passage of the FAA Reauthorization Act of 2018. Funds obligated for the AIP are drawn from the Airport and Airway Trust Fund, which is supported by user fees, fuel taxes, and other similar revenue sources.

### ELIGIBLE AIRPORTS

AIP grants funds for planning, development, or noise compatibility projects that are located at or associated with individual public-use airports (including heliports and seaplane bases). A public-use airport is an airport open to the public that also meets the following criteria:

- Publicly owned, or
- Privately owned but designated by FAA as a reliever, or
- Privately owned but having scheduled service and at least 2,500 annual enplanements.

To be eligible for an AIP grant, an airport must be included in the National Plan of Integrated Airport Systems (NPIAS). The NPIAS, which is prepared and published every two years, identifies public-use airports that are important to public transportation and contribute to the needs of civil aviation, national defense, and the postal service.

Recipients of grants are referred to as "sponsors." The description of eligible grant activities is described in the authorizing legislation (Title 49 USC, Chapter 471) and relates to capital items serving to develop and improve the airport in areas of safety, capacity, and noise compatibility. In addition to these basic principles, a sponsor must be legally, financially, and otherwise able to carry out the assurances and obligations contained in the project application and grant agreement.

### ELIGIBLE PROJECTS

Eligible projects include those improvements related to enhancing airport safety, capacity, security, and environmental concerns. In general, sponsors can use AIP funds on most airfield capital improvements or repairs and in some specific situations, for terminals, hangars, and non-aviation development. Any professional services that are necessary for eligible projects — such as planning, surveying, and design — are eligible. Aviation demand at the airport must justify the projects, which must also meet Federal environmental and procurement requirements.

Projects related to airport operations and revenue-generating improvements are typically not eligible for funding. Operational costs — such as salaries, equipment, and supplies — are also not eligible for AIP grants.

The table below lists typical examples of eligible and ineligible projects; the list is not exhaustive. Questions about AIP eligibility should be directed to the appropriate regional airport office.

EXAMPLES OF ELIGIBLE PROJECTS	EXAMPLES OF INELIGIBLE PROJECTS
Runway construction/rehabilitation	Maintenance equipment and vehicles
Taxiway construction/rehabilitation	Office and office equipment
Apron construction/rehabilitation	Fuel farms
Airfield lighting	Landscaping
Airfield signage	Artworks
Airfield drainage	Aircraft hangars
Land acquisition	Industrial park development
Weather observation stations (AWOS)	Marketing plans
NAVAIDs such as REILs and PAPIs	Training
Planning studies	Improvements for commercial enterprises
Environmental studies	Maintenance or repairs of buildings
Safety area improvements	
Airport layout plans (ALPs)	
Access roads only located on airport property	
Removing, lowering, moving, marking, and lighting hazards	
Glycol Recovery Trucks/Glycol Vacuum Trucks

# PROJECTS

## SECTION E – FEDERAL HIGHWAY/MODOT ELIGIBLE PROJECTS

OTO SPONSORED PROJECTS

COST SHARES

LOCALLY SPONSORED PROJECTS

MODOT SPONSORED PROJECTS

## BIKE/PED PROJECT PRIORITIZATION

The Ozarks Transportation Organization has established priorities for bicycle, pedestrian, and trail improvements. The majority of these improvements are funded through OTO's competitive selection process for the use of STBG-Urban Set-Aside (TAP) funding. The region has also been fortunate to receive additional suballocated funding through the federal appropriations process and has elected to use offset STBG-Urban funding to fulfill the goals of the Regional Bicycle Pedestrian Trail Investment Study and the creation of a regionally connected trail system.

## TRANSPORTATION ALTERNATIVES PROGRAM

Under MAP-21, Transportation Enhancement funding was replaced by the Transportation Alternatives Program. The FAST (Fixing America's Surface Transportation) Act moved this program to be a set-aside under the renamed Surface Transportation Block Grant program. The Infrastructure Investment and Jobs Act doubled the amount of this set-aside. For the purposes of this document, the STBG set-aside funding will continue to be referred to as TAP funding. This program provides for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. TAP replaced the funding from pre-MAP-21 programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source. TAP is funded by contract authority from the Highway Account of the Highway Trust Fund. Funds are subject to the overall Federal-aid obligation limitation.

### ELIGIBLE SPONSORS

Eligible sponsors for TAP funding include:

- local governments, including city and county governments
- regional transportation authorities
- MPOs that represent an area smaller than 200,000 population
- transit agencies
- natural resource or public land agencies
- school districts, local education agencies, or schools
- tribal governments
- any non-profit entity
- any other local or regional governmental entity with responsibility for oversight of transportation or recreational trails
- a State, at the request of another eligible entity

### ELIGIBLE ACTIVITIES

Funds may be used for projects or activities that are related to surface transportation and described in the definition of "Transportation Alternatives." [23 USC 101(a)(29) or 23 USC 213 as such provisions were in effect on the day before the enactment of the FAST Act]

- Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and other nonmotorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and transportation projects to achieve compliance with the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.).

- Construction, planning, and design of infrastructure-related projects and systems that will provide safe routes for non-drivers, including children, older adults, and individuals with disabilities to access daily needs.
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other nonmotorized transportation users.
- Construction of turnouts, overlooks, and viewing areas.
- Community improvement activities, including—
  - inventory, control, or removal of outdoor advertising;
  - historic preservation and rehabilitation of historic transportation facilities;
  - vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control; and
  - archaeological activities relating to impacts from implementation of a transportation project eligible under this title.
- Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to—
  - address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff, including activities described in sections 133(b)(11), 328(a), and 329; or
  - reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.

In addition to defined Transportation Alternatives (as described above), the following are also eligible:

- The recreational trails program under 23 USC 206.
- The safe routes to school program under §1404 of SAFETEA-LU.
- Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.
- Activities in furtherance of a vulnerable road user safety assessment.

## EVALUATION CRITERIA FOR SUBALLOCATED BICYCLE/PEDESTRIAN/TRAIL FUNDING

OTO receives suballocated TAP funding and awards projects on a competitive basis. Currently programmed projects were scored based on the following:

### 2019

- Project sponsors that provide a total local match that exceeds 25% of the project's total cost are awarded a minimum of three points. Any match that exceeds 30%, or 35%, qualifies for additional points.
- Points will be awarded based on the degree to which project right-of-way has been secured.
- A project will earn five points if it is located on one of the corridors evaluated in the Regional Bicycle and Pedestrian Trail Investment Study (RBPTIS)
- Points will be award to projects based on the types on connections made and the progress made towards creating a system that makes walking and bike more feasible.
- Connections could include neighborhood-to-neighborhood, neighborhood-to-commercial district, or connections to an existing trail or bus stop.
- Feasibility can be shown by highlighting obstacles or impediments the new connectivity overcomes. These could include major arterials, narrow streets, railroads, ADA-accessibility issues, or system gaps.

- Points will be awarded based on the level of citizen participation. Participation can range from plan approval by city council to a Facebook poll to a community meeting or open house.
- Points will be awarded based on the likelihood the proposed strategy would result in appropriately refined alignments.
- Points will be awarded based on the likelihood the proposed strategy would result in positive relationship with landowners along the refined alignments
- Points will be awarded based on the likelihood the proposed strategy would result in improved trail design and more frequent trail construction.
- Points will be awarded based on the likelihood the proposed strategy would result in increased community support for trails.

---

## 2018

- Project has more than one local, federal, state, or non-profit partner contributing to the match dollars
- Right-of-Way for the project has already been acquired in its entirety
- Project enhances the connection between OTO jurisdictions
- Project rebuilds at least 80% existing sidewalk, trail, and ramps to address an ADA concern
- Project is comprised of more than 80% new sidewalk or trail
- Project is multimodal, connects other modes of transportation, or provides connectivity with other transportation facilities
- Project promotes redevelopment/revitalization
- Project is a regionally significant and priority Bike/Ped project, as demonstrated by inclusion in a public planning document
- Does the project help promote safe routes to school? (Must be within 1½-mile of a public or private educational institution, excluding for-profit institutions)

MoDOT receives a statewide allocation of TAP funding, as well. Currently, this funding is dedicated to the needs of the MoDOT ADA Transition Plan.

## ROADWAY PROJECT PRIORITIZATION

### REVENUE SOURCES

A detailed discussion of the federal, state, and local revenue sources and amounts of available funding may be found in Section G: Fiscal Constraint of this document.

### LOCAL AGENCY SPONSORED PROJECT PRIORITIZATION

As part of the development of the Long Range Transportation Plan, *Destination 2045*, project needs were collected utilizing several methods:

- All jurisdictions were asked to submit a list of project needs containing both current needs and those that they felt would be needed within the plan horizon.
- MoDOT was asked to submit a list of projects which were needed on the state highway system.
- The travel demand model was run to determine which roads were operating at capacity deficiencies.
- The prior plan, *Transportation Plan 2040*, was reviewed for additional, not yet submitted, projects.

- The public was asked to provide input on project needs throughout the region.
- Those roadways which were considered to be severely congested by the OTO Congestion Management Process (CMP) were added to the list of projects.

To prioritize projects, OTO and the LRTP subcommittee developed a set of prioritization criteria factors based on the goals which had been set within *Destination 2045*.

Factor	Max Points
High Volume Corridors	8
Safety	40
Bike/Ped Safety	20
At-Grade RR Crossing	4
Multi-Modal	6
Environmental Justice	8
Current Congestion	15
Future Congestion	7
SW Freight Plan	2
Freight Traffic	4
Bridge Condition	6
Extending Life Cycle	4
Local Priority	15
<b>TOTAL Points</b>	<b>140</b>

Once projects were prioritized, the potential list was compared against the available amount of funding projected for the plan horizon. The results of this prioritization netted constrained and unconstrained project lists.

Projects selected for inclusion in the TIP are determined by several factors:

- Application submission by local jurisdiction
- Available funding
- Inclusion of project on Constrained Project List in *Destination 2045*

It is reasonable to expect that the local jurisdictions will use local sales tax dollars to expedite priority projects by cost sharing with both the local and state MoDOT offices.

The listing of projects is subject to regular review and modification. The project list provides a framework of transportation needs for the metropolitan area. Innovative funding mechanisms should be sought to fully develop as many of the project needs from both lists as possible.

Projects in the TIP correspond with the projects in the Constrained Project List in *Destination 2045*.

## MODOT SPONSORED PROJECT PRIORITIZATION

Annually, MoDOT also develops the Statewide Transportation Improvement Program. A variety of project needs are addressed with this five-year program, first and foremost being taking care of the system. MoDOT must ensure that the current system is adequately maintained prior to considering any other type of project. This category includes pavement repair and rehabilitation, ITS operations, signal maintenance, ADA improvements, etc. The next set of needs are safety related. This includes guardrail and guard cable maintenance, site distance issues, and possibly intersection improvements at which accidents are very high. Finally, any remaining funding would go to fund regional needs as prioritized by the Ozarks Transportation Organization. These projects are derived from the OTO Long Range Transportation Plan Constrained Project List and the Priority Projects of Regional Significance.

To prioritize the eligible projects, OTO uses the prioritization factors from *Destination 2045*, with some modifications and updated data, such as volumes and crashes. This information is updated as available for each annual prioritization process. A working group of the Technical Planning Committee reviews the scoring results and considers other factors that may affect a project's priority. The prioritized list is then recommended to the Technical Planning Committee and the Board of Directors. MoDOT then consults this list to determine scoping and construction projects that can be programmed after other needs are considered. Several factors affect how a project moves forward including design status, cost, ROW, and relation to other planned projects.

