OTO URBAN AREA MAP

LIST OF OTO MEMBERS

PUBLIC INVOLVEMENT PROCESS

ANNUAL LISTING OF OBLIGATED PROJECTS

TRANSPORTATION PLAN COMPLIANCE

FUNDING SOURCES

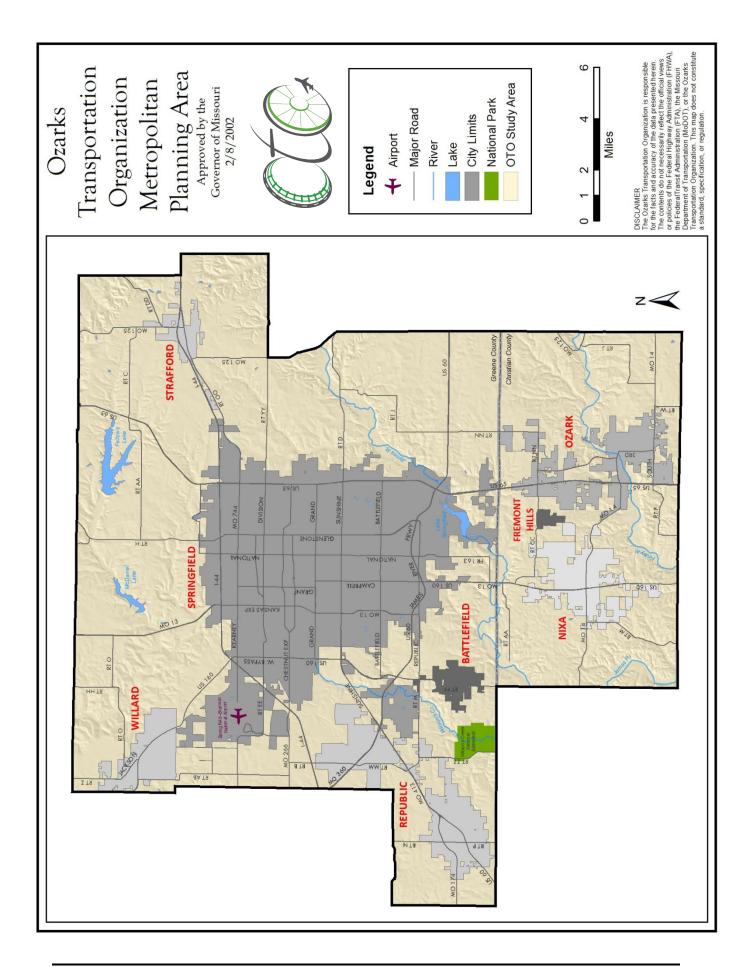

INTRODUCTION

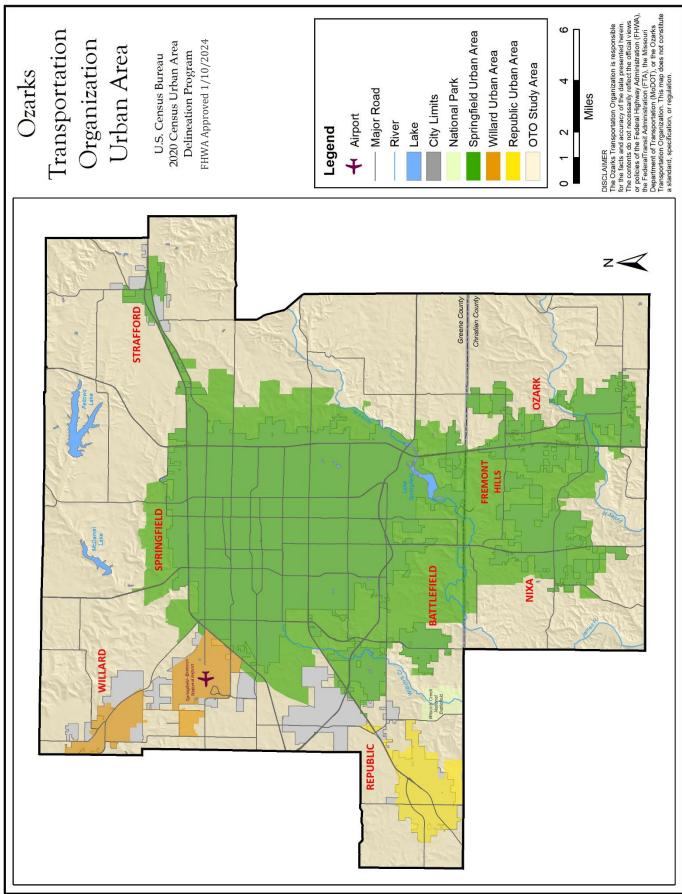

The Transportation Improvement Program (TIP) is the short-range capital improvement program for various transportation systems located in the Springfield metropolitan planning area. The Ozarks Transportation Organization (OTO) is the designated Metropolitan Planning Organization for the Springfield, Missouri Urbanized Area. Metropolitan planning organizations serve to conduct and lead a continuing, cooperative, and comprehensive transportation planning process. In an effort to make the transportation planning process cooperative and collaborative, elected officials from jurisdictions within the urban area and major transportation providers are members of the Ozarks Transportation Organization. The OTO is comprised of four components – the Board of Directors, the Technical Planning Committee, the Bicycle and Pedestrian Advisory Committee, and the Local Coordinating Board for Transit. The Board of Directors consists of elected officials and representatives from transportation providers. The Technical Planning Committee consists of technical staff and appointed transportation representatives. The Bicycle and Pedestrian Advisory Committee is also comprised of technical staff and appointed bicycle and pedestrian representatives. The Local Coordinating Board for Transit is composed of local human service transportation providers.

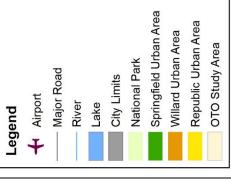

The TIP is a financially constrained four-year program outlining the most immediate implementation priorities for area transportation projects, carrying out the goals and vision of the OTO's long range transportation plan. It serves to allocate limited financial resources among the various transportation needs of the community and to program the expenditure of federal, state, and local transportation funds. In order to receive federal highway or transit funds, a project must be included in the TIP, though the TIP should also include any regionally significant projects, including those funded from non-federal funding sources. A regionally significant project is on a facility that serves regional transportation needs (such as access to and from the area outside the region; major activity centers in the region; major planned developments such as new retail malls, sports complexes, or employment centers; or transportation terminals) and would normally be included in the modeling of the metropolitan area's transportation network. The TIP is developed through a collaborative process in which each jurisdiction or federal recipient of transportation funds is given the opportunity to submit projects to be considered for placement in the TIP.

The TIP is created in compliance with the OTO public involvement policy. Each individual agency allows for public participation in the TIP process. Once the TIP submittals are received, OTO staff compiles the submittals and distributes them to the Technical Planning Committee. The Technical Planning Committee then reviews the TIP and forwards it to the Board of Directors. Public comment is taken prior to the approval of the TIP. Once approved by the Board of Directors, the Governor of Missouri must also approve the TIP. The TIP is approved by the Missouri Department of Transportation to be incorporated into the Statewide Transportation Improvement Program (STIP) by reference, following MoDOT's receipt of the Governor's review for concurrence and U.S. DOT approval of the MoDOT STIP amendment. Finally, the Federal Transit Administration (FTA) and the Federal Highway Administration (FHWA) approve the STIP.

This TIP document is intended to serve as a project implementation guide for those agencies participating in the OTO transportation planning process for the Springfield metropolitan planning area (MPA). The projects outlined in this TIP are a reflection of the policies and plans adopted by the OTO. The TIP, as approved by the Board of Directors and the Missouri Department of Transportation, constitutes the selection document for project implementation. The projects in the TIP represent the agreed list of projects that are programmed to be delivered in each year of the four-year TIP horizon period.

OZARKS TRANSPORTATION ORGANIZATION MEMBERSHIP

BOARD OF DIRECTORS

Voting Members include:

- One (1) Elected Official from Christian County
- Two (2) Greene County Commissioners
- One (1) Elected Official from the City of Battlefield
- One (1) Elected Official from the City of Nixa
- One (1) Elected Official from the City of Ozark
- One (1) Elected Official from the City of Republic
- Three (3) Springfield City Council Members
- One (1) City Utilities Board Member
- One (1) Springfield-Branson National Airport Board Member

Non-Voting Members include:

- Federal Aviation Administration Representative
- Federal Highway Administration Representative
- Federal Transit Representative
- District Engineer, Missouri Department of Transportation (MoDOT)

• Four (4) Citizen At-Large Representatives

- One (1) Member nominated by the Board of Directors and Appointed by the MPO
- Two (2) Members nominated by Springfield and Appointed by the MPO
- One (1) Member nominated by the Christian
 County Commission and Appointed by the
 MPO. The Cities of Ozark and Nixa may submit
 candidates to the Christian County Commission
 for consideration
- One (1) Elected Official from the City of Strafford
- One (1) Elected Official from the City of Willard

TECHNICAL PLANNING COMMITTEE

Voting Members include:

- Representative from the City of Battlefield
- BNSF Representative
- City Utilities Director of Transit Services
- Representative from Christian County
- Administrator, Greene County Highway Department
- Director, Greene County Planning Department
- Greene County Highway Department Chief Engineer
- Transit Representative of Missouri State University
- MoDOT (Central Office), Assistant Administrator of Transit
- MoDOT (Central Office), MPO Planning Liaison
- MoDOT Southwest District Office, Assistant District Engineer

- MoDOT Southwest District Office, Transportation Planning Manager
- Representative from the City of Nixa
- Representative from the City of Ozark
- Representative of Ozark Greenways
- Private Transportation/Transit Provider Representative
- Representative from the City of Republic
- Springfield-Branson National Airport Director of Aviation
- Representative of the Springfield Area Chamber of Commerce
- Springfield Director of Planning and Development
- Springfield Director of Public Works
- Representative from the City of Strafford
- Trucking Representative
- · Representative from the City of Willard

Non-Voting Members include:

- Federal Aviation Administration Representative
- Federal Highway Administration Representative
- Federal Transit Administration Representative
- Southwest Missouri Council of Governments Transportation Advisory Committee Member

BICYCLE PEDESTRIAN ADVISORY COMMITTEE

- Representative from Christian County
- Representative from the City of Battlefield
- Representative from the City of Nixa
- Representative from the City of Ozark
- Representative from the City of Republic
- Representative from the City of Springfield
- Representative from the City of Strafford

- Representative from the City of Willard
- Representative from City Utilities
- Representative from Greene County
- Representative from Missouri State University
- Representative from MoDOT
- Representative from Ozark Greenways
- Citizen Representative

LOCAL COORDINATING BOARD FOR TRANSIT

- Arc of the Ozarks
- Burrell Center
- City Utilities Transit
- FTA Transit Administration Region 7
- MoDOT Central Office
- MoDOT Southwest District Office
- OATS, Inc.

- Southwest Center for Independent Living
- Southwest Missouri Council of Governments
- Southwest Missouri Office on Aging
- Ozark Senior Center
- Springfield Regional Office Dept. of Mental Health
- Springfield Workshop Industrial Solutions

TRANSPORTATION PLAN COMPLIANCE

The FY 2025-2028 Ozarks Transportation Organization Transportation Improvement Program considers the Long Range Transportation Plan, *Destination 2045*, for the metropolitan planning area when placing projects in the program. Improvements are considered on a regional basis. Projects considered for placement in the Transportation Improvement Program must appear in the Long Range Transportation Plan.

Federal funding is used to improve highways and major intersections located in the metropolitan planning area, which serve not only the residents of the incorporated city limits or a single jurisdiction, but residents of unincorporated areas and multiple jurisdictions that use the state highway system to meet daily transportation needs. Many of the projects listed for consideration in the Long Range Transportation Plan are being improved through this program.

Federal funding is utilized to make transit improvements and to help fund the operations of the City Utilities and Missouri State University transit systems. The improvements financed are ranked and funded accordingly. As part of the ranking criteria, consideration is given to adherence to the Long Range Transportation Plan.

Federal funding is also used to aid in the purchase of vans for non-profit agencies in the region. These paratransit agencies serve populations that are not served by the fixed-route transit system.

PUBLIC INVOLVEMENT PROCESS

OZARKS TRANSPORTATION ORGANIZATION

OTO conducts its own public involvement process. This includes the notification of transportation agencies and other interested groups concerning the TIP project development and selection process and how to participate. OTO also publishes written notices and press releases to alert the public to those meetings at which the proposed TIP will be discussed. Public comment is solicited and copies of the draft are made available for public examination around the region, as well as the OTO offices and online at http://www.OzarksTransportation.org.

OTO provides annual notice to the agencies and groups considered interested parties and to the agencies that have previously submitted projects. This list may be found Section I of this document. The notice includes information concerning the transportation issues and processes used in developing a TIP submittal. This notice will provide the information required to propose projects for inclusion in the TIP and the timetable to be followed. OTO staff will be available to give these agencies and groups any assistance they might require in developing projects for submittal for the TIP.

Agencies submitting projects for inclusion in the TIP must include written documentation showing that public comment has been sought. If written or oral comments that question the need, scope or scheduling of TIP projects, or that propose alternative projects are received during the TIP preparation process, the submitting agency will submit a summary, analysis, and report on the disposition of the comments, which will be made a part of the approved TIP and can be found in Section I.

Public comment is taken prior to Board of Directors approval of the TIP. The draft TIP is to be made available for comment for 30 days. Prior to approval a public notice will be published in the Springfield News-Leader or other community paper. The draft TIP will be available on the OTO website, at the OTO offices, the Springfield-Greene County Library, City Utilities Transit Office, and the Missouri Department of Transportation Southwest District Office. Any public comment received during this review period will be taken into account by OTO staff and will be presented to the Technical Planning Committee and the Board of Directors as part of the approval process. The public notice regarding the availability for review of the draft TIP will include the following text: "THIS PUBLIC NOTICE OF PUBLIC INVOLVEMENT ACTIVITIES AND TIME ESTABLISHED FOR PUBLIC REVIEW AND COMMENTS ON THE TIP DEVELOPMENT PROCESS WILL SATISFY THE FTA'S PROGRAM OF PROJECTS REQUIREMENTS OF THE URBANIZED AREA FORMULA PROGRAM. IF NO COMMENTS OR CHANGES ARE MADE TO THE PROGRAM, THE PROGRAM AS PROPOSED WILL BE THE FINAL PROGRAM."

OTO has adopted a public participation plan, available on the OTO website at www.OzarksTransportation.org.

CITY UTILITIES OF SPRINGFIELD

City Utilities of Springfield has adopted a public involvement policy that offers public and private entities the opportunity to participate in the transit planning process and to present views concerning the development of local transportation plans and programs. City Utilities holds an annual public hearing on their budget and projects for the coming year. The City Utilities Board of Public Utilities must also approve the budget and projects with the Springfield City Council making the final approval.

In January of 2015, City Utilities of Springfield, Missouri – Transit (CU) and the OTO executed a memorandum of understanding (MOU) wherein, CU agreed to rely on the locally adopted public participation process requirements

for the TIP as outlined in the PPP in lieu of the process required to develop its Program of Projects (POP). Per the MOU with CU, the OTO public participation process for the TIP satisfies CU's public participation process for the POP and has agreed to the following:

- 1. The OTO will be responsible to conduct the project selection process and to publish the annual Program of Projects for the FTA 5307 and 5339 programs.
- 2. The OTO will conduct the public participation process for the Springfield Urbanized Area for the FTA 5307 and 5339 programs.
- 3. The OTO's public participation plan should state that the OTO's public participation process satisfies CU's public participation process.
- 4. CU will assist the OTO with the public involvement process by allowing notices for public input opportunities to be placed in CU buses and facilities at no charge to the OTO.
- 5. CU will rely on the OTO's public involvement process for the TIP and requires public notices be published annually by the OTO. If the proposed POP is not amended, the OTO must include a statement that the proposed program will be the final program, unless amended, and satisfies the requirements regarding the final POP.
- 6. The OTO's public notice for the TIP must have an explicit statement that public notice of public involvement activities and time established for public review of and comments on the TIP will satisfy the POP requirements.
- 7. CU will rely on the public involvement process for the TIP conducted by the OTO to satisfy Section 5307 and 5339 public involvement requirements for the POP.
- 8. CU will report performance measure indicators to the OTO for reporting to the USDOT and informing the public of the improved performance of the transportation system resulting from federal investment.

OTO advertises City Utilities' program of projects each year in the Springfield News-Leader. A public hearing is required, and an equity analysis may also be performed, prior to implementing either an increase in transit fares or a significant reduction in service. The CU public involvement process for fare increases or route changes is aligned with FTA guidelines. A significant reduction in service is defined by the following criteria:

- A decrease of 25 percent or more in the revenue miles of a route, either at one time or cumulative during any twelve (12) month period; or
- An increase in headway for a route of more than 15 minutes; or
- A rerouting that will last more than 180 days and decrease the revenue miles of a route by 25 percent or more.

MISSOURI DEPARTMENT OF TRANSPORTATION

Local input is important in statewide transportation planning. The Missouri Department of Transportation (MoDOT), the regional planning commissions (RPCs), MPOs, city officials, and county officials form regional partnerships to gather and evaluate local input on transportation needs. This allows members with common interests and goals to tailor their level of participation as they desire. Their roles can then evolve as participants gain more experience in transportation planning. Although members' roles and specific processes may differ from group to group, some common themes exist among them. Public comments concerning transportation needs are gathered from many sources, including county-wide public meetings, calls to MoDOT's customer service center, public surveys, and comments received by local officials from their constituents. The local officials, generally in conjunction with the RPC and MPO, use these comments in their process for identifying and prioritizing

transportation needs in the region. Each RPC and MPO develops a prioritized list of needs for MoDOT's consideration in programming.

In addition to public input, MoDOT continuously evaluates the condition of Missouri's road and bridges. State bridge inspectors evaluate the structural integrity of each bridge component. Interstate and primary system roads are evaluated every year, along with approximately one-third of the secondary system roads. During the pavement evaluation, physical factors such as rut depth, roughness, cracking, and joint integrity are reviewed. The road and bridge inspection data for the entire system is analyzed to provide indices for pavement and bridges. All of this data is used in programming.

MoDOT uses a combination of factors to determine what would be the best expenditure of funds in a particular year. These factors may include the MPO's and RPC's prioritized lists, public comment and priority time necessary to produce plans and estimated costs, as well as the recommendations of the long range transportation plan, safety factors, traffic information, condition ratings, construction scheduling and sequencing, duration of the construction, coordination with other construction projects (both MoDOT's and others), economic development, and the availability of outside funding sources. The combination of these factors, and more, are used to develop project priorities for programming.

CONGESTION MANAGEMENT PROCESS

Urban areas with a population over 200,000, like the Ozarks Transportation Organization urbanized area, are known as Transportation Management Areas (TMAs). These areas must develop a Congestion Management Process (CMP) that both identifies and evaluates projects and strategies that reduce traffic congestion and increase the mobility of people and goods. The CMP can be found on the OTO website at www.OzarksTransportation.org.

FUNDING SOURCES

FEDERAL

The U.S. Department of Transportation allocates Highway Trust Funds collected from gasoline and other federal transportation-related taxes to major transportation programs administered by the Federal Highway Administration and the Federal Transit Administration as authorized by the Infrastructure Investment and Jobs Act, also known as the Bipartisan Infrastructure Law (BIL), signed November 15, 2021. It authorizes the federal surface transportation programs for highways, highway safety, transit, and rail for the five-year period from 2022 through 2026. The following is a list of some of the federal transportation programs from which funding is available:

Major Federal-Aid Highway Programs under BIL			
Program	Eligible Uses	Percent (%) Federal Share of Funded Projects	
Bridge Formula Program	Formula program to replace, rehabilitate, preserve, protect, and construct highway bridges.	In accordance with 23 USC 120 unless used on a locally-owned off- system bridge (100)	
Congestion Mitigation and Air Quality (CMAQ)	A wide range of projects in air quality non-attainment and maintenance areas for ozone, carbon monoxide, and small particulate matter, which reduce transportation-related emissions.	80	
Carbon Reduction Program	Provides funds for projects designed to reduce transportation emissions, defined as carbon dioxide (CO2) emissions from onhighway sources.	In accordance with 23 USC 120	
Highway Safety Improvement Program	Any strategy, activity or project on a public road that is consistent with the data-driven State Strategic Highway Safety Plan (SHSP) and corrects or improves a hazardous road location or feature or addresses a highway safety problem.	90	
Metropolitan Planning (PL)	All planning activities are eligible (e.g., modeling, air quality analysis, public outreach, environmental analysis).	80 unless the Secretary determines that changing this contribution level is warranted	
National Electric Vehicle Infrastructure Formula Program	Provide funding to states to strategically deploy electric vehicle charging infrastructure and to establish an interconnected network to facilitate data collection, access, and reliability.	80	
National Highway Freight Program	Contributes to the efficient movement of freight on the National Highway Freight Network and be identified in a freight investment plan included in the State's freight plan.	In accordance with 23 USC 120	
National Highway Performance Program	Support for the condition and performance of the National Highway System (NHS), for the construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.	80	
Highway Infrastructure Program (as defined in annual appropriations funding)	As defined by Section 133(b)(1)(A) of Title 23, U.S.C. – construction of highways, bridges, tunnels, including designated routes of the Appalachian development highway system and local access roads under Section 14501 of Title 40, U.S.C.	80	
Off-System Bridge Replacement and Rehabilitation Program	Replacement and rehabilitation of deficient bridges located on roads functionally classified as local or rural minor collectors.	80	
Surface Transportation Block Grant Program (STBG)	Broad range of surface transportation capital needs, including many roads, transit, sea and airport access, vanpool, bike, and pedestrian facilities.	80	
Transportation Alternatives Program – STBG Set-Aside	A variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs.	80	

Major Federal-Aid Highway Programs under BIL			
Program	Percent (%) Federal Share of Funded Projects		
Transportation and Community and System Preservation (TCSP)	Research and grants to investigate the relationships among transportation, community, and system preservation plans and practices and identify private sector-based initiatives to improve such relationships.	80	
Discretionary Programs	IIJA continued several discretionary programs and introduced several new ones, each with their own emphasis areas. Notices of Funding Opportunity (NOFOs) provide details on each program at the time applications are accepted.	Varies	

Federal Transit Administration Urban-Related Programs under BIL			
Program	Eligible Uses	Percent (%) Federal Share of Funded Projects/Services	
Metropolitan Planning Program Funds – Section 5303	Transportation Planning.	80	
Urbanized Area Formula Grants – Section 5307	For public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances.	80 for capital 50 for operating 80 for paratransit	
Capital Investment Grants - Section 5309	For new and expanded rail, bus rapid transit, and ferry systems that reflect local priorities to improve transportation options in key corridors.	80	
Enhanced Mobility of Seniors and Individuals with Disabilities – Section 5310	Enhance mobility for seniors and persons with disabilities by providing funds for programs to serve the special needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit.	80 for capital 50 for operating	
Mobility on Demand (MOD) Sandbox Demonstration Program – Section 5312	Funds projects that promote innovative business models to deliver high quality, seamless and equitable mobility options for all travelers.	80	
Bus and Bus Facilities Program – Section 5339	Provides funding through a statutory formula to replace, rehabilitate and purchase buses and related equipment and to construct bus-related facilities. Additionally, this program includes two discretionary components – the Bus and Bus Facilities Discretionary Program and the Low or No Emissions Bus Discretionary Program.	80	

STATE OF MISSOURI

The State of Missouri receives state revenue for transportation from fuel taxes, licensing fees, sales taxes, interest earned on invested funds and other miscellaneous collections, and General Revenue.

LOCAL GOVERNMENT

There are a variety of options available for transportation funding by local governmental entities. These include taxes, improvement districts, obligation bonds, development districts, Community Development Block Grants, special assessments, impact fees, excise taxes, development agreements, tax increment financing, gasoline taxes, licensing and motor vehicle fees, service fees and property taxes. Additional information on revenues may be found later in this document in Section G: Fiscal Constraint.

ANNUAL LISTING OF OBLIGATED PROJECTS

EXPLANATION OF SEPARATE PUBLICATION

An Annual Listing of Obligated Projects is required according to 23 CFR 450.334. This list is published by the Ozarks Transportation Organization each year in September. The list is online at www.OzarksTransporation.org; at the OTO offices (2208 W. Chesterfield Boulevard, Suite 101, Springfield, MO); or can be mailed/faxed by contacting 417.865.3042. This list includes all funding obligated during the preceding federal fiscal year. An obligation is a commitment of the federal government's promise to pay for the federal share of a project's eligible cost. This commitment occurs when the project scope of work is authorized and the federal funds are obligated in the FHWA Federal Management Information System (FMIS).

ENVIRONMENTAL JUSTICE

Environmental justice is a fundamental ideal that ensures federally funded plans and projects do not create a disproportionately adverse effect on minorities, low-income, disabled, elderly and/or under age 18 populations. This ideal is built on the framework of Title VI of the Civil Rights Act of 1964, which states, "No person in the United States shall, on the ground of race, color, or national origin, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any program or activity receiving Federal financial assistance." In 1994, President Clinton issued an Executive Order directed to all Federal agencies to consider and address the effects of all program, policies, and activities on "minority and low-income populations." This has been further expanded to include the elderly, disabled, and the under 18-years of age populations. President Bush signed an Executive Order in 2000, expanding protection against national origin discrimination, by ensuring programs are accessible by people with limited English proficiency.

Federally funded recipients are to ensure that there are no disproportionate adverse impacts in these communities, or those considered transportation dependent due to age or physical limitations, when allocating or spending federal funds. These recipients are also required to review the benefits and burdens of projects and programs (in this case, transportation improvements) are balanced between the population at large and those traditionally underserved in the planning and programming process.

While it is difficult to make any significant change to the transportation system without negatively affecting someone, the focus of environmental justice is on these impacts and alternative solutions. Any major

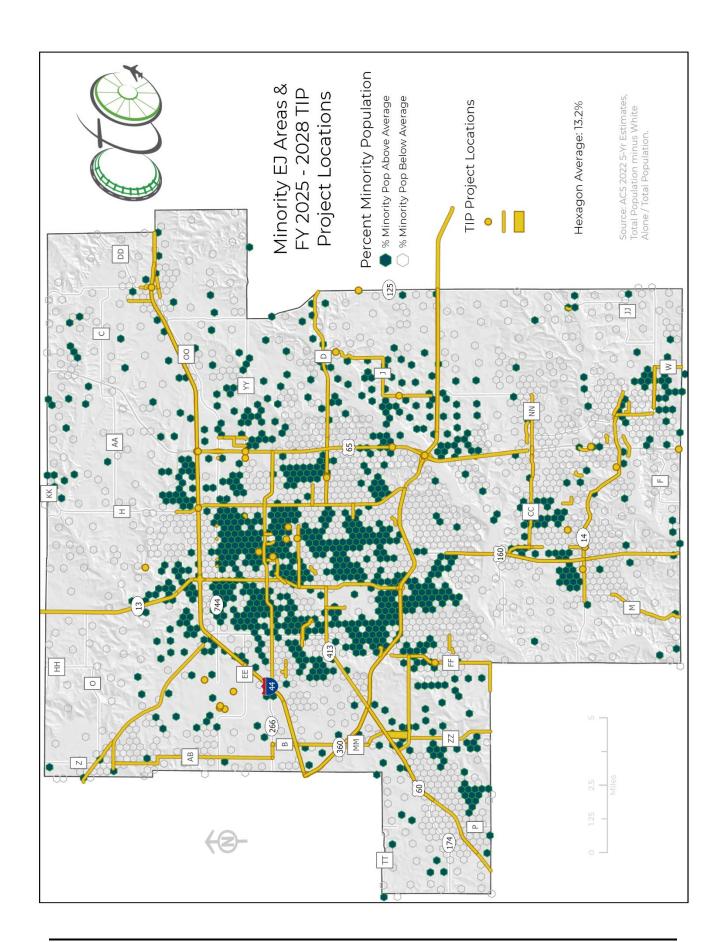

transportation system change should first consider whether society will be better off with the change, and second, determine the distributional impacts. The first consideration addresses the economic efficiency of a project; that is benefit-cost analysis. The second addresses the equity of who will receive more of the benefits and who will pay more of the costs. This question of equity is the concern of environmental justice. If it is determined that a project negatively impacts a population, the project can be rejected or the population impacted can be compensated. Should a project still move forward, attempts should be made to minimize the negative impacts.