A number of MoDOT-sponsored projects in the FY 2023-2026 TIP were selected through this process. Below is a list of those projects currently programmed from prior prioritization processes:

- BA2202 – Route FF Corridor Improvements Scoping
- CC1802 – Route 160 Roadway Improvements
- CC1901 – US 65 Capacity Improvements from CC to 14
- CC1902 – US 65 Capacity Improvements from 14 to F
- CC2102 – US 160 Bridge Rehabilitation and Intersection Improvements at RT AA
- GR1403 – Capital Improvements on Route 60 East
- GR1801 – Scoping for I-44 Safety Improvements
- GR2010 – Route ZZ and FR 182 Add Roundabout
- GR2303 – Intersection and Safety Scoping Willard and Near Republic
- MO2215 – ITS on Chestnut Expressway from West Bypass to Kansas Expressway
- NX1704 – Scoping for 160 Capacity Improvements Plainview to South
- NX2202 – Route CC Roundabout at Main Street in Nixa
- OK2201 – MO 14 Roadway Improvements 6<sup>th</sup> Avenue to 14<sup>th</sup> Avenue
- OK2202 – RT CC Intersection Improvements in Ozark
- OK2204 – MO 14 Scoping for Westbound Operational Improvements
- OK2205 – US 65 Scoping for Ramp and Intersection Improvements at Route CC/J
- RG0901 – Interchange Improvements at Route 60 and Route 125
- RP1701 – Scoping for Roadway Improvements on Route 60 from Farm Road 194 to West
- RP1703 –Route MM Improvements – I-44 to Route 360
- RP1704 – Route MM Railroad Crossing Improvements
- RP2201 – RT MM Ramp Intersection Improvements at I-44
- RP2301 – Route MM Interchange Scoping at I-44
- SP1405 – Scoping for James River Freeway Capacity Improvements
- SP1419 – Scoping for I-44 Roadway Improvements
- SP1709 – Scoping for Interstate Designation on Freeways
- SP1802 –Safety and Operational Improvements on Sunshine Street
- SP1811 – Kearney Street Safety Scoping
- SP1812 – Chestnut Expressway Safety Improvements
- SP1816 – Kansas Expressway and Sunset Street
- SP1817 – Kansas Expressway and Walnut Lawn
- SP1909 – West Sunshine/Route 60 Corridor Scoping
- SP2003 – Operational, Safety, and ADA Improvements on Glenstone St. Louis to 60
- SP2203 – I-44 Roadway Improvements Glenstone to US 65 in Springfield
- SP2212 – MO 13 Scoping for Capital Improvements Bennett to James River Freeway

- SP2215 – I-44 and Kansas Expressway
- SP2218 – Glenstone Operational and Pedestrian Improvements
- SP2219 – James River Freeway Interchange Improvements Scoping
- SP2220 – US 60 & US 65 Interchange Improvements Scoping
- SP2302 – Kansas Expressway Capital Improvements
- SP2306 – Roundabouts on Route 266 (at AB and at B)
- ST2201 – MO 125 Intersection Improvements in Strafford

## NATIONAL HIGHWAY FREIGHT NETWORK

The FAST Act established a National Highway Freight Network (NHFN). This network is comprised of:

- Primary Highway Freight System (PHFS) – 41,518 centerline miles | 9.8 percent non-interstate
- Interstate Routes not on the PHFS – approximately 9,800 centerline miles
- Critical Urban Freight Corridors (CUFC)
- Critical Rural Freight Corridors (CRFC)

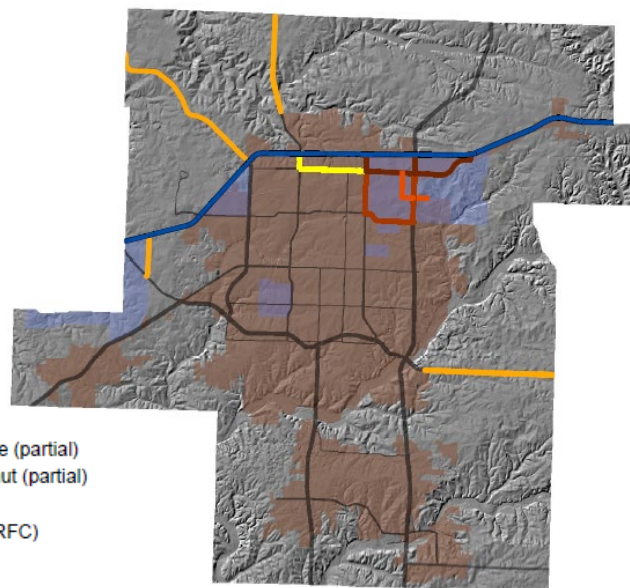

The NHFN was created to strategically direct federal resources and policies toward improved freight performance in the United States. Since OTO is an MPO with a population less than 500,000, MoDOT has the responsibility, with OTO's consultation, to designate CUFC, which must:

- Connect an intermodal facility to the PFHS, the Interstate System, or another intermodal facility,
- Provide a bypass route for the PFHS,
- Serve a major freight generator, logistics center, or manufacturing and warehouse industrial land, and
- Be important for freight movement in the region.

As more guidance become available from the Bipartisan Infrastructure Law, OTO will work with MoDOT and other planning partners should there be any necessary changes.

## DESIGNATION

The State of Missouri is limited to 102.33 miles of CUFC divided among Missouri's nine MPO urban areas. The Federal Highway Administration is allowing states to maintain a dynamic list of CUFCs. The list for Missouri will vary depending on roads in need of the specific funding category eligible by this designation. OTO has selected several roadways throughout the region as CUFCs, as well as several CRFCs.

# PROJECTS

## SECTION F – FEDERAL TRANSIT ELIGIBLE PROJECTS

CU – CITY UTILITIES

MO – MISSOURI DEPARTMENT OF TRANSPORTATION

## PROVIDERS

### CITY UTILITIES

City Utilities is the primary fixed-route transit operator in the OTO region, and as such, is the designated recipient for Federal Transit Administration Funding. Fixed route service is provided within the City of Springfield seven days a week. City Utilities also offers paratransit service for those who cannot ride the fixed-route bus due to a disability or health condition. CU Transit operates both day and night routes, as well as on weekends and holidays. Routes and schedules may be found at <http://www.cityutilities.net/transit/transit.htm>.

Beyond operating the transit system, City Utilities has partnered with the City of Springfield to build sidewalks along bus routes and to construct ADA accessible bus stops. Using their Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) and formerly New Freedom funding, this partnership has allowed for improved access along several major routes and near critical facilities.

### MISSOURI STATE UNIVERSITY

Missouri State University contracts with a private provider for regular shuttle service in and around the MSU campus. This service is available to the public at no charge. The MSU routes run days and evenings, with limited service when school is not in session. MSU has multiple multi-modal parking facilities and transfer stations located across campus. The shuttle connects with downtown Springfield to service the University's expansion.

### HUMAN SERVICE TRANSPORTATION PROVIDERS

Numerous agencies provide additional human-service transportation throughout the region. Some serve only their specific clients, and others, like OATS, Inc., provide demand-response service for the disabled and elderly in Springfield, and the general public in Christian and Greene Counties.

### INTERCITY SURFACE TRANSPORTATION

The OTO region is currently served by two inter-city bus companies, Greyhound Lines, Inc., which serves over 2,400 destinations in North America and Jefferson Lines, which has stops in fourteen states and twenty stops in Missouri, including Springfield. There are 31 cities with Greyhound locations in Missouri, including Springfield, Kansas City, and St. Louis. Hollister, near Branson, is also served by Greyhound. The Greyhound bus station in Springfield is moving to the western edge of Springfield. Greyhound's service to Jefferson City, Kansas City, and St. Louis provides a connection to Amtrak service. Jefferson Lines uses the Greyhound station in Springfield as a stop. Southwest Missouri is not served by passenger train service.

## PROJECT PRIORITIZATION

The Transit section of the Transportation Improvement Program is intended to be a program of all federally- and state-funded transit projects.

## REVENUE SOURCES

A detailed discussion of the federal, state, and local revenue sources and amounts of available funding may be found in Section G: Fiscal Constraint of this document.

## 5307 URBANIZED AREA FORMULA PROGRAM

The purpose of the Urbanized Area Funding Program is to make Federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more that is designated by the U.S. Department of Commerce, Bureau of the Census.

## PROJECT SELECTION PROCEDURE

As the designated recipient for FTA Section 5307 funding, City Utilities Transit's responsibilities include allocating the relevant apportionment among recipients in the urbanized area, in coordination with OTO, and identifying and selecting the projects that OTO will include in this TIP.

If another public entity that is legally eligible under federal transit laws desires to use Section 5307 funding, OTO must be contacted to start the process of cooperatively determining funding eligibility. This can be done at any time by calling the OTO Executive Director at (417) 865-3042, extension 102. Until another entity is determined to be eligible for this funding, an application process is not required for City Utilities to select the projects that will use this funding.

## DIRECT RECIPIENT AND SUB-RECIPIENT ELIGIBILITY

FTA Circular 9030.1E, Chapter II, Section 8 defines direct recipient and sub-recipient eligibility, as well as outlines requirements that must be followed for Section 5307 funding to be used by an entity other than the designated recipient.

Essentially, the designated recipient may authorize a direct recipient to receive grants directly from FTA. The designated recipient must inform FTA of the arrangement in a "split letter," which establishes the allocation of Section 5307 funds in an urbanized area over 200,000 population. A public agency other than the designated recipient may apply for some or all of the 5307 apportionment if (1) the designated recipient authorizes the public agency to do so, (2) the public agency submits an independent grant application, and (3) the designated recipient and the public agency execute a supplemental agreement releasing the designated recipient of any liability. The amount of funds available to direct recipients is determined cooperatively by public transit providers, the OTO, and the designated recipient.

A section 5307 recipient, whether a designated or direct recipient, may choose to pass its grant funds to another entity or sub-recipient. A sub-recipient arrangement does not relieve the original recipient of its responsibilities to carry out the terms and conditions of the grant agreement. Eligible sub-recipients (1) are public entities otherwise eligible to become direct recipients or (2) may be private non-profit operators for purposes of carrying out eligible job access and reverse commute projects.

Official guidance on the Urbanized Area Formula Program can be found on the FTA website - <https://www.transit.dot.gov/regulations-and-guidance/fta-circulars/urbanized-area-formula-program-program-guidance-and>

## 5310 ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES

The Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities program provides grant funds to urbanized areas for public transportation and allows for investments in vehicles, capital projects, and operating assistance provided said investments are planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities.

FTA 5310 guidance requires a minimum of 55 percent of the apportionment to be allocated to capital purchases for human service agencies. OTO has decided to allocate 35 percent for capital and operations expenses and projects which go beyond the ADA, with the remaining 10 percent held for administration.

### PROJECT SELECTION PROCEDURE

Two documents govern the prioritization of Section 5310 projects. One is the Program Management Plan (PMP) and the other is the Transit Coordination Plan (TCP). The Transit Coordination Plan fulfills the requirement for a coordinated public transit human service transportation plan. This Plan identifies the transportation needs of individuals with disabilities, older adults, and people with low incomes, while providing strategies for meeting these needs and prioritizing transportation services for funding and implementation.

The Program Management Plan describes the process by which projects identified in the Transit Coordination Plan are selected for 5310 funding. The PMP addresses the program goals and objectives; roles and responsibilities of the OTO, City Utilities Transit, and MoDOT; the coordination of these activities; eligible sub-recipients; local share and local funding requirements; project selection criteria and the method for distributing funds; the development and approval of the annual program of projects; and other items related to the administration of Section 5310 funding.

The most recent Transit Coordination Plan was adopted by the OTO Board of Directors in June 2017. The Program Management Plan was most recently updated in February 2018. These documents do an excellent job of identifying projects and defining how they are prioritized.

To learn more, the PMP and TCP are both available on the OTO website at <http://www.ozarkstransportation.org>.

## 5339 BUS AND BUS FACILITIES

The Bus and Bus Facility (5339) program provides grant funds to urbanized areas for public transportation and allows investments in capital projects to replace, rehabilitate and purchase buses, vans, and related equipment, and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Funding is provided through formula allocations and competitive grants. OTO is supportive of local applications for the federal competitive grant program.

## PROJECT SELECTION PROCEDURE

---

If another public entity that is legally eligible under federal transit laws desires to use Section 5339 funding, OTO must be contacted to start the process of cooperatively determining funding eligibility. This can be done at any time by calling the OTO Executive Director at (417) 865-3042, extension 102. Until another entity is determined to be eligible for this funding, an application process is not required for City Utilities to select the projects that will use this funding.

## DIRECT RECIPIENT AND SUB-RECIPIENT ELIGIBILITY

---

Per the FTA website, “eligible recipients include designated recipients that operate fixed route bus service or that allocate funding to fixed route bus operators; and State or local governmental entities that operate fixed route bus service that are eligible to receive direct grants under 5307 and 5311.” Also per the FTA website, a subrecipient is “an eligible recipient that receives a grant under the formula or discretionary programs may allocate amounts from the grant to subrecipients that are public agencies or private nonprofit organizations engaged in public transportation.”

# Project Overview

# FISCAL CONSTRAINT

## SECTION G

EXPLANATION OF FISCAL CONSTRAINT

OPERATIONS AND MAINTENANCE

DEMONSTRATION OF FISCAL CONSTRAINT

FINANCIAL SUMMARIES

## REVENUE

### STATE AND FEDERAL SOURCES

In order to determine the adequacy of funding for projects that will be undertaken within the four-year Transportation Improvement Program period, the Ozarks Transportation Organization relies upon the expertise of the Federal Highway Administration, Federal Transit Administration, Missouri Department of Transportation, and the OTO member jurisdictions.

On November 15, 2021, President Biden signed into law the Infrastructure Investment and Jobs Act (IIJA), which authorizes the federal surface transportation program for highways, highway safety, transit, freight, ports and rail through 2026. According to the MoDOT Statewide Transportation Improvement Program, it is estimated that the IIJA Act will provide 26 percent more federal funds to Missouri, annually.

### MODOT

MoDOT combines Federal Highway and Transit Administrations funding estimates with state transportation revenue projections to estimate funding for transportation improvements and includes them in the Statewide Transportation Improvement Program (STIP). OTO uses these projections in determining fiscal constraint.

About 73 percent of every dollar MoDOT receives comes from fuel taxes. The federal motor fuel tax has not changed since 1993. The state motor fuel tax was increased from 17 cents to 19.5 cents per gallon on October 1, 2021. The last increase was in 1996. The Governor and General Assembly passed Senate Bill 262, which raises Missouri's motor fuel tax an additional 2.5 cents per year for the next five years, when it will be 29.5 cents per gallon and is estimated to generate an additional \$500 million in annual revenue.

In the past 10 years, MoDOT has completed 4,300 projects, worth \$10.9 billion, at 6.4 percent under budget. Even with significant savings undertaken since 2011, MoDOT's 2022-2026 STIP is primarily maintenance focused. Currently, annual contractor awards average approximately \$1.5 billion, with nearly 74 percent aimed at meeting asset management goals.

Funding for the Missouri Department of Transportation consists of both federal and state revenue, as well as proceeds received from the sale of bonds.

#### *Federal Fuel Tax*

The largest source of transportation revenue for MoDOT is from the federal government and includes the 18.4-cents per gallon tax on gasoline and 24.4-cents per gallon tax on diesel fuel. Other sources include various taxes on tire, truck, and trailer sales, as well as heavy vehicle use. These highway user fees are deposited in the federal Highway Trust Fund and distributed to the states based on formulae prescribed by federal law through transportation funding acts. This revenue source also includes multi-modal and highway safety grants, as well as COVID-19 Relief Fund allocations. Approximately 44 percent of Missouri's transportation revenue comes from the federal government.

#### *State Fuel Tax*

The next largest source of MoDOT's transportation revenue is from the state fuel tax. Fuel taxes represent the state share of revenue received from the State's 19.5 cent per gallon tax on gasoline and diesel fuels which must

be spent on highways and bridges. These tax revenues provide approximately 27 percent of transportation revenues.

#### *Motor Vehicle Fees*

MoDOT receives a portion of the state sales and use taxes paid upon the purchase or lease of motor vehicles. This revenue source also includes the sales tax paid on aviation fuel, which is dedicated to airport projects. These taxes provide approximately 13 percent of transportation revenues. In November 2004, Missouri voters passed Constitutional Amendment 3, which set in motion a four-year phase-in redirecting motor vehicle sales taxes previously deposited in the State's general revenue fund to a newly-created State Road Bond Fund. In state fiscal year 2009, the process of redirecting motor vehicle sales taxes to transportation was fully phased in and the rate of growth in this revenue source has slowed. In July 2013, the state legislature eliminated the state motor vehicle use tax and replaced it with the state motor vehicle sales tax, which directs a greater portion to local government agencies.

#### *Vehicle and Driver Licensing Fees*

Vehicle and driver licensing fees include the state share of revenue received from licensing motor vehicles and drivers. This revenue source also includes fees for railroad regulation which are dedicated to multi-modal programs. These fees provide approximately 10 percent of transportation revenues MoDOT's transportation revenue. Similar to the motor fuel tax, the motor vehicle and driver licensing fees are not indexed to keep pace with inflation and there have been no annual registration fee increases since 1984.

#### *Interest*

The interest earned on invested funds and other miscellaneous collections provides approximately 4 percent of transportation revenues. Cash balances in all funds for roads and bridges are declining. The cash balance of all funds for roads and bridges is expected to decline from \$1,233 million at the beginning of fiscal year 2023 to approximately \$520 million by the end of fiscal year 2027. Other miscellaneous collections include construction cost reimbursements from local governments and other states, proceeds from the sale of surplus property and fees associated with the Missouri logo-signing program.

#### *State General Revenue Fund*

The State General Revenue Fund for the Governor's Transportation Cost Share Program, Governor's Focus on Bridges' debt service payments, and multimodal programs provides about 2 percent of transportation revenue.

## FEDERAL-STATEWIDE

---

MoDOT receives federal funding that can be spent within the OTO region. A statewide funding distribution formula, which uses population numbers, distributes this funding around the state.

#### *National Highway Performance Program*

The NHPP provides support for the condition and performance of the National Highway System (NHS), for construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

#### *Statewide Surface Transportation Block Grant Program (STBG)*

A long standing funding program, the Surface Transportation Block Grant Program is one of the most flexible funding sources available among Federal-aid highway funding programs. STBG promotes flexibility in state and local transportation decisions and provides flexible funding to best address state and local transportation needs.

Missouri's required set-aside for pedestrian and bicycle activities has traditionally gone toward the implementation of the State ADA Transition Plan.

#### *Highway Infrastructure Program (HIP)*

The Highway Infrastructure Program may annually provide funding through the appropriations process, which is suballocated to the OTO region. Eligible projects have varied slightly from year to year, but are generally limited to construction of highways, bridges, and tunnels. For FY 2019, the elimination of hazards and the installation of protective devices at railway-highway crossing was also an eligible activity.

#### *Highway Safety Improvement Program*

The Highway Safety Improvement Program requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance, achieving a significant reduction in traffic fatalities and serious injuries on all public roads.

#### *Open Container Penalty Transfer*

The Open Container Transfer Provision requires states to enact and enforce a law that prohibits the possession of any open alcohol beverage container, or the consumption of any alcoholic beverage, in the passenger area of any motor vehicle located on a public highway, or the right-of-way of a public highway, in the states. States, like Missouri, which fail to comply with these minimum requirements have a portion of their highway funds transferred into the State and Community Highway Safety Grant Program. This money may further be transferred into the State's Highway Safety Improvement Program.

Funding from this program has allowed Missouri to reduce cross-median fatalities on many of the interstates with the installation of median guard cable and other safety improvements. This funding source will continue to be used on safety initiatives that are focused on reducing problem crash types that are identified in Missouri's Blueprint for Safety.

#### *Statewide Transportation Alternatives Program (STAP)*

This is the statewide allocation of the STBG set-aside program for transportation alternatives. MoDOT has committed half of this funding to addressing ADA transition plan compliance.

## FEDERAL – SPECIAL PROGRAMS

---

The FAST Act established, replaced, or continued several "special programs" that are unique compared to traditional federal funding. Several COVID-19 Relief bills have also provided funding to MoDOT and Missouri MPOs.

#### *Disadvantaged Business Enterprise Program*

The FAST Act provides funding for Disadvantaged Business Enterprise programs. Missouri receives approximately \$300,000 annually for this program.

#### *On the Job Training Program*

The FAST Act provides funding for On the Job Training activities. Missouri receives approximately \$200,000 annually for this program.

#### *Non-State System Bridge Inspection Program*

Federal law mandates that bridges must be inspected on a periodic basis. Missouri uses approximately \$1 million of Surface Transportation Block Grant funds annually for non-state system bridge inspections.

#### *State System Bridge Inspection Program*

Federal law mandates that bridges must be inspected on a periodic basis. Missouri uses approximately \$3 million in performance of these inspections on the state system.

#### *Preventive Maintenance Program*

Missouri continues to work with the Federal Highway Administration (FHWA) to expand federal funding of preventive maintenance efforts for qualifying work. These efforts will include both contract and in-house efforts which are deemed preventive maintenance or have other specific approval by FHWA. Missouri typically spends between \$100 to \$150 million per year on preventive maintenance activities. Activities currently pursued include: striping, Intelligent Transportation Systems (ITS) maintenance, pavement repair or overlays, pavement surface treatments or surface seals, crack sealing, bridge maintenance, and drainage maintenance. MoDOT is also working on future activities to include: sign maintenance, signal maintenance, and highway lighting.

#### *Eligible Operating Costs Program*

Missouri is working with FHWA to expand federal reimbursement to eligible operating expenses of the state's transportation system. Certain components of the system require ongoing operating costs to provide continuous operation. Missouri typically spends between \$5 and \$10 million per year on operating costs related to traffic signals, highway lighting, and ITS. Operating costs include utilities, labor, administrative costs, and system maintenance costs.

#### *Prioritization of Projects to Improve Freight Movement Program*

Efficient movement of freight is critical to the economy, jobs and quality of life in Missouri. Freight movement is completely dependent on the reliability, condition, and safety of the transportation system. FAST created a new federal funding category, the National Highway Freight Program, for projects that improve the efficient movement of freight. These projects implement the strategies identified in the Missouri Freight Plan. Activities include replacement of load-posted bridges, technology to improve the flow of freight, truck parking facilities, and geometric improvements to interchanges and ramps. These projects are included in the STIP and also identified in the Missouri Freight Plan Appendix G.

#### *Better Utilizing Investments to Leverage Development (BUILD) Grant*

The BUILD program provides dedicated, discretionary federal funding to invest in road, rail, transit and port projects that promise to achieve national objectives. Previously known as Transportation Investment Generating Economic Recovery, or TIGER Discretionary Grants, Congress has dedicated nearly \$7.1 billion for ten rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact.

#### *Infrastructure for Rebuilding America (INFRA) Grant Program*

The INFRA program provides dedicated, discretionary federal funding for projects that address critical issues facing our nation's highways and bridges. INFRA advances a pre-existing grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. Additionally, the program promotes innovative safety solutions that will improve our transportation system. Grants are awarded by the USDOT through a competitive application process.

#### *Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Discretionary Grant Program*

This program provides a unique opportunity for the DOT to invest in road, rail, transit and port projects that promise to achieve national objectives. Previously known as BUILD and TIGER Discretionary Grants, Congress has dedicated nearly \$8.9 billion for twelve rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact. The eligibility requirements of RAISE allow project sponsors at the State and

local levels to obtain funding for multi-modal, multi-jurisdictional projects that are more difficult to support through traditional DOT programs.