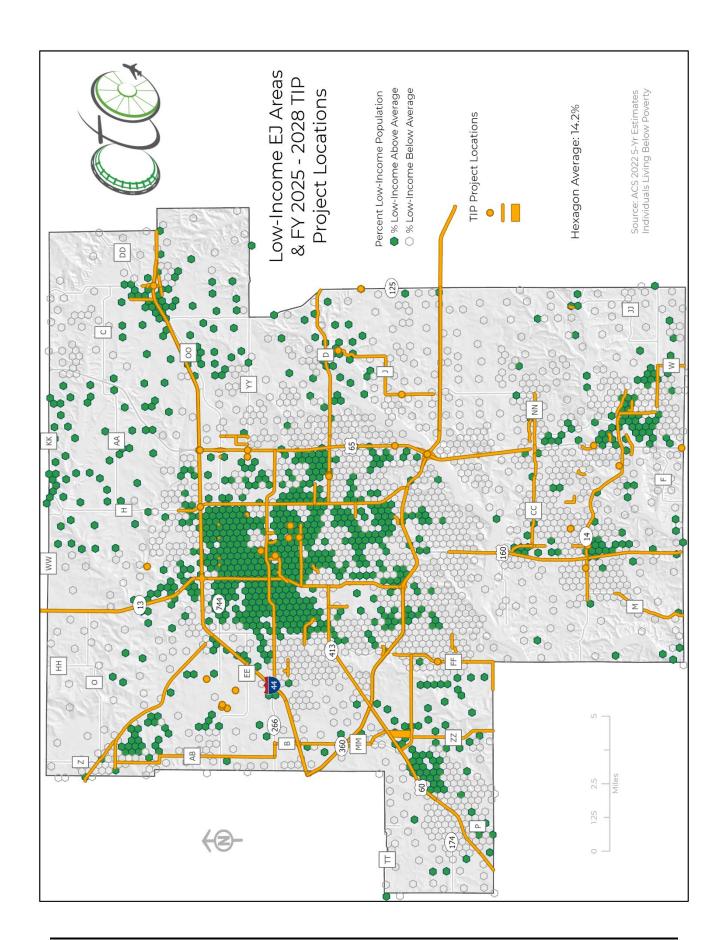

IDENTIFYING PROJECTS IN AREAS OF ENVIRONMENTAL JUSTICE CONCERN

OTO has identified minority and Hispanic, low-income, disabled, elderly and youth, and limited English proficiency populations within the OTO region. Federal guidance identifies significant areas as those which contain more of the vulnerable population than the average for the region. The location of these populations has been compared to the location of the constrained projects included in the Long Range Transportation Plan. The projects included in the TIP, which identify with this analysis, have been marked as projects of potential Environmental Justice concern via a checkmark on the individual project detailed report page. This is to alert project sponsors that these projects could need additional analysis during the NEPA process.

OTO has also developed an Equity Index that compares the OTO region to a variety of factors which help identify underserved populations. This can be found on the OTO website at https://experience.arcgis.com/experience/bac0937f5e4a48878381f493aaad7988/.

The following pages show how the projects in the TIP interface with areas with populations higher than the OTO average for minorities and those who are impoverished. An interactive map of these areas can be found here - https://oto.maps.arcgis.com/apps/dashboards/9e24ea953642461d983be2c7346cc9fa. Over 150 projects in the TIP are marked as having environmental justice considerations, equating to more than \$461 million dollars over four years of programmed funding.

PERFORMANCE BASED PLANNING

SECTION B

NATIONAL GOALS AND PERFORMANCE MEASURES

OTO GOALS AND PERFORMANCE MEASURES

PROGRAMMING FOR PERFORMANCE

PERFORMANCE MEASURES

NATIONAL GOALS AND PERFORMANCE MEASURES

The Moving Ahead for Progress in the 21st Century Act, or MAP-21, integrated performance measures into the planning and programming aspects of transportation investment. MAP-21 established seven National Goals as the focus of the Federal-aid highway program. The FAST (Fixing America's Surface Transportation) Act and Infrastructure Investment and Jobs Act both provided for continuation of these goals. Guidance has been released listing the required performance measures to achieve the national goals. The state DOTs, MPOs, and transit agencies are required to coordinate target setting for these measures. MPOs must set their targets within 180 days of the state. MPOs may choose to set their own targets or to program in support of the state and transit agency targets. OTO will make this decision on a case-by-case basis.

1. Safety

To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.

Measures:

- Number of Fatalities
- Rate of Fatalities per 100 million VMT
- Number of Serious Injuries
- Rate of Serious Injuries per 100 million VMT
- Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries

2. Transit Safety

To achieve a reduction in transit-related fatalities, serious injuries, and safety events, and improve mechanical reliability.

Measures:

- Fatalities: Total Number of Reportable Fatalities by Mode
- Fatalities: Rate per Total Vehicle Revenue Miles by Mode
- Injuries: Total Number of Reportable Injuries by Mode
- Injuries: Rate per Total Vehicle Revenue Miles by Mode
- Safety Events: Total Number Reportable Events by Mode

3. Transit Asset Management:

To maintain transit assets in a state of good repair.

Measures:

- Equipment (non-revenue service vehicles) State of Good Repair
- Facilities State of Good Repair
- Infrastructure State of Good Repair
- Rolling Stock State of Good Repair
- Safety Events: Rate per Total Vehicle Revenue Miles by Mode
- System Reliability: Mean Distance between Major Mechanical Failures by Mode

4. Infrastructure Condition

To maintain the highway infrastructure asset system in a state of good repair.

Measures:

- Percentage of NHS Bridges Classified as in Good Condition
- Percentage of NHS Bridges Classified as in Poor Condition

- Percentage of Pavements of the Interstate in Good Condition
- Percentage of Pavements of the Interstate in Poor Condition
- Percentage of Pavements of the non-Interstate NHS in Good Condition
- Percentage of Pavements of the non-Interstate NHS in Poor Condition

5. System Reliability

To improve the efficiency of the surface transportation system.

Measures:

- Interstate Travel Time Reliability Measure Percent of Person-Miles Traveled on the Interstate that are Reliable
- Non-Interstate NHS Travel Time Reliability Measure Percent of Person-Miles Traveled on the non-Interstate NHS that are Reliable

6. Freight Movement and Economic Vitality

To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.

Measures:

Freight Reliability Measure – Truck Travel Time Reliability (TTTR) Index

7. Congestion Reduction

To achieve a significant reduction in congestion on the National Highway System.

Measures:

- Peak Hour Excessive Delay (PHED) Measure Annual Hours of PHED per Capita (not applicable to OTO)
- Non-Single Occupancy Vehicle Travel (SOV) Measure Percent of non-SOV Travel (not applicable to OTO)

8. Environmental Sustainability

To enhance the performance of the transportation system while protecting and enhancing the natural environment.

Measures:

Emissions Measure – Total Emissions Reduction (not applicable to OTO)

9. Reduced Project Delivery Delays

To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

SAFETY TARGETS

After review of the information, at its meeting on November 16, 2023, the OTO Board of Directors voted to support the statewide safety targets for Calendar Year (CY) 2024, which are based on a rolling five-year average.

Besides the programming efforts described at the end of this Section, the OTO works with many safety programs in the region, including the MoDOT Southwest District Coalition for Roadway Safety (Show-Me Zero) and the hosting of the Traffic Incident Management Committee. Through the Southwest Coalition, OTO has been able to secure cones and safety vests for emergency responders in the region. Bicycle and pedestrian safety is monitored by the OTO Bicycle and Pedestrian Advisory Committee through review of crash data and discussion among local jurisdictions on ways to improve safety. OTO has also recently secured funding to complete a Safe Streets and Roads for All grant through FHWA to develop a Safety Action Plan.

TRANSIT SAFETY TARGETS

City Utilities, the sole fixed-route transit operator and recipient of FTA 5307 funding, has developed and adopted their own Public Transit Agency Safety Plan. At its meeting on January 19, 2023, the OTO Board of Directors voted to support the safety targets set by City Utilities Transit. OTO was informed by CU Transit that the targets would not be changing for 2024 and will coordinate with City Utilities to set revised targets for 2025.

TRANSIT ASSET MANAGEMENT TARGETS

City Utilities, as a Tier II transit agency, has partnered with the State of Missouri on their Transit Asset Management (TAM) Plan, which was updated in October 2022. MoDOT collected and evaluated transit data and used this information to set targets, which will be evaluated on an annual basis as inventory changes. These targets were coordinated with the applicable transit agencies and MPOs. City Utilities agrees to manage their assets in support of the state targets. At its regularly scheduled meeting on January 19, 2023, the OTO Board of Directors accepted the Transit Asset Management Targets in the MoDOT TAM Plan.

INFRASTRUCTURE CONDITION TARGETS

Pavement and Bridge Targets are a combination of two- and four-year targets. At its meeting on January 19, 2023, the OTO Board accepted the MoDOT Pavement and Bridge Targets, agreeing to plan and program in support of these targets.

SYSTEM PERFORMANCE TARGETS

System Performance, which includes system reliability and freight reliability, is also a combination of two- and four-year targets. At its meeting on January 19, 2023, the OTO Board accepted the MoDOT System Performance Targets, agreeing to plan and program in support of these targets.

OTO GOALS AND PERFORMANCE MEASURES

Federal surface transportation authorizing legislation further requires a discussion of performance target achievement in the Transportation Improvement Program. OTO did, however, adopt regional, non-federally required goals and performance measures in its long range transportation plan, *Journey 2035*, adopted in December 2011. These same regional performance measures were carried into *Transportation Plan 2040*, as well as *Destination 2045*.

Integration of these regional performance measures into the OTO prioritization process for the statewide transportation improvement program can be found in Section E: Federal Highway/MoDOT Eligible Projects.

DESTINATION 2045 GOALS

- 1. A safe transportation system for all users on all modes
- 2. Preserve existing transportation assets and promote fiscal responsibility
- 3. Connected, integrated, multi-modal system
- 4. Build a transportation system that supports a resilient region that is prepared for the future
- 5. Build quality projects that implement best design and engineering practices

Performance Measure	Target	FY 2025-2028 TIP Projects
Vehicle Miles Traveled per Capita	That VMT per Capita will grow no more than 5 percent from its peak in 2004, at a value of 19, by 2035. Growth should be captured in other modes	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Modal Balance	Decrease "Drove Alone" to 75 percent for the region by 2035	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Bicycle/Pedestrian Network Completion	If, on average, 4 miles of sidewalk are added each year within the OTO area, but no new roadways, by 2035, the total percent of roadways with sidewalks would be 33.5	ADA, pedestrian, and bicycle accommodations; Capacity and efficiency improvements; Transit stop connections
Total Disabling Injury and Fatal Crashes per Million Vehicle Miles Traveled	That disabling injury and fatal crashes/MVMT will continue a downward trend as shown in the above graphic	Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
On-Time Performance of Transit System	The CU service standard is 90 percent. The system will be considered to have acceptable on-time performance at this 90 percent level	Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Housing Units within ¼-mile of a Bus Route	That the percent of housing units within the CU Transit service area and the OTO area within ¼-mile of a bus route is on the upward trend between now and 2035	Transit operations; Transit service coordination

Performance Measure	Target	FY 2025-2028 TIP Projects
Average Commute Time	Keep the average commute time less than 25 minutes by 2035	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Peak Travel Time	That less than 20 percent of the OTO area roadways will be severely delayed	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Roadways in Good Condition	That 85 percent or more of the Major Roads in the OTO region are in Good condition	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Bridge Condition	That the percent of bridges in fair or better condition will stay above 90 percent	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Ozone Levels	That the region will be able to demonstrate transportation conformity for its plans, programs, and projects	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination

PROGRAMMING FOR PERFORMANCE

The projects included in the FY 2025-FY 2028 Transportation Improvement Program address these national and regional measures, targets, and goals in a variety of ways. Programmed projects include ADA, pedestrian, and bicycle accommodations. This adds to the reduction of VMT per capita, increased modal balance, bicycle/pedestrian network completion, improved average commute and peak travel time, and maintaining

acceptable air quality. Nearly \$107 million is programmed for bicycle and pedestrian projects and projects that include bicycle and pedestrian accommodations.

The TIP includes numerous safety projects that address roadway and bicycle/pedestrian infrastructure, work-zone safety, and the safety and security of the transit system. These projects support a reduced crash rate and the improved condition of area roads and bridges. Many pavement improvements and railroad crossing improvements benefit these factors as well. Nearly \$225 million in projects addressing safety has been programmed.

Several roadways and intersections in the region suffer from congestion, per the OTO Congestion Management Process. These bottlenecks are addressed through capacity and efficiency improvements. The LRTP and STIP Prioritization processes emphasize system performance in the criteria used to score projects.

Infrastructure condition is addressed through numerous resurfacing and reconstruction projects. The MoDOT funding distribution process puts funding toward asset management before it can be used for system expansion and other types of projects. With MoDOT's focus on taking care of the existing system, this is even more pronounced in how funding is applied in the OTO region. About 44 percent of funding is dedicated to Asset Management projects. Other major projects on the system have the benefit of improving infrastructure also in need of maintenance, even if that is not the overall goal of the project.

The TIP continues to support the transit system as well, including technology projects that will improve transit operations. Coordination of service, with support for service outside of the City Utilities Transit region is also addressed. Transit State of Good Repair is provided by preventative maintenance and bus replacement projects totaling \$15 million. Transit Safety is provided through funds available to City Utilities Transit and is programmed at over \$1.2 million over the life of this TIP.

PROJECTS

SECTION C - STATUS OF PRIOR YEAR PROJECTS

STATUS OF PRIOR YEAR PROJECTS

The tables below show the status of projects that appeared in the prior Transportation Improvement Program, but do not appear in the FY 2025-2028 TIP.

SECTION D

TIP#	Project Description	Type of Improvement	Status
NA1300	Runway Pavement Condition Study and Master Plan Update	Master Plan Update	Complete
NA1603	Taxiway Bravo Reconstruction and Direct Access Mitigation	Pavement mitigation to prevent aircraft direct access to runway from Taxiways Bravo at Taxiway November.	Under Construction
NA1801	Reconstruction of the Cargo Apron	Cargo apron construction north of Taxiway Bravo - includes the center portion of the current cargo apron.	Under Construction
NA2103	Taxiway November Reconstruction from Taxiway Alpha to Runway 20	Reconstruct Taxiway November from approach end of Runway 20 to Taxiway Alpha. Construction of General Aviation Apron Rehabilitation.	Under Construction
NA2501	Terminal Apron Expansion	This project includes the expansion of the Terminal Apron to the north edge. The pavements are shown on the January 24, 2013 approved ALP.	Under Construction

SECTION E

TIP#	Project Description	Type of Improvement	Status
BA2402	Weaver Road Improvements	Scoping for roadway improvements from east of Rte. FF to Cloverdale Lane.	In Progress
CC1802	Route 160 Roadway Improvements	Intersection improvements at Rte. CC near Nixa.	Under Construction
CC1901	US 65 Capacity Improvements from CC to 14	Add lanes from Rte. CC to Rte. 14 in Ozark.	Under Construction
CC1902	US 65 Capacity Improvements from 14 to F	Add lanes from Rte. 14 to Rte. F and rehabilitate bridges over the Finley River in Ozark. Project involves bridges A0646 and A3110.	Under Construction
CC2101	Route 14 High Friction Surface Treatment	High friction surface treatment from west of Carroll Road to west of Hilltop Court and at Richwood Road.	Complete
CC2102	US 160 Bridge Rehabilitation and Intersection Improvements at RT AA	Rehabilitate northbound bridge over the James River and add turn lanes and replace signal at Rte. AA. Project involves bridge A1198.	Under Construction

TIP#	Project Description	Type of Improvement	Status
CC2103	Nelson Mill Bridge	Rehabilitation, widening, and redecking of Nelson Mill Bridge, as well as widening the approach roadway to match the new bridge width.	Complete
CC2303	RT AA and RT JJ Pavement Preservation Treatment	Pavement preservation treatment Rte. AA from Rte. 160 to Blue Springs Road (end of state maintenance) and on Rte. JJ from Rte. 125 to Rte. 14.	Under Construction
CC2304	Green Bridge Replacement	Bridge replacement of Green Bridge in Christian County.	Removed from TIP
EN1706	Scoping for ADA Improvements	Scoping for ADA improvements at various locations in the urban Southwest District.	Complete
EN1901	Route 744 ADA Improvements	Upgrade pedestrian facilities to comply with the ADA Transition Plan on Kearney Street at various locations between Rte. 13 (Kansas Expressway) and Loop 44 (Glenstone Avenue) in Springfield.	Under Construction
EN1904	Battlefield Third St. Sidewalk Connection	Sidewalk connections in Battlefield along Third St./Clairborne St./Fourth St./Elm St. into Cherokee Trail of Tears Park from Route FF to Battlefield City Hall.	Complete
EN1914	ADA Improvements on Nature Center Way	Upgrade pedestrian facilities to comply with the ADA Transition Plan on Nature Center Way from 0.1 miles east of Republic Road to end of route.	Under Construction
EN2002	ADA Improvements at Various Locations	Upgrade pedestrian facilities to comply with the ADA Transition Plan at various locations on Loop 44, Rte. EE, Rte. YY, Outer Road 65, Rte. 160 in Springfield, Rte. 14, Rte. CC, Rte. J and Rte. NN in Ozark, Rte. M in Nixa and Rte. OO in Strafford.	Under Construction
EN2003	Kansas Expy ADA Upgrades I- 44 to 60	Upgrade pedestrian facilities to comply with the ADA Transition Plan and add sidewalk at various locations on Kansas Expressway from north of I-44 to James River Freeway (Rte. 60).	Under Construction
EN2005	Kearney and Mulroy ADA Improvements	Upgrade pedestrian facilities to comply with the ADA Transition Plan at various locations on Kearney Street from east of Loop 44 (Glenstone Avenue) to LeCompte Road.	Under Construction
EN2006	Kearney ADA Improvements West Bypass to Kansas Expressway	Upgrade pedestrian facilities to comply with the ADA Transition Plan on Kearney Street from Rte. 160 (West Bypass) to Rte. 13 (Kansas Expressway) in Springfield.	Under Construction
EN2007	ADA Sidewalk Upgrade on Chestnut and Glenstone	Upgrade pedestrian facilities to comply with the ADA Transition Plan at various locations on Chestnut Expressway from east of Glenstone Avenue (Bus. 65) to Belcrest Avenue in Springfield.	Under Construction

TIP#	Project Description	Type of Improvement	Status
EN2008	Chadwick Flyer Jackson to Clay	Construction of (1) approximately 3,200 linear feet of the Chadwick Flyer trail between Clay Street and Jackson Street, (2) approximately 500 linear feet of trail running northwest from Jackson, west of 12th Street, to Diane Street, and (3) two pedestrian underpasses along Highway 14 connecting the trail segments to the south side of Highway 14.	Complete
EN2010	Shuyler Creek Trail	Design, right-of-way acquisition, and construction for approximately 1.7 miles of trail. Project will allow for the extension of the Shuyler Creek Trail to Elm Street/Farm Road 182 and along Farm Road 182 to the entrance of Wilson Creek Battlefield, east of Republic.	Under Construction
EN2011	Trail of Tears Elm to Somerset	Constructing approximately 2,200 feet of trail connecting Elm Street and Somerset Street through the Trail of Tears Park, including the widening of some existing trail.	Complete
EN2103	Norton Road ADA Improvements in Springfield	Upgrade pedestrian facilities to comply with the ADA Transition Plan on Norton Road near Rte. 13 in Springfield and on Rte. Z at the Frisco Highline Trail north of Jackson Street in Willard.	Complete
EN2202	RT P ADA Transition Plan Improvements US 60 to Grace Street in Republic	Upgrade pedestrian facilities to comply with the ADA Transition Plan from Rte. 60 to Grace Street and on Rte. 174 from Lindsey Avenue to Walnut Avenue in Republic.	Under Construction
EN2203	Chadwick Flyer Phase III	Construction of Chadwick Flyer Phase III near Lake Springfield.	Complete
EN2204	Chadwick Flyer Phase II	Construction of Chadwick Flyer west of US 65 in Ozark.	Under Construction
EN2205	Wilson's Creek Boulevard Trail	Bicycle and pedestrian improvements on Rte. ZZ from Rte. M to Farm Road 182 in Republic.	Under Construction
EN2301	Regional Trail Planning Services	Regional trail planning services to (1) refine existing trail alignments, (2) engage with landowners, (3) engage with OTO municipalities, and (4) increase community interest in trails.	In Progress
GR1502	East/West Arterial (Riverbluff Blvd) Phase I	Design/Environmental Approval from Farm Road 141 to Campbell Avenue for the future East/West Arterial.	Removed from TIP/In-Progress with Local Funds
GR1707	East/West Arterial – Campbell to Kissick	Scoping for the East-West Arterial from Campbell to Kissick.	Removed from TIP

TIP#	Project Description	Type of Improvement	Status
GR1901	Kansas Extension Phase I	New roadway from Republic Road to Plainview with bicycle and pedestrian accommodations.	Complete
GR1902	Kansas Extension Phase II	New roadway from Plainview to Farm Road 190 at Cox Road with bicycle and pedestrian accommodations.	Under Construction
GR1907	Route 60 Resurfacing Highland Springs to 125	Pavement resurfacing from Highland Springs Boulevard east of Springfield to west of Rte. 125 in Rogersville.	Complete
GR2003	US 65 Pavement Resurfacing I-44 to KK	Pavement resurfacing on northbound lanes from north of I-44 in Springfield to Rtes. KK and A.	Under Construction
GR2004	744 Pavement Resurfacing	Pavement resurfacing on Route 744 from east of Loop 44 (Glenstone Avenue) to Mulroy Road, and on Mulroy Road from Rte. OO to I-44.	Under Construction
GR2007	Kansas Expy Resurfacing I-44 to 60	Pavement resurfacing on Kansas Expressway (Rte. 13) from north of I-44 to James River Freeway (Rte. 60).	Under Construction
GR2010	Route ZZ and FR 182 Add Roundabout	Add roundabout on Wilson's Creek Boulevard at Farm Road 182.	Under Construction
GR2011	Route 60 CRISI Project	Railroad crossing safety improvements on various locations on the Route 60 corridor from O'Neal Road to FR 194 and at various BNSF crossings on Main St, Hampton Ave., Hines St. and Route 174 in Republic.	Under Construction
GR2106	Mill/Fill and ADA Upgrades on FR 135 and FR 102	Mill/Fill and ADA upgrades on Farm Road 135 (Golden Ave.) from Republic Road to City Limits and Farm Road 102 (Valley Water Mill) from Farm Road 171 to Farm Road 175.	Complete
GR2202	Route C Pavement Resurfacing US 65 to MO 125 in Strafford	Pavement resurfacing on Route C from Route 65 to Route 125 north of Strafford.	Under Construction
GR2204	Route DD Pavement Resurfacing Route 125 to Webster County	Pavement resurfacing on Route DD from Route 125 in Strafford to the Webster County line.	Under Construction
GR2207	Route WW Pavement Resurfacing MO 13 to Route H	Pavement resurfacing and add shoulders on Route WW from Route 13 to Route H.	Under Construction
GR2209	MO 360/US 60 Bridge Rehabilitations	Bridge rehabilitation on eastbound bridge over Farm Road 156 and BNSF Railroad and on Rte. 60 eastbound bridge over South Creek west of Rte. 160. Project involves bridges A5842 and A4148.	Under Construction
GR2402	Striping Upgrades in Greene County	Striping upgrades on I-44 at various locations from 0.1 miles east of Rte. 360 to 2 miles east of Rte. 125 in Strafford, on Rte. 65 from I-44 to Rte. 60 and on Rte. 13 from Rte. WW to I-44.	Under Construction

TIP#	Project Description	Type of Improvement	Status
MO1405	Surveying for Excess Right-of- Way	Surveying to sell excess right-of-way in the urban Southwest District.	Complete
MO1719	Scoping for Bridge Improvements	Scoping for bridge improvements at various locations in the urban Southwest District.	Complete
MO1720	Scoping for Bridge Preventative Maintenance	Scoping for bridge preventive maintenance at various locations in the urban Southwest District.	Complete
MO1721	Scoping for Safety Improvements	Scoping for safety improvements at various locations in the urban Southwest District.	Complete
MO1722	Scoping for Pavement Improvements on Major Routes	Scoping for pavement improvements on major routes in the urban Southwest District.	Complete
MO1723	Scoping for Pavement Improvements on Minor Routes	Scoping for pavement improvements on minor routes at various locations in the urban Southwest District.	Complete
MO2106	Add ITS for Ozarks Traffic in Various Locations in OTO Area	Add ITS for Ozarks Traffic at various locations on Route 60 (James River Freeway) in Springfield, Route FF (West Bypass) near Battlefield, and various locations in Ozark.	Complete
MO2107	Upgrade ITS Message Boards in OTO Area	Upgrade ITS message boards at various locations in the Urban Southwest District.	Complete
MO2202	Various Routes Pavement Preservation	Pavement preservation treatment on Rte. 14 from Antler Drive to Rte. M in Nixa, on Rte. F from Riverdale Road to Rte. 65 in Ozark, and on Rte. DD from Rte. 125 to the end of state maintenance near Strafford.	Complete
MO2205	Replace Signs at Various Locations	Replace signs at various locations on Rte. 744 (Kearney Street), Loop 44 (Chestnut Expressway), Bus. 65 (Glenstone Avenue), Rte. 13 (Kansas Expressway), Rte. 413 (Sunshine Street), and Rte. 160 (West Bypass) in Greene and Christian Counties.	Complete
MO2206	Bridge Improvements at Various Locations	Bridge rehabilitations at US 65 northbound over S. Dry Sac Creek, Republic Road over Route 60 in Springfield, Route 14 over Route 65 in Ozark and Route M over McCaferty Branch. Project involves bridges A3361, A4181, A3514 and A3109.	Under Construction
MO2207	Job Order Contracting for Guard Cable and Guardrail Repair (2023)	Job Order Contracting for guard cable and guardrail repair in the urban Southwest District.	Under Construction
MO2211	Concrete Repairs at Various Locations (2022)	Concrete repairs at various locations in the urban Southwest District.	Complete

TIP#	Project Description	Type of Improvement	Status
MO2212	Concrete Repairs at Various	Concrete repairs at various locations from	Under Construction
IVIOZZIZ	Locations (2023)	Rtes. A and KK to 0.9 miles south of Rte. F	Onder Construction
	200410113 (2023)	in Ozark and on Rte. 60at various locations	
		from Farm Road 194 near Republic to Rte.	
		125 in Rogersville.	
MO2213	Job Order Contracting for	Job Order Contracting for bridge repairs at	Under Construction

		Center Way at Reed Avenue in Springfield.	
SP1904	Glenstone Pavement	Pavement resurfacing on Glenstone	Under Construction
	Resurfacing RR S. of Chestnut	Avenue from BNSF Railway south of	
	to Battlefield	Chestnut Expressway (Loop 44) to	
		Battlefield Road in Springfield.	
SP1908	Sunshine Street Bridge over	Bridge replacement, add sidewalks, and	Under Construction
SP1908	Sunshine Street Bridge over MNA Railroad	· -	Under Construction
SP1908		Bridge replacement, add sidewalks, and	Under Construction
SP1908		Bridge replacement, add sidewalks, and ADA Transition Plan improvements on	Under Construction
SP1908		Bridge replacement, add sidewalks, and ADA Transition Plan improvements on Sunshine Street from 0.1 miles east of	Under Construction

TIP#	Project Description	Type of Improvement	Status
SP2002	Pavement Resurfacing on Chestnut Operational, Safety, and ADA	Pavement resurfacing on Chestnut Expressway from 0.1 miles west of Glenstone Avenue (Bus. 65) to 0.1 miles east of Eastgate Avenue and on Eastgate Avenue from 0.1 miles north of Cherry Street to 0.3 miles north of Chestnut Expressway in Springfield. Modify access, signals, ADA Transition Plan	Under Construction Under Construction
37 2003	Improvements on Glenstone St. Louis to 60	improvements and replace bus stop pads from Valley Water Mill Rd. to James River Freeway (Rte. 60) in Springfield.	onder construction
SP2006	Kearney Resurfacing from Airport to Kansas Expressway	Pavement resurfacing on Kearney Street from Springfield-Branson National Airport to west of Rte. 13 (Kansas Expressway) in Springfield.	Under Construction
SP2008	West Bypass Resurfacing I-44 to Sunshine	Pavement resurfacing on West Bypass from I-44 to Sunshine Street (Rte. 413).	Complete
SP2009	West Bypass Resurfacing Sunshine to 60	Pavement resurfacing on West Bypass from Sunshine Street (Rte. 413) to north of James River Freeway (Rte. 60).	Complete
SP2013	Chestnut Pavement Resurfacing College to Kansas Expressway	Pavement resurfacing on Chestnut Expressway from Scenic Avenue to west of Kansas Expressway (Rte. 13).	Under Construction
SP2014	ADA Improvements Sunshine, National, Battlefield	ADA improvements at various locations on Sunshine Street, National Avenue, and Battlefield Road.	Under Construction
SP2015	Grant Avenue Connect Parkway Project	The project will reconstruct approximately 3.3 miles of a multi-use bicycle and pedestrian path on Grant Avenue starting at Downtown Springfield, ending at Sunshine Street, including bike lanes, traffic calming, intersection improvements, a grade-separated crossing at Fassnight Creek, bridge enhancement, utility upgrades, fiber connectivity, additional crossing and signal timing improvements, outdoor incubator, and creek daylighting.	Under Construction
SP2016	Traffic Signal System Improvements	Traffic signal system improvements in Springfield at various locations, including cabinet replacements, and advanced vehicle detection installations.	Complete
SP2114	Galloway Street Improvements – GOVCS	Add center turn lane, multi-use path and roundabouts on Galloway Street from Luster Ave. to Lone Pine Ave.	Construction Obligated
SP2204	James River Freeway Add Lanes Kansas to Campbell	Add lanes on James River Freeway from Kansas Expressway (Rte. 13) to west of Campbell Avenue (Rte. 160) in Springfield.	Under Construction