#### *Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA)*

On December 27, 2020, the Coronavirus Response and Relief Supplemental Appropriations Act of 2021 (CRRSAA), which includes \$900 billion in supplemental appropriations for COVID-19 relief, was signed into law. This funding includes \$50 million nationally for Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310 formula grants). In Missouri, MoDOT will fully administer the Federal Transit Administration (FTA) Section 5310 program in rural areas (populations less than 50,000) and in small urbanized areas (Columbia, St. Joseph, Joplin, Jefferson City, Cape Girardeau, and Lee's Summit). CRRSAA Section 5310 funding is available for operating assistance at 100% federal share for agencies serving older adults and persons with disabilities. The CRRSAA Section 5310 apportionment for Missouri small urbanized areas is \$141,054 and for Missouri rural areas is \$307,545. St. Louis and Springfield FTA Section 5310 funds are \$352,003 and \$50,792, respectively. The Kansas City Section 5310 allocation of \$231,773 will not be administered by MoDOT.

HIP-CRRSAA funds are eligible to be used for activities eligible under 23 U.S.C. 133(b) (Surface Transportation Block Grant Program (STBG)) and costs related to preventive maintenance, routine maintenance, operations, personnel, including salaries of employees (including those employees who have been placed on administrative leave) or contractors, debt service payments, availability payments, and coverage for other revenue losses. The distribution for Missouri is \$234.8 million with \$206.3 million for any area of the state and \$28.5 million for urbanized areas with a population over 200,000.

#### *American Rescue Plan Act of 2021*

The \$1.9 trillion American Rescue Plan Act of 2021 was signed into law on March 11, 2021. The bill includes \$30.5 billion for the transit industry. This bill delivers \$50,792 in Section 5310 for the Springfield Urbanized Area.

#### *Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program*

The PROTECT Program provides dedicated, formula, and discretionary federal funding to invest in planning, resilience improvements, community resilience and evacuation routes, and at-risk coastal infrastructure.

#### *Charging and Fueling Infrastructure Program*

The Charging and Fueling Infrastructure Program provides dedicated, discretionary federal funds to invest in deploying electric vehicle (EV) charging and hydrogen/propane/natural gas fueling infrastructure along designated alternative fuel corridors and in communities.

#### *National Electric Vehicle Program*

The National Electric Vehicle Program provides dedicated, formula, and discretionary funds to invest in deploying electric vehicle (EV) charging infrastructure and establish an interconnected network to facilitate data collection, access, and reliability.

#### *Reconnecting Communities Pilot Program*

The Reconnecting Communities Pilot Program provides dedicated, discretionary federal funds to invest in restoring community connectivity by removing, retrofitting, or mitigating highways or other transportation facilities that create barriers to community connectivity, including mobility, access, or economic development.

## FEDERAL— REGIONAL SUBALLOCATED

---

The Ozarks Transportation Organization is responsible for selecting projects within three federal revenue categories. This means that OTO is responsible for project selection, programming, reasonable progress, and the maintenance of fund balances for STP-Urban, On-System Bridge (BRM), and Transportation Alternative Program funding categories. These fund balances are shown below.

OTO has been receiving sub-allocated Federal Aid Highway Program (FAHP) funding since 2003. OTO has accumulated a balance of previously allocated, but unprogrammed, FAHP funding, referred to as “Carryover Balance” in Table H.2. OTO has elected to maintain a healthy reserve of sub-allocated STP-Urban funding in order to be able to fund larger regionally significant projects, hence the larger carryover balance shown.

#### *STBG-Urban*

STBG-Urban funding is a subcategory of the Surface Transportation Program consisting of funding that is directly suballocated to metropolitan planning areas with urbanized area populations over 200,000. The federal share for this funding is generally 80 percent, with some specific exceptions for certain Interstate and Safety projects. A variety of activities are eligible under this funding category provided the funding is spent on roads federally functionally classified as collector or higher, excepting bridges not on federal-aid highways and carpool, biking, pedestrian walkway improvements and other transportation alternatives also not on federal-aid highways.

#### *Highway Infrastructure Program*

Funding for the Highway Infrastructure Program has been provided in the FY 2018, FY 2019, FY 2020, and FY 2021 Appropriations bills. A portion of this funding is suballocated to urbanized areas over 200,000 population and is specifically for those projects defined in Section 133 (b)(1)(A) of Title 23, U.S.C., such as the construction of highways, bridges, tunnels, including designated routes of the Appalachian development highway system and local access roads under Section 14501 of Title 40, U.S.C.

#### *Bridge Formula Program*

The BFP, created in IIJA, funds the replacement, rehabilitation, preservation, protection and construction of bridges on public roads. This bill requires 15 percent of funding be spent on off-system structures with the focus being on structures that are in poor condition.

#### *STBG-Set Aside (formerly TAP)*

The STBG-Set Aside program encompasses all previously eligible projects under the former Transportation Alternatives Program. It encompasses Enhancements, Recreational Trails, and Safe Routes to School. Throughout OTO planning documents, this funding is still referred to as TAP funding.

#### *Carbon Reduction Program*

This program funds projects that reduce transportation emissions. Eligible projects include the establishment and operation of traffic monitoring, management and control facilities or programs, advanced transportation and congestion management technologies, deployment of infrastructure-based intelligent transportation systems capital improvements.

## LOCAL SOURCES

Most of the transportation revenue for local agencies is received through sales taxes. Many communities have a sales tax dedicated to transportation. Local jurisdictions can choose to fund projects and maintenance from a wide array of funding sources which are also described herein.

#### *Sales Tax*

The Cities of Battlefield, Nixa, Ozark, Republic, and Springfield all have voter-approved transportation sales taxes. Battlefield, Nixa, and Republic each have a 1/2-cent transportation sales tax and Springfield's tax is 1/8-cent. In April 2017, the City of Ozark adopted a 3/8 of one-cent transportation sales tax. Other jurisdictions do not have a transportation sales tax in place but could elect to enact one. Springfield also has a 1/4-cent capital improvements tax, a portion of which goes toward transportation improvements. Willard recently approved a 1/2-cent capital improvements tax which may also be used on transportation projects within the City. Christian and Greene Counties both have sales taxes that can be used for transportation as well. Greene County levies a 1/2-cent sales tax, half of which is dedicated to the road and bridge fund. Christian County levies two 1/2-cent sales taxes, one of which goes to the County for County road operations and projects, and the remaining is distributed to road projects throughout the County based on need.

#### *Development Agreements*

A city or county may enter into agreements with developers to fund capital improvements with tax revenues generated by the new development. Typically, the developer builds the improvement and is reimbursed by utilizing up to 50 percent of the sales tax generated by the business activity. Projects are usually funded up to a set amount, plus interest, and paid back over three to five years.

#### *Missouri Transportation Finance Corporation*

The Missouri Transportation Finance Corporation (MTFC) is financed by federal highway funds, transit funds, and state and local matching funds. The Corporation may loan money to finance projects or provide collateral to gain favorable financing elsewhere. A local corporation is usually established to participate in the funding. The funds available under the MTFC are available throughout the State of Missouri and are applied for competitively. The funds are paid back to the Corporation following the construction of projects. These funds will rollover and subsequent projects will not have the federal requirements associated with the project. Based on the competitive nature of securing Corporation funding, this funding mechanism is not included in the Feasible Funding Sources section.

#### *Neighborhood Improvement District (or Community Improvement District)*

State law authorizes cities and counties to establish Neighborhood Improvement Districts (NIDs) and Community Improvement Districts (CIDs) for the purpose of improving public infrastructure. Once established, the jurisdiction may issue temporary notes and long-term general obligation (GO) bonds (up to 20 years) to pay for improvements. Bonds are repaid through a special assessment on the properties within the district. NIDs and CIDs require the support of a majority of the property owners within the district and City Council or County Commission approval.

#### *Railroad and Public Utility Tax*

The Railroad and Public Utility Tax is paid by railroads and public utilities to Greene County.

#### *County Funding Sources*

The majority of funding for Christian and Greene County projects which appear in the TIP is sourced from STBG-U and BRO funding, while local matching funds are derived from state revenue first, then local revenues.

#### *Property Tax*

Greene County levies just over eleven cents per \$100 assessed valuation for both real and personal property for the road and bridge fund.

## TRANSIT SOURCES

### *Section 5307 Urbanized Area Formula Program*

The Urbanized Area Formula Grants (Section 5307) program provides grants to urbanized areas for public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances, areas which operate a maximum of 100 buses in fixed-route service during peak hours.

### *Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities*

The Enhanced Mobility of Seniors and Individuals with Disabilities Grants (Section 5310) program is intended to enhance mobility for seniors and persons with disabilities by providing funds to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

### *Section 5339 Bus and Bus Facilities*

The Bus and Bus Facilities Grants (Section 5339) program provides capital funding to replace, rehabilitate, and purchase buses and related equipment and to construct bus-related facilities

### *MO HealthNet*

City Utilities Transit contracts with the Missouri Department of Social Services each fiscal year for 50 percent of the per trip cost to provide Missouri HealthNet (Medicaid) transportation trips to eligible paratransit passengers.

### *State Operating Funding*

Each year, transit agencies around the state receive a distribution of Missouri General Revenue for operating assistance. This amount of funding has decreased substantially from the original application to the present day. This funding varies from year to year depending upon the State of Missouri budget.

### *Farebox*

City Utilities receives funding through bus passenger farebox revenue from the sales of bus passes and the cash farebox deposits.

### *Advertising*

City Utilities Transit receives over \$100,000 per year on their transit advertising contract. Advertisements are sold on buses, inside the fixed route buses, bus shelters with ad panels, and bus benches.

### *Utility Ratepayers*

The City Utilities Customers for Electric, Gas, Water, and SpringNet provide the local match for public transportation in Springfield, Missouri. The net amount absorbed by the Utility customers varies from year to year based on the amount of budgeted expenditures for operations, maintenance, and capital expenditures.

### *Human Service Providers*

FTA Section 5310 funding is competitively awarded on a regular basis to area Human Service Transportation providers. The 5310 awards are administered by MoDOT as set forth in an MOU and the Program Management Plan. The responsibility is on MoDOT to confirm financial capacity in administering these projects. As part of the application process and in executing vehicle purchase agreements with MoDOT, awardees are required to demonstrate financial capacity for both the match and the maintenance of any vehicle purchased. Sources for this funding depends upon the agency, but projects are not awarded to those agencies who cannot provide the requisite match.

## PROJECTED REVENUES

In an effort to demonstrate that the local jurisdictions and agencies are able to fund the projects programmed in the TIP, in addition to maintaining the federal aid system, revenue estimates are shown in the financial tables at the conclusion of this section. The TIP financial element is consistent with the OTO Long Range Transportation Plan.

## OPERATIONS AND MAINTENANCE

### ROADWAYS

#### MODOT

Maintenance costs include MoDOT's salaries, materials and equipment needed to deliver the roadway and bridge maintenance programs. This category includes basic maintenance activities like minor surface treatments such as: sealing, small concrete repairs and pothole patching; mowing right of way; snow removal; replacing signs; striping; repairing guardrail; and repairing traffic signals. Performing these activities requires employees; vehicles and other machinery; and materials such as salt, asphalt and fuel. Maintenance operations expenditures are expected to increase 1.8 percent annually. In fiscal year 2019, MoDOT is budgeting for \$503,302,000 in maintenance expenditures that would grow to \$534,108,000 at the end of fiscal year 2023.

Calculations are \$410,325,110/ 77,553\*\* lane miles of roadway.

\*Source: Fiscal Year 2022 Budget Approved

\*\* Source: Official 2020 State System Mileage

This would make MoDOT's cost \$5,291 per lane mile.

#### Assumptions (dollars in thousands)

Maintenance Operations*	\$377,892,474
Fleet Investments*	\$32,432,636
<b>Total</b>	<b>\$410,325,110</b>

## LOCAL JURISDICTIONS

---

There are long standing local funding sources to accomplish the goals and objectives of local, state, and federal transportation programs. Local sponsors use a myriad of local revenues to not only operate and maintain the federally eligible system, but also to match federal funds for projects on it. Revenues to fund operations and maintenance, local match on federal projects or non-federal, regionally significant local projects, come from the cities and counties sponsoring the projects. Those sources include the following:

**City and County Distributions (CART Funds):** These funds are a combination of Motor Fuel Tax, Vehicle Sales Tax and Vehicle Fees. These funds are distributed from MoDOT revenues to the Cities and Counties through the Department of Revenue. For most instances, these funds fully support the maintenance and operation cost for federally eligible facilities.

**Other Committed Funds:** Other committed funds are non-federal funds composed of remaining CART funds from previous year distributions, local transportation taxes, grant funds, general revenues and special use initiative funds. These funds are used when total program commitments exceed the available CART funds. When a local sponsor wants to program a project, they commit to providing the non-federal local match in excess of the CART funds through these sources. Each jurisdiction has provided the annual maintenance costs for roadways per lane mile. These costs were then divided into the total number of lane miles and multiplied by the federal-aid highway miles. MoDOT's 1.8 percent inflation factor was used for all of these costs.

Local Public Agency Capacity regarding operations and maintenance is shown in the financial tables at the conclusion of this section.

## TRANSIT

Transit operations and maintenance include the costs to operate the bus system and to maintain buses, shelters, and other capital equipment. Funding is currently provided by federal, state, and local sources. FTA Section 5307 funds provide partial funding for operations and maintenance. Legislation allows for the continuation of partial Section 5307 funding for the operations of transit systems for population areas exceeding 200,000. Therefore, OTO is continuing to fund the operations of the City Utilities bus system with Section 5307 funds. Inflation rates for 5307 funding are about 2 percent over the timeline of the TIP, per BIL funding levels. Inflation rates for City Utilities provided funding averages about 2.4 percent annually, however different line items may vary in their inflation rates and additional costs related to capital purchases are also considered when estimating the funding projections in the out years.

City Utilities' capacity regarding operations and maintenance is shown in the financial tables at the conclusion of this section.

## FISCAL CAPACITY

### PROJECT COST ESTIMATING

Revenue estimates for federal and state funding were taken directly from MoDOT. More information can be found in the 2023-2027 STIP. Revenue estimates for local funding were not inflated based on the recent lack of growth in sales tax, property tax, and motor fuel taxes.

### INFLATION

Each project has inflation built in at a rate of three percent per year. This baseline inflation rate was utilized based on recommendations from MoDOT, who incorporates this three percent inflation rate into the STIP. According to the United States Department of Labor's Bureau of Labor Statistics, the average annual inflation rate over the past 20 years is currently 2.3 percent, but in recent years has been just over 3 percent, with the last twelve months between 4 and 6 percent. Current costs are reflected in cost estimates.

### ADVANCE CONSTRUCTION

MoDOT uses a federal funding tool called advance construction to maximize the receipt of federal funds and provide greater flexibility/efficiency in matching federal-aid categories to individual projects. Advance Construction (AC) is an innovative finance funding technique, which allows states to initiate a project using non-federal funds, while preserving eligibility for future federal-aid. Eligibility means the Federal Highway Administration (FHWA) has determined the project qualifies for federal-aid; however, no present or future federal-aid is committed to the project. States may convert the project to regular federal-aid provided federal-aid is available for the project. AC does not provide additional federal funding, but simply changes the timing of receipts by allowing states to construct projects with state or local money and then later seek federal-aid reimbursement.

MoDOT began using AC in 1992 and will continue to use it in future years. MoDOT utilizes AC for National Highway Performance Program (NHPP) and Surface Transportation Block Program (STBG) projects or when sufficient obligation limitation is not available. State funds pay for new AC project expenditures until federal-aid is available. The oldest projects are converted first, if possible, to maximize federal-aid reimbursement.

## TRANSIT 5310 PROGRAM OF PROJECTS

FTA Section 5310 funding is allocated annually, with 55 percent required to be used for traditional elderly and disabled transportation projects. MoDOT administers the traditional projects for the OTO region. The following pages outline the use of this funding from FY 2018 through FY 2026 as previously and currently programmed.

Traditional Section 5310							
Program of Projects and Subrecipients	Project Description	Quantity	Funding Year	Status	FTA Amount	Local Amount	Total Amount

## FIXING AMERICA'S SURFACE TRANSPORTATION ACT

### TITLE 23, CHAPTER I – FEDERAL AID HIGHWAYS

#### §134 METROPOLITAN TRANSPORTATION PLANNING

##### (h) - Scope of Planning Process

- (1) In general – The metropolitan planning process for a metropolitan planning area under this section shall provide for consideration of projects and strategies that will:
  - (A) support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
  - (B) increase the safety of the transportation system for motorized and non-motorized users;
  - (C) increase the security of the transportation system for motorized and non-motorized users;
  - (D) increase the accessibility and mobility of people and for freight;
  - (E) protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
  - (F) enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
  - (G) promote efficient system management and operation;
  - (H) emphasize the preservation of the existing transportation system;
  - (I) improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
  - (J) enhance travel and tourism.
- (2) Performance-based approach
  - (A) In general – The metropolitan transportation planning process shall provide for the establishment and use of a performance-based approach to transportation decisionmaking to support the national goals described in 150(b) of this title and the general purposes described in section 5301 of title 49.
  - (B) Performance targets –
    - (i) Surface transportation performance targets –
      - (I) In general – Each metropolitan planning organization shall establish performance targets that address the performance measures described in section 150(c), where applicable, to use in tracking progress towards attainment of critical outcomes for the region of the metropolitan planning organization.
      - (II) Coordination – Selection of performance targets by a metropolitan planning organization shall be coordinated with the relevant State to ensure consistency, to the maximum extent practicable.
    - (ii) Public transportation performance targets – Selection of performance targets by a metropolitan planning organization shall be coordinated, to the maximum extent

practicable, with providers of public transportation to ensure consistency with sections 5326(c) and 5329(d) of title 49.

- (C) Timing – Each metropolitan planning organization shall establish the performance targets under subparagraph (B) not later than 180 days after the date on which the relevant State or provider of public transportation establishes the performance targets.
  - (D) Integration of other performance-based plans – A metropolitan planning organization shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under Chapter 53 of title 49 by providers of public transportation, required as part of a performance-based program.
- (3) Failure to consider factors – The failure to consider any factor specified in paragraphs (1) and (2) shall not be reviewable by any court under this title or chapter 53 of title 49, subchapter II of chapter 5 of title 5, or chapter 7 of title 5 in any matter affecting a transportation plan, a TIP, a project or strategy, or the certification of a planning process.

## TIP REQUIREMENTS FOR TMAs IN ATTAINMENT

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) requirements for producing a Transportation Improvement Program (TIP) by the Metropolitan Planning Organization (MPO) for a metropolitan area comes from the Final Rule regarding Metropolitan Transportation Planning dated May 27, 2016. Pertinent Sections include: 23 CFR parts 450 and 500, as well as 49 CFR part 613.

### § 450.326 DEVELOPMENT AND CONTENT OF THE TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

- (a) The MPO, in cooperation with the State(s) and any affected public transportation operator(s), shall develop a TIP for the MPA. If more than one MPO has been designated to serve an MPA, those MPOs within the MPA shall jointly develop a single TIP for the MPA. The TIP shall reflect the investment priorities established in the current metropolitan transportation plan and shall cover a period of no less than 4 years, be updated at least every 4 years, and be approved by the MPO(s) and the Governor(s). However, if the TIP covers more than 4 years, the FHWA and the FTA will consider the projects in the additional years as informational. The MPO(s) may update the TIP more frequently, but the cycle for updating the TIP must be compatible with the STIP development and approval process. The TIP expires when the FHWA/FTA approval of the STIP expires. Copies of any updated or revised TIPs must be provided to the FHWA and the FTA. In nonattainment and maintenance areas subject to transportation conformity requirements, the FHWA and the FTA, as well as the MPO(s), must make a conformity determination on any updated or amended TIP, in accordance with the Clean Air Act requirements and the EPA's transportation conformity regulations (40 CFR part 93, subpart A).
- (b) The MPO(s) shall provide all interested parties with a reasonable opportunity to comment on the proposed TIP as required by §450.316(a). In addition, in nonattainment area TMAs, the MPO(s) shall provide at least one formal public meeting during the TIP development process, which should be addressed through the participation plan described in §450.316(a). In addition, the MPO(s) shall publish or otherwise make readily available the TIP for public review, including (to the maximum extent practicable) in electronically accessible formats and means, such as the World Wide Web, as described in §450.316(a).
- (c) The TIP shall be designed such that once implemented, it makes progress toward achieving the performance targets established under §450.306(d).

- (d) The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.
- (e) The TIP shall include capital and non-capital surface transportation projects (or phases of projects) within the boundaries of the metropolitan planning area proposed for funding under 23 U.S.C. and 49 U.S.C. Chapter 53 (including transportation alternatives; associated transit improvements; Tribal Transportation Program, Federal Lands Transportation Program, and Federal Lands Access Program projects; HSIP projects; trails projects; accessible pedestrian walkways; and bicycle facilities), except the following that may be included:
  - (1) Safety projects funded under 23 U.S.C. 402 and 49 U.S.C. 31102;
  - (2) Metropolitan planning projects funded under 23 U.S.C. 104(d), and 49 U.S.C. 5305(d);
  - (3) State planning and research projects funded under 23 U.S.C. 505 and 49 U.S.C. 5305(e);
  - (4) At the discretion of the State and MPO, metropolitan planning projects funded with Surface Transportation Program funds;
  - (5) Emergency relief projects (except those involving substantial functional, locational, or capacity changes);
  - (6) National planning and research projects funded under 49 U.S.C. 5314; and
  - (7) Project management oversight projects funded under 49 U.S.C. 5327.
- (f) The TIP shall contain all regionally significant projects requiring an action by the FHWA or the FTA whether or not the projects are to be funded under title 23 U.S.C. Chapters 1 and 2 or title 49 U.S.C. Chapter 53 (e.g., addition of an interchange to the Interstate System with State, local, and/or private funds and congressionally designated projects not funded under 23 U.S.C. or 49 U.S.C. Chapter 53). For public information and conformity purposes, the TIP shall include all regionally significant projects proposed to be funded with Federal funds other than those administered by the FHWA or the FTA, as well as all regionally significant projects to be funded with non-Federal funds.
- (g) The TIP shall include, for each project or phase (e.g., preliminary engineering, environment/NEPA, right-of-way, design, or construction), the following:
  - (1) Sufficient descriptive material (i.e., type of work, termini, and length) to identify the project or phase;
  - (2) Estimated total project cost, which may extend beyond the 4 years of the TIP;
  - (3) The amount of Federal funds proposed to be obligated during each program year for the project or phase (for the first year, this includes the proposed category of Federal funds and source(s) of non-Federal funds. For the second, third, and fourth years, this includes the likely category or possible categories of Federal funds and sources of non-Federal funds);
  - (4) Identification of the agencies responsible for carrying out the project or phase;
  - (5) In nonattainment and maintenance areas, identification of those projects that are identified as TCMs in the applicable SIP;
  - (6) In nonattainment and maintenance areas, included projects shall be specified in sufficient detail (design concept and scope) for air quality analysis in accordance with the EPA transportation conformity regulations (40 CFR part 93, subpart A); and
  - (7) In areas with Americans with Disabilities Act required paratransit and key station plans, identification of those projects that will implement these plans.
- (h) Projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type, and/or geographic area using the applicable classifications under 23 CFR 771.117(c) and (d) and/or 40 CFR part 93. In nonattainment and maintenance areas, project classifications must be consistent with the “exempt project” classifications contained in the EPA transportation conformity regulations (40 CFR part 93, subpart A). In addition, projects proposed for funding under title 23 U.S.C. Chapter 2 that are not regionally significant may be grouped in one line item or identified individually in the TIP.
- (i) Each project or project phase included in the TIP shall be consistent with the approved metropolitan transportation plan.