TIP#	Project Description	Type of Improvement	Status
SP2205	James River Freeway Add Lanes Campbell to National	Add lanes and sound abatement on James River Freeway from west of Rte. 160 (Campbell Avenue) to National Avenue in Springfield. Project involves bridges A4182 and A4183.	Under Construction
SP2206	Chestnut Expressway Pavement Resurfacing	Pavement resurfacing on Chestnut Expressway from Lullwood Street to Scenic Avenue and from east of Kansas Expressway (Rte. 13) to 0.1 miles east of Delaware Avenue in Springfield.	Under Construction
SP2207	US 60 Pavement Resurfacing on Aux Ramps Kansas to Campbell	Pavement resurfacing on Rte. 60 (James River Freeway) auxiliary ramps from Kansas Expressway (Rte. 13) to Campbell Avenue (Rte. 160) in Springfield.	Under Construction
SP2208	US 65 Pavement Resurfacing at Sunshine Interchange	Pavement resurfacing on various sections at the Rte. D (Sunshine Street) interchange.	Under Construction
SP2209	Battlefield Road Resurfacing at US 65 in Springfield	Pavement resurfacing from Moulder Avenue to Ruskin Way in Springfield.	Under Construction
SP2210	Cherry Street Bridge Rehabilitation Over US 65	Pavement resurfacing, ADA Transition Plan improvements, and bridge rehabilitation over Rte. 65 from Ingram Mill Avenue to Eastgate Avenue in Springfield. Project involves bridge A1652.	Under Construction
SP2211	Republic Street Bridge Rehabilitation over James River Freeway	Republic Street bridge rehabilitation over James River Freeway (Route 60) 0.5 miles east of Kansas Expressway (Route 13) in Springfield. Project involves bridge A4184.	Under Construction
SP2213	US 160 Scoping for Bridge Preventive Maintenance Over James River Overflow	Bridge deck sealing on northbound bridge over James River Overflow south of Springfield. Project involves bridge A1199.	Under Construction
SP2307	System Improvements on Kearney from Airport to LeCompte	Add lanes and modify signals on Kearney Street from Springfield-Branson National Airport to LeCompte Avenue.	Under Construction
SP2308	J-Turns on US 65 at Bluegrass Road	Add J-turn at US 65 and Bluegrass Road (Farm Road 94).	Under Construction

SECTION F

OA2301	ARPA 5310 Funding	Pandemic transportation support for seniors and individuals with disabilities.	Complete

PROJECTS

SECTION D - FEDERAL AVIATION ELIGIBLE PROJECTS

(NA) SPRINGFIELD-BRANSON NATIONAL AIRPORT

EXPLANATION OF FUNDING

AIRPORT IMPROVEMENT PROGRAM

The current aviation program, known as the Airport Improvement Program (AIP), was established by the Airport and Airway Improvement Act of 1982 (Public Law 97-248). Since then, the AIP has been most recently authorized with passage of the FAA Reauthorization Act of 2024. Funds obligated for the AIP are drawn from the Airport and Airway Trust Fund, which is supported by user fees, fuel taxes, and other similar revenue sources.

ELIGIBLE AIRPORTS

AIP grants funds for planning, development, or noise compatibility projects that are located at or associated with individual public-use airports (including heliports and seaplane bases). A public-use airport is an airport open to the public that also meets the following criteria:

- Publicly owned, or
- Privately owned but designated by FAA as a reliever, or
- Privately owned but having scheduled service and at least 2,500 annual enplanements.

To be eligible for an AIP grant, an airport must be included in the National Plan of Integrated Airport Systems (NPIAS). The NPIAS, which is prepared and published every two years, identifies public-use airports that are important to public transportation and contribute to the needs of civil aviation, national defense, and the postal service.

Recipients of grants are referred to as "sponsors." The description of eligible grant activities is described in the authorizing legislation (Title 49 USC, Chapter 471) and relates to capital items serving to develop and improve the airport in areas of safety, capacity, and noise compatibility. In addition to these basic principles, a sponsor must be legally, financially, and otherwise able to carry out the assurances and obligations contained in the project application and grant agreement.

ELIGIBLE PROJECTS

Eligible projects include those improvements related to enhancing airport safety, capacity, security, and environmental concerns. In general, sponsors can use AIP funds on most airfield capital improvements or repairs and in some specific situations, for terminals, hangars, and non-aviation development. Any professional services that are necessary for eligible projects — such as planning, surveying, and design — are eligible. Aviation demand at the airport must justify the projects, which must also meet Federal environmental and procurement requirements.

Projects related to airport operations and revenue-generating improvements are typically not eligible for funding. Operational costs — such as salaries, equipment, and supplies — are also not eligible for AIP grants.

The table below lists typical examples of eligible and ineligible projects; the list is not exhaustive. Questions about AIP eligibility should be directed to the appropriate regional airport office.

EXAMPLES OF ELIGIBLE PROJECTS

EXAMPLES OF INELIGIBLE PROJECTS

Runway construction/rehabilitation	Maintenance equipment and vehicles
Taxiway construction/rehabilitation	Office and office equipment
Apron construction/rehabilitation	Fuel farms
Airfield lighting	Landscaping
Airfield signage	Artworks
Airfield drainage	Aircraft hangars
Land acquisition	Industrial park development
Weather observation stations (AWOS)	Marketing plans
NAVAIDs such as REILs and PAPIs	Training
Planning studies	Improvements for commercial enterprises
Environmental studies	Maintenance or repairs of buildings
Safety area improvements	
Airport layout plans (ALPs)	
Access roads only located on airport property	
Removing, lowering, moving, marking, and lighting	
hazards

PROJECTS

SECTION E – FEDERAL HIGHWAY/MODOT ELIGIBLE PROJECTS

OTO SPONSORED PROJECTS

COST SHARES

LOCALLY SPONSORED PROJECTS

MODOT SPONSORED PROJECTS

BIKE/PED PROJECT PRIORITIZATION

The Ozarks Transportation Organization has established priorities for bicycle, pedestrian, and trail improvements. The majority of these improvements are funded through OTO's competitive selection process for the use of STBG-Urban Set-Aside (TAP) funding. The region has also been fortunate to receive additional suballocated funding through the federal appropriations process and has elected to use offset STBG-Urban funding to fulfill the goals of the Regional Bicycle Pedestrian Trail Investment Study and the creation of a regionally connected trail system.

TRANSPORTATION ALTERNATIVES PROGRAM

Under MAP-21, Transportation Enhancement funding was replaced by the Transportation Alternatives Program. The FAST (Fixing America's Surface Transportation) Act moved this program to be a set-aside under the renamed Surface Transportation Block Grant program. The Infrastructure Investment and Jobs Act doubled the amount of this set-aside. For the purposes of this document, the STBG set-aside funding will continue to be referred to as TAP funding. This program provides for a variety of alternative transportation projects, including many that were previously eligible activities under separately funded programs. TAP replaced the funding from pre-MAP-21 programs including Transportation Enhancements, Recreational Trails, Safe Routes to School, and several other discretionary programs, wrapping them into a single funding source. TAP is funded by contract authority from the Highway Account of the Highway Trust Fund. Funds are subject to the overall Federal-aid obligation limitation.

ELIGIBLE SPONSORS

Eligible sponsors for TAP funding include:

- local governments, including city and county governments
- regional transportation authorities
- MPOs that represent an area smaller than 200,000 population
- transit agencies
- natural resource or public land agencies
- school districts, local education agencies, or schools
- tribal governments
- any non-profit entity
- any other local or regional governmental entity with responsibility for oversight of transportation or recreational trails
- a State, at the request of another eligible entity

ELIGIBLE ACTIVITIES

Funds may be used for projects or activities that are related to surface transportation and described in the definition of "Transportation Alternatives." [23 USC 101(a)(29) or 23 USC 213 as such provisions were in effect on the day before the enactment of the FAST Act]

Construction, planning, and design of on-road and off-road trail facilities for pedestrians, bicyclists, and
other nonmotorized forms of transportation, including sidewalks, bicycle infrastructure, pedestrian and
bicycle signals, traffic calming techniques, lighting and other safety-related infrastructure, and
transportation projects to achieve compliance with the Americans with Disabilities Act of 1990 (42 U.S.C.
12101 et seq.).

- Construction, planning, and design of infrastructure-related projects and systems that will provide safe
 routes for non-drivers, including children, older adults, and individuals with disabilities to access daily
 needs.
- Conversion and use of abandoned railroad corridors for trails for pedestrians, bicyclists, or other nonmotorized transportation users.
- Construction of turnouts, overlooks, and viewing areas.
- Community improvement activities, including
 - o inventory, control, or removal of outdoor advertising;
 - o historic preservation and rehabilitation of historic transportation facilities;
 - vegetation management practices in transportation rights-of-way to improve roadway safety, prevent against invasive species, and provide erosion control; and
 - o archaeological activities relating to impacts from implementation of a transportation project eligible under this title.
- Any environmental mitigation activity, including pollution prevention and pollution abatement activities and mitigation to—
 - address stormwater management, control, and water pollution prevention or abatement related to highway construction or due to highway runoff, including activities described in sections 133(b)(11), 328(a), and 329; or
 - o reduce vehicle-caused wildlife mortality or to restore and maintain connectivity among terrestrial or aquatic habitats.

In addition to defined Transportation Alternatives (as described above), the following are also eligible:

- The recreational trails program under 23 USC 206.
- The safe routes to school program under §1404 of SAFETEA-LU.
- Planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.
- Activities in furtherance of a vulnerable road user safety assessment.

EVALUATION CRITERIA FOR SUBALLOCATED BICYCLE/PEDESTRIAN/TRAIL FUNDING

OTO receives suballocated TAP funding and awards projects on a competitive basis. While the scoring criteria evolves with each call for projects, dependent on current needs, the projects currently programmed were scored based on the following:

2022/2023 (INCLUDES BOTH CARBON REDUCTION AND TAP FUNDING)

Request for Expression of Interest

• Project readiness was the main determining factor for projects awarded through this process.

Sidewalk Cost Share

- Project sponsors that provide a total local match that exceeds 25% of the project's total cost are awarded a minimum of three points. Any match that exceeds 30%, or 35%, qualifies for additional points.
- A point is awarded for having an engineer's estimate for the budget and another for the alignment.
- Points are awarded for fitting within existing right-of-way, as well as including a buffer between the curb and sidewalk.
- Projects also receive points for enhancing the sidewalk network, meeting a known need, along a school
 route, demonstrating community support, connecting community facilities and vulnerable populations,
 and for connecting to a business district or major generators of pedestrian activities.

Bicycle and Pedestrian Infrastructure Funding

- A project will earn 5 points if it is located on one of the corridors evaluated in the Regional Bicycle and Pedestrian Trail Investment Study (RBPTIS).
- A project will earn 3 points if it is specifically mentioned in a community plan.
- Project previously submitted for REI or Sidewalk Cost Share.
- Project sponsors that provide a total local match that exceeds 25% of the project's total cost are awarded a minimum of three points. Any match that exceeds 30%, or 35%, qualifies for additional points.
- Points will be award to projects based on the types on connections made and the progress made towards creating a system that makes walking and bike more feasible.
- Connections could include neighborhood-to-neighborhood, neighborhood-to-commercial district, or connections to an existing trail or bus stop.
- Feasibility can be shown by highlighting obstacles or impediments the new connectivity overcomes.
 These could include major arterials, narrow streets, railroads, ADA-accessibility issues, transit, or system gaps.
- Points will be awarded based on the level of citizen participation. Participation can range from plan
 approval by city council and/or planning commission to a Facebook poll to a community meeting or
 open house.

MoDOT receives a statewide allocation of TAP funding, as well. Currently, this funding is dedicated to the needs of the MoDOT ADA Transition Plan.

ROADWAY PROJECT PRIORITIZATION

REVENUE SOURCES

A detailed discussion of the federal, state, and local revenue sources and amounts of available funding may be found in Section G: Fiscal Constraint of this document.

LOCAL AGENCY SPONSORED PROJECT PRIORITIZATION

As part of the development of the Long Range Transportation Plan, *Destination 2045*, project needs were collected utilizing several methods:

- All jurisdictions were asked to submit a list of project needs containing both current needs and those that they felt would be needed within the plan horizon.
- MoDOT was asked to submit a list of projects which were needed on the state highway system.
- The travel demand model was run to determine which roads were operating at capacity deficiencies.
- The prior plan, Transportation Plan 2040, was reviewed for additional, not yet submitted, projects.
- The public was asked to provide input on project needs throughout the region.
- Those roadways which were considered to be severely congested by the OTO Congestion Management Process (CMP) were added to the list of projects.

To prioritize projects, OTO and the LRTP subcommittee developed a set of prioritization criteria factors based on the goals which had been set within *Destination 2045*.

Factor	Max Points
High Volume Corridors	8
Safety	40
Bike/Ped Safety	20
At-Grade RR Crossing	4
Multi-Modal	6
Environmental Justice	8
Current Congestion	15
Future Congestion	7
SW Freight Plan	2
Freight Traffic	4
Bridge Condition	6
Extending Life Cycle	4
Local Priority	15
TOTAL Points	140

Once projects were prioritized, the potential list was compared against the available amount of funding projected for the plan horizon. The results of this prioritization netted constrained and unconstrained project lists.

Projects selected for inclusion in the TIP are determined by several factors:

- Application submission by local jurisdiction
- Available funding
- Inclusion of project on Constrained Project List in *Destination 2045*

It is reasonable to expect that the local jurisdictions will use local sales tax dollars to expedite priority projects by cost sharing with both the local and state MoDOT offices.