- (j) The TIP shall include a financial plan that demonstrates how the approved TIP can be implemented, indicates resources from public and private sources that are reasonably expected to be made available to carry out the TIP, and recommends any additional financing strategies for needed projects and programs. In developing the TIP, the MPO(s), State(s), and public transportation operator(s) shall cooperatively develop estimates of funds that are reasonably expected to be available to support TIP implementation in accordance with §450.314(a). Only projects for which construction or operating funds can reasonably be expected to be available may be included. In the case of new funding sources, strategies for ensuring their availability shall be identified. In developing the financial plan, the MPO(s) shall take into account all projects and strategies funded under title 23 U.S.C., title 49 U.S.C. Chapter 53, and other Federal funds; and regionally significant projects that are not federally funded. For purposes of transportation operations and maintenance, the financial plan shall contain system-level estimates of costs and revenue sources that are reasonably expected to be available to adequately operate and maintain Federal-aid highways (as defined by 23 U.S.C. 101(a)(6)) and public transportation (as defined by title 49 U.S.C. Chapter 53). In addition, for illustrative purposes, the financial plan may include additional projects that would be included in the TIP if reasonable additional resources beyond those identified in the financial plan were to become available. Revenue and cost estimates for the TIP must use an inflation rate(s) to reflect “year of expenditure dollars,” based on reasonable financial principles and information, developed cooperatively by the MPO(s), State(s), and public transportation operator(s).
- (k) The TIP shall include a project, or a phase of a project, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project. In nonattainment and maintenance areas, projects included in the first 2 years of the TIP shall be limited to those for which funds are available or committed. For the TIP, financial constraint shall be demonstrated and maintained by year and shall include sufficient financial information to demonstrate which projects are to be implemented using current and/or reasonably available revenues, while federally supported facilities are being adequately operated and maintained. In the case of proposed funding sources, strategies for ensuring their availability shall be identified in the financial plan consistent with paragraph (h) of this section. In nonattainment and maintenance areas, the TIP shall give priority to eligible TCMs identified in the approved SIP in accordance with the EPA transportation conformity regulations (40 CFR part 93, subpart A) and shall provide for their timely implementation.
- (l) In cases that the FHWA and the FTA find a TIP to be fiscally constrained and a revenue source is subsequently removed or substantially reduced (i.e., by legislative or administrative actions), the FHWA and the FTA will not withdraw the original determination of fiscal constraint. However, in such cases, the FHWA and the FTA will not act on an updated or amended TIP that does not reflect the changed revenue situation.
- (m) Procedures or agreements that distribute suballocated Surface Transportation Program funds to individual jurisdictions or modes within the MPA by pre-determined percentages or formulas are inconsistent with the legislative provisions that require the MPO, in cooperation with the State and the public transportation operator, to develop a prioritized and financially constrained TIP and shall not be used unless they can be clearly shown to be based on considerations required to be addressed as part of the metropolitan transportation planning process.
- (n) As a management tool for monitoring progress in implementing the transportation plan, the TIP should:
  - (1) Identify the criteria and process for prioritizing implementation of transportation plan elements (including multimodal trade-offs) for inclusion in the TIP and any changes in priorities from previous TIPs;
  - (2) List major projects from the previous TIP that were implemented and identify any significant delays in the planned implementation of major projects; and
  - (3) In nonattainment and maintenance areas, describe the progress in implementing any required TCMs, in accordance with 40 CFR part 93.
- (o) In metropolitan nonattainment and maintenance areas, a 12-month conformity lapse grace period will be implemented when an area misses an applicable deadline, according to the Clean Air Act and the

transportation conformity regulations (40 CFR part 93, subpart A). At the end of this 12-month grace period, the existing conformity determination will lapse. During a conformity lapse, MPOs may prepare an interim TIP as a basis for advancing projects that are eligible to proceed under a conformity lapse. An interim TIP consisting of eligible projects from, or consistent with, the most recent conforming metropolitan transportation plan and TIP may proceed immediately without revisiting the requirements of this section, subject to interagency consultation defined in 40 CFR part 93. An interim TIP containing eligible projects that are not from, or consistent with, the most recent conforming transportation plan and TIP must meet all the requirements of this section.

- (p) Projects in any of the first 4 years of the TIP may be advanced in place of another project in the first 4 years of the TIP, subject to the project selection requirements of §450.332. In addition, the MPO may revise the TIP at any time under procedures agreed to by the State, MPO(s), and public transportation operator(s) consistent with the TIP development procedures established in this section, as well as the procedures for the MPO(s) participation plan (see §450.316(a)) and FHWA/FTA actions on the TIP (see §450.330).

# Ozarks Transportation Organization

## TIP AND AMENDMENT APPROVAL PROCESS

## CHANGES TO THE TRANSPORTATION IMPROVEMENT PROGRAM

Project sponsors may find it necessary to request revisions to the adopted TIP. Pursuant to 23 CFR §450.104, changes to the TIP are categorized as Amendments or Administrative Modifications.

### TIP AMENDMENTS

TIP amendments are major revisions which require official approval by the OTO Board of Directors. This is followed by submission to the Missouri Department of Transportation (MoDOT) for approval by the Governor of Missouri and subsequent approval by ONEDOT (FHWA and FTA). TIP amendments require a public comment period of 15 days prior to consideration by the OTO Board of Directors. Notice is given by press release and through the OTO website.

### REVISIONS REQUIRING TIP AMENDMENTS

1. Addition or deletion of any project (except as noted in the Administrative Modifications section);
2. Substantial changes to the scope of a project (e.g. changing the number of through traffic lanes, changing the type of project such as from rehabilitation to system expansion);
3. Changes in the availability (adding or deleting funds by Congressional action) of earmarked (special appropriation) funds;
4. Moving a project into or out of the first four Federal Fiscal Years of a TIP;
5. Changes in a project's total programmed amount greater than 15% (or any amount greater than \$2,000,000);
6. Changes in a project's fund source(s) from non-Federal to Federal, unless the fund source(s) change from Advanced Construction to an identified Federal funding source; and
7. Changes in the termini of a capacity project of any length OR any project in which the total length changes more than 1/4 mile.

### ADMINISTRATIVE MODIFICATIONS

TIP administrative modifications are minor revisions which can simply be made by OTO staff after verification that the change(s) falls into this category. Notification of administrative modifications are provided to the Technical Planning Committee, Board of Directors, MoDOT, and ONEDOT. TIP administrative modifications require no public comment period.

### REVISIONS ALLOWED AS ADMINISTRATIVE MODIFICATIONS

1. Changes in a project's programmed amount less than 25% (up to \$2,000,000);
2. Minor changes to the scope of a project;
3. Minor changes to the termini of a non-capacity project (one that increases or decreases the total length of the project by no more than 1/4 mile);
4. Adding or deleting a project development phase of a project (Environmental Assessment, PE Design, ROW, Construction, or other) without major changes to the scope of the project;
5. Moving a project's funds to another fiscal year, provided they are not being moved into or out of the first four fiscal years of the TIP;
6. Minor changes to funding sources between federal funding categories or between state and local sources;

7. Changes in a project's fund source(s) from federal to non-federal with no changes to the project's scope (however, the disposition of the "freed-up" Federal funds remain under the authority of the OTO and are subject to TIP Revisions as appropriate);
8. Changes from Advance Construction to Federal funding or from Federal funding to Advance Construction;
9. Changing a project's lead agency when agreed upon by the two agencies affected;
10. Changes made to an existing project's amount of local or state non-matching funds provided no other funding, scoping or termini changes are being made to the project;
11. Changes made to an existing project's programmed federal funds, to reflect the actual amount awarded by the federal agency and the corresponding required matching funds (up to 15% or \$2,000,000);
12. Adding a project to the TIP which is split from a "parent project" provided the cumulative total amount of Federal funding in each funding category in the parent and split projects remains intact and the overall scope of work intended to be accomplished does not change;
13. Combining two or more projects already in the TIP provided the cumulative, total amount of federal funding in each funding category of the combined projects remains intact and the overall scope of work intended to be accomplished does not change; and
14. Technical corrections.

## METROPOLITAN TRANSPORTATION PLANNING PROCESS CERTIFICATION

The Ozarks Transportation Organization, which is the Metropolitan Planning Organization for the Springfield, Missouri Urbanized Area, and the Missouri Department of Transportation hereby certify that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

1. 23 U.S.C. 134, 49 U.S.C. 5303, and 23 CFR 450 subpart C;
2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93; (NOT APPLICABLE)
3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
5. Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal Aid highway construction contracts;
7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

## FINANCIAL CAPACITY ANALYSIS CERTIFICATION

(FTA CIRCULAR 7008.1A)

I certify that the agencies requesting Federal Transit Administration grants under Sections 5307, 5309, and 5339 have the financial capacity to undertake the programmed projects listed in the FY 2023-2026 Transportation Improvement Program (TIP). The financial capacity statements were reviewed by the Ozarks Transportation Organization. This analysis reflects the financial condition of City Utilities Transit. OTO verifies their financial capacity to undertake their programmed projects and provide for the transit needs of Springfield, Missouri.

ORGANIZATIONS AND AGENCIES INCLUDED IN THE PUBLIC INVOLVEMENT PROCESS

PUBLIC INPUT

PUBLIC COMMENT

## INTRODUCTION

At the commencement of the development process for the annual TIP update, OTO solicits input from the community regarding needs and projects. OTO maintains a mailing list of interested parties and key transportation stakeholders. These persons and groups are specifically targeted in addition to the general public. OTO responds as appropriate to each comment received and forwards any comments, as appropriate, to the local jurisdictions or agencies which may also wish to respond. Included in this Appendix is the list of transportation stakeholders and the input OTO received.

## PUBLIC INPUT RECEIVED

OTO receives input from the public throughout the year and shares this input with the Technical Planning Committee and Board of Directors at the next possible meeting after the input is received. Comments are also shared with relevant local agencies and MoDOT as received. This input is then compiled to share with the OTO member jurisdictions ahead of each TIP update. Public input OTO has received in 2021 and to-date in 2022 is linked here, with a summary of such comments:

[2021 Public Comment](#)

[2022 Public Comment through March 7](#)

### 2021

- 45 Miles by 2045 > Supports the projects
- Bailey - FR 168 to Hines > Sidewalk and bike lane would connect the north & south parts of Republic
- Battlefield - Bike lanes > Bike lanes here (W Battlefield between Scenic & Kansas) and throughout the city need to be cleaned of all debris (especially small gravel/rocks)
- Battlefield - Trail - Pedestrian tunnel > Floods frequently causing trail users to cross over on road
- Battlefield - Trail - Pedestrian tunnel > Almost all trail underpasses in Spfld flood
- Battlefield - Carver Middle School > Needs an additional turn lane going west on Battlefield to turn into Carver Middle School. At dismissal time parents line up in the right driving lane & totally block the flow of traffic down to one lane.
- Bedford - Sunshine > Double left turn lane is needed on Bedford for those trying to go WB on Sunshine (Sam's Club & Neighborhood Market traffic)
- Bike lanes - Bennett > The existing bike lane is confusing to drivers & dangerous to cyclists. The bottleneck at Glenstone is dangerous. The bike lane ends as the street narrows past Enterprise disconnecting the Oak Grove neighborhood from this connection to Phelps Grove and the Link. The bike route to Catalpa is not any safer.
- Bike lanes - Sidewalks > Add bike lanes and sidewalks everywhere the speed limit is above 20 mph.
- Bike lanes > Need to fill in bike lane gaps like on Campbell - some sidewalks dead end next to high speed traffic or sidewalks do not exist at all forcing people with disabilities to walk on the road or risk rough terrain on the grass
- Buses > Buses need to be wider for wheelchairs. The people who work at the access express bus terminal are verbally abusive. Missouri needs a special service to p/u stranded people in wheelchairs.
- CC - Main > Adding right turn lanes from CC to Main may eliminate traffic. Left turn backs up, too.
- CC - Main > Needs widening and traffic light.
- CC - Main > Maybe a roundabout would work better at this intersection
- CC - Main > Intersection needs to be improved & bicycle lanes connected and protected
- CC - Old Castle Road > Intersection needs a light
- CC - Old Castle Road > Intersection very dangerous. Light is needed.
- CC - Old Castle Road > Agrees intersection is very dangerous. What is MoDOT's plan for this intersection?
- Campbell - James River > Flow of traffic at Campbell & JRF is dangerous. Intersection needs major overhaul OR extend Kansas Expressway

- Campbell - James River > This intersection is a nightmare. Very congested (as indicated in photo sent). Suggest: addition of off ramp to Republic St.
- Campbell - Republic Road > Needs crosswalk
- Campbell - Talmage > This intersection needs well marked crosswalks.
- Campbell/Sunshine to University - Sidewalks > Missing sidewalk from University to Sunshine on the SB side of Campbell"
- Catalpa - Highway 65 > Sidewalk or bike lane on Catalpa under 65 would be beneficial for safety and to promote walking to nearby establishments
- Chadwick Flyer Trail - Wilson's Creek Trail > Supports the projects and 45 miles of trails by 2045
- Chadwick Flyer Trail > Getting to the trail head from center city can be dangerous from Bennett & Enterprise to Ventura & Seminole. Having a trail on the rail bed would provide greater access & safety.
- Chadwick Flyer Trail at 65 > This regional trail must navigate Hwy 65 and OG identifies this crossing for people who bicycle & walk/wheelchair, as a priority need for not only our regional trail system, but also our region's transportation network.
- Cherry - Pickwick > Heavy pedestrian area - needs a crosswalk or stop sign
- Crosswalks > How much would crosswalk sensors that wouldn't let the light change as long as someone was in the crosswalk cost?
- Crosswalks - Sunshine & Glenstone > Adding crosswalks to Sunshine east of Glenstone
- Elegant - King Carriage Blvd > Needs stop sign
- Expressway north side of Springfield > Is there any discussion on putting an expressway on the north side of Springfield?
- Farm Road 89 - Hickory Lane > Needs a street light
- Farm Road 89 - Williamsburg Walk > Needs a street light
- Farm Road 146 - near Rutledge-Wilson > Can straightening this out get added to a long-term list (like when this road needs capacity improvement or major repaving)?
- Farm Road 150 - Haseltine Road > This stretch is getting really bad. Filling pot holes makes it worse. Edge of WB lane falling apart. Construction from new subdivision destroying the road. It is fine where Greene Co maintenance begins.
- Farm Road 168 - Farm Road 81 > Blinking yellow light - people do not slow down - very dangerous - Needs blinking red light or stop sign
- Farm Road 168 - Farm Road 81 > Scary intersection - several accidents have occurred here - the crest needs to be leveled
- Farm Road 168 - Farm Road 81 > Roundabout would be great. Traffic needs to be slowed down. Wrecks happen here all the time.
- FF Extension > The proposed expressway will go right through the middle of the Misty River subdivision. Built here specifically for the natural beauty and surroundings. Another route should be chosen.
- Glenstone - I-44 > Left turn lane for WB 44 does not need to be extended so far south - drivers in left turn lane to go E on 44 think this lane will stop for them. Many accidents.
- Glenstone - I-44 > While you are fixing that problem (Hwy 13/I-44) keep heading east to N. Glenstone & I-44 that's still a nightmare.
- Glenstone - McClernon to Valley Water Mill > Glenstone needs to be 4 lanes from McClernon St to Valley Water Mill - Also fix light sensors for cross traffic on McClernon.
- Halltown - I-44 exits > Exit ramps at Halltown - very sharp curves - needs to be safer
- Harvard Avenue (Swallow to Aladdin) > Add a sidewalk here (dangerous walk to Farmers Park)

- Highway 13 - I-44 > The intersection of Hwy 13 & I-44 is usually a nightmare, especially on the weekends. Traffic can be backed up southbound as far as 1.5 miles.
- Highway 13 - I-44 > Need flyover from SB Hwy 13 to EB I-44 - would reduce congestion
- Highway 13 - I-44 > Support for interchange improvements
- Highway 13 - I-44 > Support for investing in the planning and implementation of efforts to improve the intersection at I44 & North Kansas Expressway (MO Hwy 13) in Springfield.
- Highway 13 - I-44 > Ramps to 44 on grant avenue would remove local traffic/fairgrounds traffic/zoo traffic from the 13-44 intersection. Moving the intersection of 44/13 to the west would remove thru traffic. Moving the Norton Rd intersection to the north along with ramped outer roads for commercial businesses.
- Highway 13 - I-44 > Take out the diverging diamond and put in a sweep like Sunshine and 65. Then put a flyover for north/southbound traffic on Kansas. The only other solution is to create more bridges across I-44. The 20% more traffic the diverging diamond is supposed to handle, is not enough capacity for the number of vehicles traveling that corridor.
- Highway 13 - I-44 > At a minimum, the bridge over I-44 needs to be 3 lanes north/south with dual lefts and rights for each off ramp like National/James River.
- Highway 13 - I-44 > Traveled 13 almost everyday from 2006-2011 and it has vastly improved since 2006. The diverging diamond sped up the crossing of 44. The diamond also helped to eliminate the backup on 44. That area needs wider roads as you go north, from Kearney to 44.
- Highway 13 - I-44 > Exits onto 44 need to be like the ones on James River. Easier to get on/off.
- Highway 13 - I-44 & Norton > Add more lanes and move the Norton stop light. Needs to be turn lane on Hwy 13 for traffic going west on I-44.
- Highway 13 > Trash problem along 13 especially near the landfill
- Highway 13 - Farm Road 135 > Like to see improvements on the exit lanes. Lots of tourist traffic (Fantastic Caverns) and residential traffic.
- Highway 14 - Fremont > Needs a traffic light - turning left from Fremont onto 14 is nearly impossible during periods of increased traffic
- Highway 174 - Main > Intersection is a nightmare - Please consider additional lanes for school traffic or something to keep traffic flowing
- Highway 174 - Main > Would like to see improvements to school drop off and pickup times in this area.
- Highway 174 - Main > Traffic congestion during school drop off times causing safety issues
- Highway 174 - Main > Intersection is in need of repair and expansion. Traffic gets backed up and creates safety hazards.
- Highway 174 - Main > Traffic flow issue - have sat in traffic for 20+ minutes at the 4-way stop by Casey's
- Highway 174 - Hwy 60 to Kansas > Adding a bike lane & sidewalks along Hwy 174 would give residents a way to navigate the west side of town
- Highway 60 - Oakwood > Light causes problems - multiple fatalities and a serious injury crash last week
- Highway 60 - Main > No left turn lanes NB or SB on Main St./P Hwy
- Highway 60 (174 to James River) > US60 in Republic needs to be six lanes from at least MO174 to James River
- Highway 60 - Republic to Monett > This area does not get enough attention - no double lanes or passing lanes
- Highway 60 - at Andy's > Andy's traffic sometimes blocks a lane on Hwy 60
- Highway 60 > Mandatory improvement should include Hwy 60 - 4 lanes around Republic to bypass city and allow access to Amazon, Convoy of Hope, etc.

- Highway 60 - Farm Road 189 > EXTREMELY dangerous intersection. I am imploring you to install a light at the intersection in order to save lives.
- Highway 60 - Farm Road 189 > Very dangerous intersection. In 2012 was told in 2-3 years all of Hwy 60 would be improved and an outer road would service FR 189, it has now been 9 years with nothing done.
- Highway 65 - I-44 > Need to redesign acceleration lane and exit lane (on 65). They are currently combined & it reduces traffic flow.
- Highway 65 > Restrict semi's to 55 and to the two right lanes
- Highway AB - Highway 266 & Hwy B > Extremely busy intersections w/commuter traffic and semi traffic - possibly roundabouts
- Highway N - 168 Farm Road > Many wrecks/fatalities at this intersection. Community members would like to see it addressed and want to know what they can do to move this project forward. Contact person will be keeping in touch to check on progress.
- Highway P (US 60 to Lombardy) > P Highway from US60 to Lombardy needs a center turn lane.
- Highway ZZ - Farm Road 174 & Hines > Needs to be a light either at Hines & ZZ or ZZ & FR 174
- Highway ZZ - Farm Road 178 > Traffic control is needed - needs signal or roundabout
- Highway ZZ - Hines > Dangerous intersection - needs stoplight or roundabout
- Highway ZZ - HS entrance > Needs some form of traffic control - very busy and dangerous - reduced speed limits needed - roundabout would increase safety
- Highway ZZ - HS entrance > Needs to have a roundabout
- Highway ZZ - to Highway M > Kids would have the ability to safely walk/bike to school with a designated bike lane and sidewalk.
- Hines - Lynn > This intersection is very dangerous
- Hines - Lynn > Please put a 4-way stop or red blinking light here. This is another dangerous - too much traffic here.
- Hines - Lynn > Intersection is extremely busy and hard to navigate.
- Hines - Oakwood to Hwy ZZ > Needs sidewalk and bike lane on Hines
- I-44 > Needs to be six lanes
- Kansas Expressway (I-44 to James River) > Kansas Exp needs to be widened to 3 lanes in both directions the entirety of the corridor
- Kansas Expressway (I-44 to Kearney) > Need to consolidate some driveways in order to lower number of accidents & keep traffic moving.
- Kansas Expressway > Pedestrian vs. vehicle - people cross Kansas Exp to go to the Library and stores - dangerous
- Kansas Exp Extension > What is the latest update? Is funding identified yet, when could construction start? Will federal stimulus funding be able to help the project move forward?
- Kearney - Grant > This intersection needs well marked crosswalks and road-surface maintenance.
- Lulwood Street - Sidewalks > Kids traveling to school have no sidewalk out of the Lulwood St./neighborhood. Totally unsafe walking on either side of the road.
- M Highway - Farm Road 101 > This is a residential area, the speed limits need to be lowered.
- M Highway - Farm Road 168 > Traffic at intersection gets extremely backed up at times.
- M/B Highway Corridor (266 south to Hwy 60) > Needs widening and additional lanes. Also, 60 at M is a dangerous intersection.
- MM - Highway 60 > Kum & Go entrance should not be closed (entrance to MM)