The listing of projects is subject to regular review and modification. The project list provides a framework of transportation needs for the metropolitan area. Innovative funding mechanisms should be sought to fully develop as many of the project needs from both lists as possible.

Projects in the TIP correspond with the projects in the Constrained Project List in Destination 2045.

MODOT SPONSORED PROJECT PRIORITIZATION

Annually, MoDOT also develops the Statewide Transportation Improvement Program. A variety of project needs are addressed with this five-year program, first and foremost being taking care of the system. MoDOT must ensure that the current system is adequately maintained prior to considering any other type of project. This category includes pavement repair and rehabilitation, ITS operations, signal maintenance, ADA improvements, etc. The next set of needs are safety related. This includes guardrail and guard cable maintenance, site distance issues, and possibly intersection improvements at which accidents are very high. Finally, any remaining funding would go to fund regional needs as prioritized by the Ozarks Transportation Organization. These projects are derived from the OTO Long Range Transportation Plan Constrained Project List and the Priority Projects of Regional Significance.

To prioritize the eligible projects, OTO uses the prioritization factors from *Destination 2045*, with some modifications and updated data, such as volumes and crashes. This information is updated as available for each annual prioritization process. A working group of the Technical Planning Committee reviews the scoring results and considers other factors that may affect a project's priority. The prioritized list is then recommended to the

Technical Planning Committee and the Board of Directors. MoDOT then consults this list to determine scoping and construction projects that can be programmed after other needs are considered. Several factors affect how a project moves forward including design status, cost, ROW, and relation to other planned projects.

A number of MoDOT-sponsored projects in the FY 2025-2028 TIP were previously selected through this process. Due to inflation and funding availability, no new projects from the OTO prioritization list were added to the STIP this year. Several did move fiscal years, however.

Projects advanced a fiscal year between the FY 2024-2028 STIP and the Draft FY 2025-2029 STIP:

SP2310 - (2025, moved from 2026) I-44- Six lanes and pavement rebuild from Route 13 to Glenstone

Projects that stayed in the same fiscal year between the FY 2024-2028 STIP and the Draft FY 2025-2029 STIP:

- OK2102 (2025) CC Widening from US65 to Fremont in Ozark
- OK2202 (2025) CC/22nd Intersection Improvements in Ozark
- OK2203 (2025) 65/CC/J Ramp/Bridge Improvements
- ST2201 (2025) 125 Roundabout/Intersection Improvements in Strafford
- SP2203 (2025) I-44- Six lanes and pavement rebuild from Glenstone to US 65
- RP1704 (2025) MM Relocation and RR Bridge
- RP1703 (2025) MM Add lanes from I-44 to James River Freeway
- SP1413/SP1802 (2025) ADA/Safety Improvements on Sunshine
- OK2201 (2027) MO14 widening from 6th to 14th
- SP2301 (2027) 13/44 interchange Improvements- Phase I
- SP2302 (2028) 13 (Kansas) widening from Grand to Sunshine

Projects delayed a fiscal year between the FY 2024-2028 STIP and the Draft FY 2025-2029 STIP:

- NX2202 (2025, moved from 2024) Roundabout at Main and CC in Nixa
- SP2306 (2026, moved from 2025) Roundabouts at 266/AB and 266/B
- RP2303 (2028, moved from 2027) US 60 Improvements from James River Freeway to FR 103
- GR1403 (2029, moved from 2028) US60 Improvements from 65 to NN/J
- (2029, moved from 2028) Glenstone Operational and Pedestrian Improvements Phase II

NATIONAL HIGHWAY FREIGHT NETWORK

The FAST Act established a National Highway Freight Network (NHFN). This network is comprised of:

- Primary Highway Freight System (PHFS) 41,799 centerline miles
- Interstate Routes not on the PHFS approximately 10,265 centerline miles
- Critical Urban Freight Corridors (CUFC)
- Critical Rural Freight Corridors (CRFC)

The NHFN was created to strategically direct federal resources and policies toward improved freight performance in the United States. Since OTO is an MPO with a population less than 500,000, MoDOT has the responsibility, with OTO's consultation, to designated CUFC, which must:

- Connect an intermodal facility to the PFHS, the Interstate System, or another intermodal facility,
- Provide a bypass route for the PFHS,
- Serve a major freight generator, logistics center, or manufacturing and warehouse industrial land, and
- Be important for freight movement in the region.

As more guidance become available from the Bipartisan Infrastructure Law, OTO will work with MoDOT and other planning partners should there be any necessary changes.

DESIGNATION

Currently, Interstate 44 is the only route in the OTO region on the National Highway Freight Network, listed as part of the Primary Highway Freight System across the state of Missouri.

PROJECTS

SECTION F - FEDERAL TRANSIT ELIGIBLE PROJECTS

CU - CITY UTILITIES

MO - MISSOURI DEPARTMENT OF TRANSPORTATION

PROVIDERS

CITY UTILITIES

City Utilities is the primary fixed-route transit operator in the OTO region, and as such, is the designated recipient for Federal Transit Administration Funding. Fixed route service is provided within the City of Springfield seven days a week. City Utilities also offers paratransit service for those who cannot ride the fixed-route bus due to a disability or health condition. CU Transit operates both day and night routes, as well as on weekends and holidays. Routes and schedules may be found at http://www.cityutilities.net/transit/transit.htm.

Beyond operating the transit system, City Utilities has partnered with the City of Springfield to build sidewalks along bus routes and to construct ADA accessible bus stops. Using their Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310) and formerly New Freedom funding, this partnership has allowed for improved access along several major routes and near critical facilities.

MISSOURI STATE UNIVERSITY

Missouri State University contracts with a private provider for regular shuttle service in and around the MSU campus. This service is available to the public at no charge. The MSU routes run days and evenings, with limited service when school is not in session. MSU has multiple multi-modal parking facilities and transfer stations located across campus. The shuttle connects with downtown Springfield to service the University's expansion.

HUMAN SERVICE TRANSPORTATION PROVIDERS

Numerous agencies provide additional human-service transportation throughout the region. Some serve only their specific clients, and others, like OATS, Inc., provide demand-response service for the disabled and elderly in Springfield, and the general public in Christian and Greene Counties.

INTERCITY SURFACE TRANSPORTATION

The OTO region is currently served by two inter-city bus companies, Greyhound Lines, Inc., which serves 2,300 destinations in North America and Jefferson Lines, which has stops in fourteen states and nineteen stops in Missouri, including Springfield. There are 19 cities with Greyhound locations in Missouri, including Springfield, Kansas City, and St. Louis. Hollister, near Branson, is also served by Greyhound. The Greyhound bus station in Springfield shares the City Utilities Transit Center. Greyhound's service to Kansas City and St. Louis provides a connection to Amtrak service. Jefferson Lines, with 17 stops in Missouri, also uses the CU Transit Station in Springfield as a stop. Southwest Missouri is not served by passenger train service.

PROJECT PRIORITIZATION

The Transit section of the Transportation Improvement Program is intended to be a program of all federally- and state-funded transit projects.

REVENUE SOURCES

A detailed discussion of the federal, state, and local revenue sources and amounts of available funding may be found in Section G: Fiscal Constraint of this document.

5307 URBANIZED AREA FORMULA PROGRAM

The purpose of the Urbanized Area Funding Program is to make Federal resources available to urbanized areas and to governors for transit capital and operating assistance in urbanized areas and for transportation-related planning. An urbanized area is an incorporated area with a population of 50,000 or more that is designated by the U.S. Department of Commerce, Bureau of the Census.

PROJECT SELECTION PROCEDURE

As the designated recipient for FTA Section 5307 funding, City Utilities Transit's responsibilities include allocating the relevant apportionment among recipients in the urbanized area, in coordination with OTO, and identifying and selecting the projects that OTO will include in this TIP.

If another public entity that is legally eligible under federal transit laws desires to use Section 5307 funding, OTO must be contacted to start the process of cooperatively determining funding eligibility. This can be done at any time by calling the OTO Executive Director at (417) 865-3042, extension 102. Until another entity is determined to be eligible for this funding, an application process is not required for City Utilities to select the projects that will use this funding.

DIRECT RECIPIENT AND SUB-RECIPIENT ELIGIBILITY

FTA Circular 9030.1E, Chapter II, Section 8 defines direct recipient and sub-recipient eligibility, as well as outlines requirements that must be followed for Section 5307 funding to be used by an entity other than the designated recipient.

Essentially, the designated recipient may authorize a direct recipient to receive grants directly from FTA. The designated recipient must inform FTA of the arrangement in a "split letter," which establishes the allocation of Section 5307 funds in an urbanized area over 200,000 population. A public agency other than the designated recipient may apply for some or all of the 5307 apportionment if (1) the designated recipient authorizes the public agency to do so, (2) the public agency submits an independent grant application, and (3) the designated recipient and the public agency execute a supplemental agreement releasing the designated recipient of any liability. The amount of funds available to direct recipients is determined cooperatively by public transit providers, the OTO, and the designated recipient.

A section 5307 recipient, whether a designated or direct recipient, may choose to pass its grant funds to another entity or sub-recipient. A sub-recipient arrangement does not relieve the original recipient of its responsibilities to carry out the terms and conditions of the grant agreement. Eligible sub-recipients (1) are public entities otherwise eligible to become direct recipients or (2) may be private non-profit operators for purposes of carrying out eligible job access and reverse commute projects.

Official guidance on the Urbanized Area Formula Program can be found on the FTA website - <a href="https://www.transit.dot.gov/regulations-and-guidance/fta-circulars/urbanized-area-formula-program-program-guidance-and-guidance

5310 ENHANCED MOBILITY OF SENIORS AND INDIVIDUALS WITH DISABILITIES

The Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities program provides grant funds to urbanized areas for public transportation and allows for investments in vehicles, capital projects, and operating assistance provided said investments are planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities.

FTA 5310 guidance requires a minimum of 55 percent of the apportionment to be allocated to capital purchases for human service agencies. OTO has decided to allocate 35 percent for capital and operations expenses and projects which go beyond the ADA, with the remaining 10 percent held for administration.

PROJECT SELECTION PROCEDURE

Two documents govern the prioritization of Section 5310 projects. One is the Program Management Plan (PMP) and the other is the Transit Coordination Plan (TCP). The Transit Coordination Plan fulfills the requirement for a coordinated public transit human service transportation plan. This Plan identifies the transportation needs of individuals with disabilities, older adults, and people with low incomes, while providing strategies for meeting these needs and prioritizing transportation services for funding and implementation.

The Program Management Plan describes the process by which projects identified in the Transit Coordination Plan are selected for 5310 funding. The PMP addresses the program goals and objectives; roles and responsibilities of the OTO, City Utilities Transit, and MoDOT; the coordination of these activities; eligible sub-recipients; local share and local funding requirements; project selection criteria and the method for distributing funds; the development and approval of the annual program of projects; and other items related to the administration of Section 5310 funding.

The most recent Transit Coordination Plan was adopted by the OTO Board of Directors in May 2022. The Program Management Plan was most recently updated in 2023. These documents do an excellent job of identifying projects and defining how they are prioritized.

To learn more, the PMP and TCP are both available on the OTO website at http://www.ozarkstransportation.org.

5339 BUS AND BUS FACILITIES

The Bus and Bus Facility (5339) program provides grant funds to urbanized areas for public transportation and allows investments in capital projects to replace, rehabilitate and purchase buses, vans, and related equipment, and to construct bus-related facilities, including technological changes or innovations to modify low or no emission vehicles or facilities. Funding is provided through formula allocations and competitive grants. OTO is supportive of local applications for the federal competitive grant program.

PROJECT SELECTION PROCEDURE

If another public entity that is legally eligible under federal transit laws desires to use Section 5339 funding, OTO must be contacted to start the process of cooperatively determining funding eligibility. This can be done at any time by calling the OTO Executive Director at (417) 865-3042, extension 102. Until another entity is determined to be eligible for this funding, an application process is not required for City Utilities to select the projects that will use this funding.

DIRECT RECIPIENT AND SUB-RECIPIENT ELIGIBILITY

Per the FTA website, "eligible recipients include designated recipients that operate fixed route bus service or that allocate funding to fixed route bus operators; and State or local governmental entities that operate fixed route bus service that are eligible to receive direct grants under 5307 and 5311." Also per the FTA website, a subrecipient is "an eligible recipient that receives a grant under the formula or discretionary programs may allocate amounts from the grant to subrecipients that are public agencies or private nonprofit organizations engaged in public transportation."

FISCAL CONSTRAINT

SECTION G

EXPLANATION OF FISCAL CONSTRAINT

OPERATIONS AND MAINTENANCE

DEMONSTRATION OF FISCAL CONSTRAINT

FINANCIAL SUMMARIES

REVENUE

STATE AND FEDERAL SOURCES

In order to determine the adequacy of funding for projects that will be undertaken within the four-year Transportation Improvement Program period, the Ozarks Transportation Organization relies upon the expertise of the Federal Highway Administration, Federal Transit Administration, Missouri Department of Transportation, and the OTO member jurisdictions.

On November 15, 2021, President Biden signed into law the Infrastructure Investment and Jobs Act (IIJA), which authorizes the federal surface transportation program for highways, highway safety, transit, freight, ports and rail through 2026. According to the MoDOT Statewide Transportation Improvement Program, it is estimated that the IIJA Act will provide 26 percent more federal funds to Missouri, annually.

MODOT

MoDOT combines Federal Highway and Transit Administrations funding estimates with state transportation revenue projections to estimate funding for transportation improvements and includes them in the Statewide Transportation Improvement Program (STIP). OTO uses these projections in determining fiscal constraint.

About 71 percent of every dollar MoDOT receives comes from fuel taxes. The federal motor fuel tax has not changed since 1993. The state motor fuel tax was increased from 22 cents to 24.5 cents per gallon on July 1, 2023. The Governor and General Assembly passed Senate Bill 262, which raises Missouri's motor fuel tax an additional 2.5 cents per year for the next five years, when it will be 29.5 cents per gallon and is estimated to generate an additional \$500 million in annual revenue. Before SB 262, the last increase was in 1996.

In the past 10 years, MoDOT has completed 4,206 projects, worth \$11.1 billion, at 5 percent under budget. MoDOT's 2025-2029 STIP is primarily maintenance focused. Currently, annual contractor awards average approximately \$2.1 billion, with nearly 57 percent aimed at meeting asset management goals.

Funding for the Missouri Department of Transportation consists of both federal and state revenue, as well as proceeds received from the sale of bonds.