- MM Highway - Highway 60 > Cars should NOT be allowed to enter Kum & Go on Hwy M. There is an entrance on Hwy 60 cars should utilize. Way too much traffic, with a RR crossing there. Very dangerous intersection.
- MM Highway - Sawyer Road > Intersection needs a stoplight and widened to 2 lanes
- MM Highway > Traffic volume will be increasing especially with large trucks, needs something done to stay ahead of the problem
- MM Highway > On the verge of a very large traffic problem
- MM Highway > Safety and traffic concerns due to commercial growth in the area
- MM Highway (60 North to 266) > Safety and traffic concerns due to commercial growth in the area
- MM Highway (James River to 60) > Safety and traffic concerns due to commercial growth in the area
- MM Highway at JRF > This intersection needs a stoplight. It is difficult to see traffic coming over the bridge in a small vehicle.
- MM Highway Brookline area > Safety and traffic concerns due to commercial growth in the area
- Main Street - Tracker Road > Bicyclist safety - semis turning right do not use the turn lane, they cross over the bike lane
- Main Street - Sycamore St/Lindbergh Rd > Needs a turn lane/turn from either direction people almost run over you
- Micro transit > Micro transit - something that could have some potential and provide a way to transform the existing fixed routes. It would also provide transportation to distribution center & other jobs on the outskirts of the community.
- Miller - Lynn to FR 97 > Sidewalk and bike lane would be beneficial to Miller Park
- National > The curves/radii in the lanes are greatly exaggerated here for this intersection in the diverging diamond (at James River)
- National (Division to Cherry) > Southbound traffic lights are not timed well.
- National (near McDaniel Park) > Right lane fills half with standing water
- Primrose - Stewart > Needs a roundabout
- Public Transit Passenger Train > Passenger trains between neighboring cities would be helpful vs trying to use buses and being limited by speed limits
- Public Transit Passenger Train > They completely disagree with the above comment. It is not cost-effective or realistic.
- Public Transit > Is there a plan for public transportation from Springfield to Republic due to the new Amazon facility in Republic?
- Republic Road - Monastery St > Path under road does not have access go to the north communities
- Republic Road - Campbell (near) > Sidewalk that goes over JRF ends leaving walkers to have to navigate the shoulder or grass
- Republic Road - Campbell > Needs to be 4 lanes
- Republic Road - James River Freeway > Adding a feasible path for bikers & pedestrians to cross James River at Republic Rd could add accessibility for a large residential area.
- Republic Road - James River Freeway > SUPER frustrated they didn't consider any pedestrian options when planning the current project - wonder why we think MoDOT doesn't care about pedestrians
- Sidewalk safety > Sidewalks against the curb is a safety hazard.
- Springfield to KC > Why are the north/south highways not interstates? Is there plans for Interstate 29 to come down to Springfield?
- Stoneridge - Delaware > Is a 4-way stop really justified here? (north of Valley Water Mill)

- Sunset - Glenstone > WB on Sunset does not have a protected left turn period - turning is very difficult during rush hours & fall holiday season - two cycle for one car to get through
- Sunshine - near new HyVee > Need north/south pedestrian crosswalk/lights.
- Sunshine - Haseltine Road > Drivers need to be educated to understand the difference between stop & yield. Drivers trying to cross the intersection will cut in front of a driver sitting in the left turn lane.
- Sunshine - Haseltine Road > There are two crossovers within 25 yds of each other - very, very dangerous - Wouldn't one suffice? Or add a stoplight at W. Sunshine and Haseltine Rd and close one of the crossovers.
- Sunshine - James River Freeway > Three suggestions: Lengthen the left turn lanes onto JRF - Flashing warning signs for red light - Add right turn lane from WB offramp to EB Sunshine
- Trafficway - National > Left turn on Trafficway going NB National is short & not designed well when coming up to the signal light.
- Trail - Fasnigh Trail at Grant > The Fasnigh Trail ends at a random skate park. It goes under Grant but there is no way to get to Grant from the trail currently.
- Trail - Galloway Creek at Seminole > Please extend this trail north of Sunshine, there are few safe access points to this trail from north of Sunshine.
- Trail - Ward Branch underpass > The Ward Branch underpass for Campbell Road is continually flooded. Also, the continuation of Ward Branch Greenway to Plainview is greatly appreciated. The lights are not working on the underpass under James River Freeway.
- Trails – Campbell (near Weaver) > This area consistently floods, making it impossible to cross under Campbell.
- Trails - Campbell (near Weaver) > Flooding needs to be fixed - new path south of development will not be used without this fix
- Trails - Orchard Crest to Hillcrest > The old train tracks would be a nice east west greenway corridor if it could end up downtown
- Trails > Once you're on trails you are stuck, no way to access anything around you
- Trails > Supports developing more trails but with 1 troubling concern, safety. Have there been discussions about safety, security, and cellphone service?
- Trails > There is no way to get to the future trail site from Grant. It ends at a skate park. There doesn't seem to be any connection going south from there. To get to the South Creek Trail, for example, the only way is to take the sidewalks on the northbound side of Campbell but that is rough.
- Trails > An app that shows you where you are at in relation to both bus stops and trails would be really helpful. Google maps has the bus stops but the trails aren't noticeable unless you zoom in all the way.
- Trails > Its extremely difficult to figure out where to connect with the trails from the street. In some cases, the only indication is a stop sign painted on the curb cut. Need to look into bright lights on the trail and pedestrian underpasses.
- Trails - Lake Springfield - Trail of Honor > A bridge between Lake Springfield and the Trail of Honor would be a game changer for the Lake Springfield park & the connection to Galloway via James River/Galloway trails. It would also open up parking for walkers and bikers having access from the West.
- Trails - Lake Springfield - Trail of Honor > Complete the bridge between Lake Springfield and the Trail of Honor
- Trails St. Louis to Lake Fort Smith, AR > Springfield will be a big player in the near future to support the work constructing trail along the Norfolk Lake in MO and AR by the Ozark Trail Assoc in MO & the Ozark Highland Trail Assoc in AR.
- Vintage Point at Highland Springs > Traffic & Safety concerns with new development

- W Highway - Bike lanes > Widening the shoulder on State Hwy W from 14 to Center Road and painting a bicycle lane on one side would link Ozark to the 100+ miles of trails in Chadwick
- West Bypass - Kearney > This intersection desperately needs right turn lanes.
- West Bypass - Kearney > Could use right turn lanes (from every direction). Very congested.
- West Bypass - Sunshine > Would like an extended left turn lane from NB lanes at W. Sunshine. Traffic backs up.
- Wilson's Creek Trail Expansion > This is a great trail that goes well up into Springfield. It would be great if it expanded further south.

## 2022

- Bicycle Lanes - Traffic Congestion > Many streets/highways are overly congested. Please do not further disrupt traffic by adding bicycle lanes or decrease lane widths.
- Bicyclist/Pedestrian safety > One of the greatest needs is to improve roads w/shoulders & make designated safe routes for cyclists/pedestrians. I would especially like to see safe routes/trails connecting Nixa & Ozark to the Springfield area.
- Bike Trail - Springfield/Nixa > There is currently no safe or practical way to cycle (or walk) from Nixa to Springfield. The Ozark Chadwick Flyer is great but it is a long way from Nixa's population centers.
- Bike Trail - Farmer's Park to Sequiota > Is there a way to create a bike path from Farmer's park to the Sequiota trails and out to Rogersville/Ozark w/out having to ride on Glenstone across JRF? Will there be a bike lane w/the roundabout or can a path be put down Nature Center Way to connect to an already great pathway?
- Bike Trail - Springfield Lake > Bicycle/Ped pathway that connects to existing trail network.
- Cairo St - Glenstone & Kentwood > No sidewalks on either side of Cairo St between Kentwood & Glenstone
- Campbell - Plainview > There is no signage showing what the lanes do. The leftmost lane becomes a left-turn lane after Plainview, causing traffic to try to merge from that lane. Tons of slowdowns/accidents. Straight lanes should never become turn lanes w/out signage.
- Glenstone - James River > With the new roundabout, will there be a bike lane? Going over JRF on Glenstone is currently the best way to get to Sequiota from Farmer's park. Or, can a bike path be added by the Nature Center to connect to existing trails w/o having to ride on the busy road?
- Hidden Tree Lane > I just learned there is a proposed collector street running through my backyard. I was never notified. I'm very irritated.
- Highway 14 - 32nd Street > Dangerous intersection for traffic exiting Hwy 14 to 32nd Street - multiple collisions
- Highway 266 - Highway B > Traffic circle
- Highway 60 - Farm Road 189 > Traffic continues to increase. West bound lanes on US 60 at FR 189 do not have a good line of site. The turnoff is difficult.
- Highway FF - JRF > I wish we could get FF over JRF fixed. This area is full of potholes.
- Highway P > Really wish they would consider working on P Highway between Republic and Clever. A 2 lane road with 20-30K cars a day down it...
- I-44 - Joplin/St. Louis > This highway definitely needs to be expanded, not only between Kansas Expy and 65, but all the way from St. Louis to Joplin.

- James River - Republic Road > The walking/cycling path is down Republic to Fremont, then back to Independence behind motels and then up a frontage road (3+ miles) instead of a means to just cross over the freeway to that area. Pretty awful.
- Kansas St - Talmage and Livingston St > Need a foot bridge between Talmage & Livingston on Kansas. Repair the pot holes on city's side streets.
- Kearney St - Hwy 65 > The Kearney St bridge over 65 is embarrassing. Whole thing needs tore down and rebuilt.
- Kentwood - Walnut & St Louis > No sidewalk on either side of Kentwood St between Walnut St and St Louis St.
- Light Rail Transfer Station - CU bus transfer station > This could potentially be used as a transfer station for light rail in the area. There are unused railroad tracks and existing tracks utilized by BNSF. It could also serve high speed rail or connections outside of the city and state.
- Lone Pine - Saratoga Ave > There is already a ROW w/overhead utility lines in this area. This would connect the greenways north of Sequiota Park.
- Luster - Glenstone > The rightmost left turn lane off of Luster (photo was provided) turns into the exit lane for Hwy 60 (unmarked on Luster). Most people turning here have to then immediately figure out how to get out of this lane to continue on Glenstone.
- Massey Blvd - Tracker Road > Protected bicycle lane or extended buffer bicycle lane.
- National - Primrose > This lane (photo was provided) states that it is "National" in the far right lane but in reality it is a very long exit lane for Primrose.
- Nature Center Way - Galloway Trail > Adding a spur to connect Galloway trail to Nature Center Way would open this trail to the weekly farmers market and provide local neighborhoods bicycle access.
- North/South Route - West side Springfield > There should be additional arteries created for traffic going north-south on that side of the city, rather than just Kansas Expressway and Campbell
- Park Central Square > It does not support on site parking for vehicles. It should be classified as a pedestrian zone. It should be closed to traffic to increase the walkability in the area.
- Shulyer Trail > Received petition against
- Sidewalk - Trails > Sidewalks built directly next to the street w/o grass or barrier is a safety concern. On-street bicycle lanes are extremely dangerous. Ped/bike need multi-purpose hard paths. Many locations have unreasonable distances between destinations. Area cities need to commit to all new construction/renovations requiring large multi-purpose sidewalks/paths as part of their design.
- Solaira St - 9th Street > There is no connecting sidewalk to the main road.
- Street Car System > Would it benefit the community if we brought back a street car system? KC's system allows the downtown area to get more foot traffic and cuts down on parking issues. It seems like it would pay for itself in the long run.
- Traffic lights - right turn lanes > Get Springfield streets "up to date" (more right turns). Sync traffic lights to avoid congestion. Instead of concentrating on the minority of people who use bike lanes/sidewalks, focus on the majority who have to drive.
- Trail - W. Division > Area requires a multiuse path that allows ped/bike to access school (Willard South Elem)
- Trail extension > Trail extension to increase walkability for the area. (Neighborhood off of AB near Hwy EE)
- Trail placement > The proposed trail from Republic towards Hwy ZZ needs to be rerouted. It will go through several rural front yards & seriously hindering the safety & privacy of homeowners. It also takes

valuable farmland. Needs to be rerouted to Hines St. this will also help to avoid the proposed dangerous traffic circle.

- Trail placement > Shouldn't take farm land, our birth right, and mature trees to put a trail at my front door for something that is not a need or could be re-routed. Should be rerouted one road over to the park where children would actually benefit from it. It takes away farmers property and privacy.
- Walking Path - W. Division > Walking path to cut down on travel time and increase walkability to school (coming off of Collings St to Willard South Elem)

#### DRAFT PUBLIC COMMENT WITH RESPONSE

To be added upon receipt.

OZARKS TRANSPORTATION ORGANIZATION  
A METROPOLITAN PLANNING ORGANIZATION

This report was prepared in cooperation with the USDOT, including FHWA and FTA, as well as the Missouri Department of Transportation. The opinions, findings, and conclusions expressed in this publication are those of the authors and not necessarily those of the Missouri Highways and Transportation Commission, the Federal Highway Administration or the Federal Transit Administration.