Federal Fuel Tax

The largest source of transportation revenue for MoDOT is from the federal government and includes the 18.4-cents per gallon tax on gasoline and 24.4-cents per gallon tax on diesel fuel. Other sources include various taxes on tire, truck, and trailer sales, as well as heavy vehicle use. These highway user fees are deposited in the federal Highway Trust Fund and distributed to the states based on formulae prescribed by federal law through transportation funding acts. This revenue source also includes multi-modal and highway safety grants. Approximately 38 percent of Missouri's transportation revenue comes from the federal government.

State Fuel Tax

The next largest source of MoDOT's transportation revenue is from the state fuel tax. Fuel taxes represent the state share of revenue received from the State's 24.5-cent per gallon tax on gasoline and diesel fuels which must be spent on highways and bridges. These tax revenues provide approximately 25 percent of transportation revenues.

Motor Vehicle Fees

MoDOT receives a portion of the state sales and use taxes paid upon the purchase or lease of motor vehicles. This revenue source also includes the sales tax paid on aviation fuel, which is dedicated to airport projects. These taxes provide approximately 13 percent of transportation revenues. In November 2004, Missouri voters passed Constitutional Amendment 3, which set in motion a four-year phase-in redirecting motor vehicle sales taxes previously deposited in the State's general revenue fund to a newly-created State Road Bond Fund. In state fiscal year 2009, the process of redirecting motor vehicle sales taxes to transportation was fully phased in and the rate of growth in this revenue source has slowed. In July 2013, the state legislature eliminated the state motor vehicle use tax and replaced it with the state motor vehicle sales tax, which directs a greater portion to local government agencies.

Vehicle and Driver Licensing Fees

Vehicle and driver licensing fees include the state share of revenue received from licensing motor vehicles and drivers. This revenue source also includes fees for railroad regulation which are dedicated to multi-modal programs. These fees provide approximately 9 percent of transportation revenues MoDOT's transportation revenue.

Interest

The interest earned on invested funds and other miscellaneous collections provides approximately 3 percent of transportation revenues. Cash balances in all funds for roads and bridges are declining. The cash balance of all funds for roads and bridges is expected to decline from \$1,865.6 million at the beginning of fiscal year 2025 to approximately \$916.4 million by the end of fiscal year 2029. Other miscellaneous collections include construction cost reimbursements from local governments and other states, proceeds from the sale of surplus property and fees associated with the Missouri logo-signing program.

State General Revenue Fund

The State General Revenue Fund for the Governor's Transportation Cost Share Program, Governor's Focus on Bridges' debt service payments, I-70 project, legislatively designated and funded initiatives, and multimodal programs provides about 15 percent of transportation revenue.

FEDERAL-STATEWIDE

MoDOT receives federal funding that can be spent within the OTO region. A statewide funding distribution formula, which uses population numbers, distributes this funding around the state.

National Highway Performance Program

The NHPP provides support for the condition and performance of the National Highway System (NHS), for construction of new facilities on the NHS, and to ensure that investments of Federal-aid funds in highway construction are directed to support progress toward the achievement of performance targets established in a State's asset management plan for the NHS.

Statewide Surface Transportation Block Grant Program (STBG)

A long standing funding program, the Surface Transportation Block Grant Program is one of the most flexible funding sources available among Federal-aid highway funding programs. STBG promotes flexibility in state and local transportation decisions and provides flexible funding to best address state and local transportation needs. Missouri's required set-aside for pedestrian and bicycle activities has traditionally gone toward the implementation of the State ADA Transition Plan.

Highway Infrastructure Program (HIP)

The Highway Infrastructure Program may annually provide funding through the appropriations process, which is suballocated to the OTO region. Eligible projects have varied slightly from year to year, but are generally limited to construction of highways, bridges, and tunnels. For FY 2019, the elimination of hazards and the installation of protective devices at railway-highway crossing was also an eligible activity.

Highway Safety Improvement Program

The Highway Safety Improvement Program requires a data-driven, strategic approach to improving highway safety on all public roads that focuses on performance, achieving a significant reduction in traffic fatalities and serious injuries on all public roads.

Open Container Penalty Transfer

The Open Container Transfer Provision requires states to enact and enforce a law that prohibits the possession of any open alcohol beverage container, or the consumption of any alcoholic beverage, in the passenger area of any motor vehicle located on a public highway, or the right-of-way of a public highway, in the states. States, like Missouri, which fail to comply with these minimum requirements have a portion of their highway funds transferred into the State and Community Highway Safety Grant Program. This money may further be transferred into the State's Highway Safety Improvement Program.

Funding from this program has allowed Missouri to reduce cross-median fatalities on many of the interstates with the installation of median guard cable and other safety improvements. This funding source will continue to be used on safety initiatives that are focused on reducing problem crash types that are identified in Missouri's Blueprint for Safety.

Statewide Transportation Alternatives Program (STAP)

This is the statewide allocation of the STBG set-aside program for transportation alternatives. MoDOT has committed half of this funding to addressing ADA transition plan compliance.

FEDERAL - SPECIAL PROGRAMS

The IIJA established, replaced, or continued several "special programs" that are unique compared to traditional federal funding. Several COVID-19 Relief bills have also provided funding to MoDOT and Missouri MPOs.

Disadvantaged Business Enterprise Program

IIJA provides funding for Disadvantaged Business Enterprise programs. Missouri receives approximately \$300,000 annually for this program.

On the Job Training Program

IIJA provides funding for On the Job Training activities. Missouri receives approximately \$200,000 annually for this program.

Non-State System Bridge Inspection Program

Federal law mandates that bridges must be inspected on a periodic basis. Missouri uses approximately \$1 million of Surface Transportation Block Grant funds annually for non-state system bridge inspections.

State System Bridge Inspection Program

Federal law mandates that bridges must be inspected on a periodic basis. Missouri uses approximately \$2.5 million in performance of these inspections on the state system.

Preventive Maintenance Program

Missouri continues to work with the Federal Highway Administration (FHWA) to expand federal funding of preventive maintenance efforts for qualifying work. These efforts will include both contract and in-house efforts which are deemed preventive maintenance or have other specific approval by FHWA. Missouri typically spends between \$125 to \$160 million per year on preventive maintenance activities. Activities currently pursued include: striping, pavement repair or overlays, pavement surface treatments or surface seals, crack sealing, pipe culvert repair and bridge maintenance. Preventive maintenance activities recently added in 2022/2023 include bridge joint repairs/replacement, bridge structural painting, intersection marking, sign replacement and highway lighting. MoDOT is also working on future activities to include signal maintenance.

Eligible Operating Costs Program

Missouri is working with FHWA to expand federal reimbursement to eligible operating expenses of the state's transportation system. Certain components of the system require ongoing operating costs to provide continuous operation. Missouri typically spends between \$5 and \$10 million per year on operating costs related to traffic signals, highway lighting, and ITS. Operating costs include utilities, labor, administrative costs, and system maintenance costs.

Prioritization of Projects to Improve Freight Movement Program

Efficient movement of freight is critical to the economy, jobs and quality of life in Missouri. Freight movement is completely dependent on the reliability, condition, and safety of the transportation system. IIJA the National Highway Freight Program for projects that improve the efficient movement of freight. These projects implement the strategies identified in the Missouri Freight Plan. Activities include replacement of load-posted bridges, technology to improve the flow of freight, truck parking facilities, and geometric improvements to interchanges and ramps. These projects are included in the STIP and also identified in the Missouri State Freight and Rail Plan's Freight Investment Plan.

Infrastructure for Rebuilding America (INFRA) Grant Program

The INFRA program provides dedicated, discretionary federal funding for projects that address critical issues facing our nation's highways and bridges. INFRA advances a pre-existing grant program established in the FAST Act of 2015 and utilizes updated criteria to evaluate projects to align them with national and regional economic vitality goals and to leverage additional non-federal funding. Additionally, the program promotes innovative safety solutions that will improve our transportation system. Grants are awarded by the USDOT through a competitive application process.

Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Discretionary Grant Program

This program provides a unique opportunity for the DOT to invest in road, rail, transit and port projects that promise to achieve national objectives. Previously known as BUILD and TIGER Discretionary Grants, Congress has dedicated nearly \$8.9 billion for twelve rounds of National Infrastructure Investments to fund projects that have a significant local or regional impact. The eligibility requirements of RAISE allow project sponsors at the State and local levels to obtain funding for multi-modal, multi-jurisdictional projects that are more difficult to support through traditional DOT programs.

American Rescue Plan Act of 2021

The \$1.9 trillion American Rescue Plan Act of 2021 was signed into law on March 11, 2021. The bill includes \$30.5 billion for the transit industry. This bill delivers \$50,792 in Section 5310 for the Springfield Urbanized Area.

Promoting Resilient Operations for Transformative, Efficient, and Cost-Saving Transportation (PROTECT) Program The PROTECT Program provides dedicated, formula, and discretionary federal funding to invest in planning, resilience improvements, community resilience and evacuation routes, and at-risk coastal infrastructure.

Charging and Fueling Infrastructure Program

The Charging and Fueling Infrastructure Program provides dedicated, discretionary federal funds to invest in deploying electric vehicle (EV) charging and hydrogen/propane/natural gas fueling infrastructure along designated alternative fuel corridors an in communities.

National Electric Vehicle Program

The National Electric Vehicle Program provides dedicated, formula, and discretionary funds to invest in deploying electric vehicle (EV) charging infrastructure and establish an interconnected network to facilitate data collection, access, and reliability.

Reconnecting Communities Pilot Program

The Reconnecting Communities Pilot Program provides dedicated, discretionary federal funds to invest in restoring community connectivity by removing, retrofitting, or mitigating highways or other transportation facilities that create barriers to community connectivity, including mobility, access, or economic development.

Other Discretionary Program

IIJA included a variety of discretionary funding programs, which operate on varying application schedules. More can be learned about the competitive grant funding available by vilsiting the FHWA web page dedicated to this purpose - https://www.fhwa.dot.gov/bipartisan-infrastructure-law/grant_programs.cfm.

FEDERAL- REGIONAL SUBALLOCATED

The Ozarks Transportation Organization is responsible for selecting projects within three federal revenue categories. This means that OTO is responsible for project selection, programming, reasonable progress, and the maintenance of fund balances for STBG-Urban, Carbon Reduction Program, and Transportation Alternative Program funding categories.

STBG-Urban

STBG-Urban funding is a subcategory of the Surface Transportation Program consisting of funding that is directly suballocated to metropolitan planning areas with urbanized area populations over 200,000. The federal share for this funding is generally 80 percent, with some specific exceptions for certain Interstate and Safety projects. A variety of activities are eligible under this funding category provided the funding is spent on roads federally functionally classified as collector or higher, excepting bridges not on federal-aid highways and carpool, biking, pedestrian walkway improvements and other transportation alternatives also not on federal-aid highways.

Bridge Formula Program

The BFP, created in IIJA, funds the replacement, rehabilitation, preservation, protection and construction of bridges on public roads. This bill requires 15 percent of funding be spent on off-system structures with the focus being on structures that are in poor condition.

STBG-Set Aside (formerly TAP)

The STBG-Set Aside program encompasses all previously eligible projects under the former Transportation Alternatives Program. It encompasses Enhancements, Recreational Trails, and Safe Routes to School. Throughout OTO planning documents, this funding is still referred to as TAP funding.

Carbon Reduction Program

This program funds projects that reduce transportation emissions. Eligible projects include the establishment and operation of traffic monitoring, management and control facilities or programs, advanced transportation and congestion management technologies, deployment of infrastructure-based intelligent transportation systems capital improvements.

LOCAL SOURCES

Most of the transportation revenue for local agencies is received through sales taxes. Many communities have a sales tax dedicated to transportation. Local jurisdictions can choose to fund projects and maintenance from a wide array of funding sources which are also described herein.

Sales Tax

The Cities of Battlefield, Nixa, Ozark, Republic, and Springfield all have voter-approved transportation sales taxes. Battlefield, Nixa, and Republic each have a 1/2-cent transportation sales tax and Springfield's tax is 1/8-cent. In 2022, the City of Ozark extended a 3/8 of one-cent transportation sales tax. Other jurisdictions do not have a transportation sales tax in place but could elect to enact one. Springfield also has a 1/4-cent capital improvements tax, a portion of which goes toward transportation improvements. Willard recently approved a 1/2-cent capital improvements tax which may also be used on transportation projects within the City. Christian and Greene Counties both have sales taxes that can be used for transportation as well. Greene County levies a 1/2-cent sales tax, half of which is dedicated to the road and bridge fund. Christian County levies two 1/2-cent sales taxes, one of which goes to the County for County road operations and projects, and the remaining is distributed to road projects throughout the County based on need.

Development Agreements

A city or county may enter into agreements with developers to fund capital improvements with tax revenues generated by the new development. Typically, the developer builds the improvement and is reimbursed by utilizing up to 50 percent of the sales tax generated by the business activity. Projects are usually funded up to a set amount, plus interest, and paid back over three to five years.

Missouri Transportation Finance Corporation

The Missouri Transportation Finance Corporation (MTFC) is financed by federal highway funds, transit funds, and state and local matching funds. The Corporation may loan money to finance projects or provide collateral to gain favorable financing elsewhere. A local corporation is usually established to participate in the funding. The funds available under the MTFC are available throughout the State of Missouri and are applied for competitively. The funds are paid back to the Corporation following the construction of projects. These funds will rollover and subsequent projects will not have the federal requirements associated with the project. Based on the competitive nature of securing Corporation funding, this funding mechanism is not included in the Feasible Funding Sources section.

Neighborhood Improvement District (or Community Improvement District)

State law authorizes cities and counties to establish Neighborhood Improvement Districts (NIDs) and Community Improvement Districts (CIDs) for the purpose of improving public infrastructure. Once established, the jurisdiction may issue temporary notes and long-term general obligation (GO) bonds (up to 20 years) to pay for improvements. Bonds are repaid through a special assessment on the properties within the district. NIDs and CIDs require the support of a majority of the property owners within the district and City Council or County Commission approval.

The Railroad and Public Utility Tax is paid by railroads and public utilities to Greene County.

Property Tax

Greene County levies just over ten cents per \$100 assessed valuation for both real and personal property for the road and bridge fund.

TRANSIT SOURCES

Section 5307 Urbanized Area Formula Program

The Urbanized Area Formula Grants (Section 5307) program provides grants to urbanized areas for public transportation capital, planning, job access and reverse commute projects, as well as operating expenses in certain circumstances, areas which operate a maximum of 100 buses in fixed-route service during peak hours.

Section 5310 Enhanced Mobility of Seniors and Individuals with Disabilities

The Enhanced Mobility of Seniors and Individuals with Disabilities Grants (Section 5310) program is intended to enhance mobility for seniors and persons with disabilities by providing funds to serve the specials needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services.

Section 5339 Bus and Bus Facilities

The Bus and Bus Facilities Grants (Section 5339) program provides capital funding to replace, rehabilitate, and purchase buses and related equipment and to construct bus-related facilities

MO HealthNet

City Utilities Transit contracts with the Missouri Department of Social Services each fiscal year for 50 percent of the per trip cost to provide Missouri HealthNet (Medicaid) transportation trips to eligible paratransit passengers.

State Operating Funding

Each year, transit agencies around the state receive a distribution of Missouri General Revenue for operating assistance. This amount of funding has decreased substantially from the original application to the present day. This funding varies from year to year depending upon the State of Missouri budget.

Farebox

City Utilities receives funding through bus passenger farebox revenue from the sales of bus passes and the cash farebox deposits.

Advertising

City Utilities Transit receives over \$100,000 per year on their transit advertising contract. Advertisements are sold on buses, inside the fixed route buses, bus shelters with ad panels, and bus benches.

Utility Ratepayers

The City Utilities Customers for Electric, Gas, Water, and SpringNet provide the local match for public transportation in Springfield, Missouri. The net amount absorbed by the Utility customers varies from year to year based on the amount of budgeted expenditures for operations, maintenance, and capital expenditures.

Human Service Providers

FTA Section 5310 funding is competitively awarded on a regular basis to area Human Service Transportation providers. The 5310 awards are administered by MoDOT as set forth in an MOU and the Program Management Plan. The responsibility is on MoDOT to confirm financial capacity in administering these projects. As part of the

application process and in executing vehicle purchase agreements with MoDOT, awardees are required to demonstrate financial capacity for both the match and the maintenance of any vehicle purchased. Sources for this funding depends upon the agency, but projects are not awarded to those agencies who cannot provide the requisite match.

PROJECTED REVENUES

In an effort to demonstrate that the local jurisdictions and agencies are able to fund the projects programmed in the TIP, in addition to maintaining the federal aid system, revenue estimates are shown in the financial tables at the conclusion of this section. The TIP financial element is consistent with the OTO Long Range Transportation Plan.

OPERATIONS AND MAINTENANCE

ROADWAYS

MODOT

Maintenance costs include MoDOT's salaries, materials and equipment needed to deliver the roadway and bridge maintenance programs. This category includes basic maintenance activities like minor surface treatments such as: sealing, small concrete repairs and pothole patching; mowing right of way; snow removal; replacing signs; striping; repairing guardrail; and repairing traffic signals. Performing these activities requires employees; vehicles and other machinery; and materials such as salt, asphalt and fuel.

Calculations are \$464,943,844/ 77,532** lane miles of roadway.

This would make MoDOT's cost \$5,997 per lane mile.

<u>Assumptions</u> (dollars in thousands)

 Maintenance Operations*
 \$422,344,761

 Fleet Investments*

LOCAL JURISDICTIONS

There are long standing local funding sources to accomplish the goals and objectives of local, state, and federal transportation programs. Local sponsors use a myriad of local revenues to not only operate and maintain the federally eligible system, but also to match federal funds for projects on it. Revenues to fund operations and maintenance, local match on federal projects or non-federal, regionally significant local projects, come from the cities and counties sponsoring the projects. Those sources include the following:

City and County Distributions (CART Funds): These funds are a combination of Motor Fuel Tax, Vehicle Sales Tax and Vehicle Fees. These funds are distributed from MoDOT revenues to the Cities and Counties through the Department of Revenue. For most instances, these funds fully support the maintenance and operation cost for federally eligible facilities.

Other Committed Funds: Other committed funds are non-federal funds composed of remaining CART funds from previous year distributions, local transportation taxes, grant funds, general revenues and special use initiative funds. These funds are used when total program commitments exceed the available CART funds. When a local sponsor wants to program a project, they commit to providing the non-federal local match in excess of the CART funds through these sources. The MoDOT cost per lane mile for operations and maintenance has been applied to the non-state federal-aid system for each jurisdiction. A 2.3 percent inflation factor was used for all of these costs.

Local Public Agency Capacity regarding operations and maintenance is shown in the financial tables at the conclusion of this section.

TRANSIT

Transit operations and maintenance include the costs to operate the bus system and to maintain buses, shelters, and other capital equipment. Funding is currently provided by federal, state, and local sources. FTA Section 5307 funds provide partial funding for operations and maintenance. Legislation allows for the continuation of partial Section 5307 funding for the operations of transit systems for population areas exceeding 200,000. Therefore, OTO is continuing to fund the operations of the City Utilities bus system with Section 5307 funds. Inflation rates for 5307 funding are about 2 percent over the timeline of the TIP, per BIL funding levels. Inflation rates for City Utilities provided funding averages about 2.4 percent annually, however different line items may vary in their inflation rates and additional costs related to capital purchases are also considered when estimating the funding projections in the out years.

City Utilities' capacity regarding operations and maintenance is shown in the financial tables at the conclusion of this section.

FISCAL CAPACITY

PROJECT COST ESTIMATING

Revenue estimates for federal and state funding were taken directly from MoDOT. More information can be found in the 2025-2029 STIP. Revenue estimates for local funding were not inflated based on the recent lack of growth in sales tax, property tax, and motor fuel taxes.

INFLATION

Each project has inflation built in at a rate of seven percent per year. This baseline inflation rate was utilized based on recommendations from MoDOT, who incorporates this seven percent inflation rate into the STIP. According to the United States Department of Labor's Bureau of Labor Statistics, the average annual inflation rate over the past 20 years is currently 2.3 percent, but in recent years has been between 3 and 4 percent, with the last twelve months as high as 4.0 percent and currently about 3.4 percent. Current costs are reflected in cost estimates.

ADVANCE CONSTRUCTION

MoDOT uses a federal funding tool called advance construction to maximize the receipt of federal funds and provide greater flexibility/efficiency in matching federal-aid categories to individual projects. Advance Construction (AC) is an innovative finance funding technique, which allows states to initiate a project using non-federal funds, while preserving eligibility for future federal-aid. Eligibility means the Federal Highway Administration (FHWA) has determined the project qualifies for federal-aid; however, no present or future federal-aid is committed to the project. States may convert the project to regular federal-aid provided federal-aid is available for the project. AC does not provide additional federal funding, but simply changes the timing of receipts by allowing states to construct projects with state or local money and then later seek federal-aid reimbursement.

MoDOT began using AC in 1992 and will continue to use it in future years. MoDOT utilizes AC for National Highway Performance Program (NHPP) and Surface Transportation Block Program (STBG) projects or when sufficient obligation limitation is not available. State funds pay for new AC project expenditures until federal-aid is available. The oldest projects are converted first, if possible, to maximize federal-aid reimbursement.

TRANSIT 5310 PROGRAM OF PROJECTS

FTA Section 5310 funding is allocated annually, with 55 percent required to be used for traditional elderly and disabled transportation projects. MoDOT administers the traditional projects for the OTO region, though OTO is working through the process to assume administration and procurement. The following pages outline the use of this funding from FY 2022 through FY 2026 as previously and currently programmed.

	Traditional Section 5310

FIXING AMERICA'S SURFACE TRANSPORTATION ACT

TITLE 23, CHAPTER I – FEDERAL AID HIGHWAYS

§134 METROPOLITAN TRANSPORTATION PLANNING

(h) - Scope of Planning Process

- (1) In general The metropolitan planning process for a metropolitan planning area under this section shall provide for consideration of projects and strategies that will:
 - (A) support the economic vitality of the metropolitan area, especially by enabling global competitiveness, productivity, and efficiency;
 - (B) increase the safety of the transportation system for motorized and non-motorized users;
 - (C) increase the security of the transportation system for motorized and non-motorized users;
 - (D) increase the accessibility and mobility of people and for freight;
 - (E) protect and enhance the environment, promote energy conservation, improve the quality of life, and promote consistency between transportation improvements and State and local planned growth and economic development patterns;
 - (F) enhance the integration and connectivity of the transportation system, across and between modes, for people and freight;
 - (G) promote efficient system management and operation;
 - (H) emphasize the preservation of the existing transportation system;
 - (I) improve the resiliency and reliability of the transportation system and reduce or mitigate stormwater impacts of surface transportation; and
 - (J) enhance travel and tourism.

(2) Performance-based approach

- (A) In general The metropolitan transportation planning process shall provide for the establishment and use of a performance-based approach to transportation decisionmaking to support the national goals described in 150(b) of this title and the general purposes described in section 5301 of title 49.
- (B) Performance targets -
 - (i) Surface transportation performance targets
 - (I) In general Each metropolitan planning organization shall establish performance targets that address the performance measures described in section 150(c), where applicable, to use in tracking progress towards attainment of critical outcomes for the region of the metropolitan planning organization.
 - (II) Coordination Selection of performance targets by a metropolitan planning organization shall be coordinated with the relevant State to ensure consistency, to the maximum extent practicable.
 - (ii) Public transportation performance targets Selection of performance targets by a metropolitan planning organization shall be coordinated, to the maximum extent

practicable, with providers of public transportation to ensure consistency with sections 5326(c) and 5329(d) of title 49.

- (C) Timing Each metropolitan planning organization shall establish the performance targets under subparagraph (B) not later than 180 days after the date on which the relevant State or provider of public transportation establishes the performance targets.
- (D) Integration of other performance-based plans A metropolitan planning organization shall integrate in the metropolitan transportation planning process, directly or by reference, the goals, objectives, performance measures, and targets described in other State transportation plans and transportation processes, as well as any plans developed under Chapter 53 of title 49 by providers of public transportation, required as part of a performance-based program.
- (3) Failure to consider factors The failure to consider any factor specified in paragraphs (1) and (2) shall not be reviewable by any court under this title or chapter 53 of title 49, subchapter II of chapter 5 of title 5, or chapter 7 of title 5 in any matter affecting a transportation plan, a TIP, a project or strategy, or the certification of a planning process.

TIP REQUIREMENTS FOR TMAS IN ATTAINMENT

The Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) requirements for producing a Transportation Improvement Program (TIP) by the Metropolitan Planning Organization (MPO) for a metropolitan area comes from the Final Rule regarding Metropolitan Transportation Planning dated May 27, 2016. Pertinent Sections include: 23 CFR parts 450 and 500, as well as 49 CFR part 613.

§ 450.326 DEVELOPMENT AND CONTENT OF THE TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

- (a) The MPO, in cooperation with the State(s) and any affected public transportation operator(s), shall develop a TIP for the metropolitan planning area. The TIP shall reflect the investment priorities established in the current metropolitan transportation plan and shall cover a period of no less than 4 years, be updated at least every 4 years, and be approved by the MPO and the Governor. However, if the TIP covers more than 4 years, the FHWA and the FTA will consider the projects in the additional years as informational. The MPO may update the TIP more frequently, but the cycle for updating the TIP must be compatible with the STIP development and approval process. The TIP expires when the FHWA/FTA approval of the STIP expires. Copies of any updated or revised TIPs must be provided to the FHWA and the FTA. In nonattainment and maintenance areas subject to transportation conformity requirements, the FHWA and the FTA, as well as the MPO, must make a conformity determination on any updated or amended TIP, in accordance with the Clean Air Act requirements and the EPA's transportation conformity regulations (40 CFR part 93, subpart A).
- (b) The MPO shall provide all interested parties with a reasonable opportunity to comment on the proposed TIP as required by § 450.316(a). In addition, in nonattainment area TMAs, the MPO shall provide at least one formal public meeting during the TIP development process, which should be addressed through the participation plan described in § 450.316(a). In addition, the MPO shall publish or otherwise make readily available the TIP for public review, including (to the maximum extent practicable) in electronically accessible formats and means, such as the World Wide Web, as described in § 450.316(a).
- (c) The TIP shall be designed such that once implemented, it makes progress toward achieving the performance targets established under § 450.306(d).

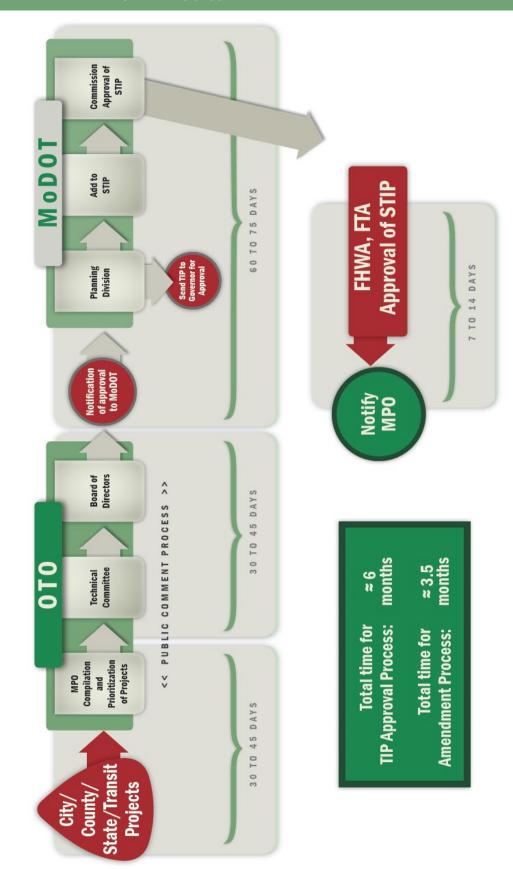

- (d) The TIP shall include, to the maximum extent practicable, a description of the anticipated effect of the TIP toward achieving the performance targets identified in the metropolitan transportation plan, linking investment priorities to those performance targets.
- (e) The TIP shall include capital and non-capital surface transportation projects (or phases of projects) within the boundaries of the metropolitan planning area proposed for funding under 23 U.S.C. and 49 U.S.C. Chapter 53 (including transportation alternatives; associated transit improvements; Tribal Transportation Program, Federal Lands Transportation Program, and Federal Lands Access Program projects; HSIP projects; trails projects; accessible pedestrian walkways; and bicycle facilities), except the following that may be included:
 - (1) Safety projects funded under 23 U.S.C. 402 and 49 U.S.C. 31102;
 - (2) Metropolitan planning projects funded under 23 U.S.C. 104(d), and 49 U.S.C. 5305(d);
 - (3) State planning and research projects funded under 23 U.S.C. 505 and 49 U.S.C. 5305(e);
 - (4) At the discretion of the State and MPO, metropolitan planning projects funded with Surface Transportation Program funds;
 - (5) Emergency relief projects (except those involving substantial functional, locational, or capacity changes);
 - (6) National planning and research projects funded under 49 U.S.C. 5314; and
 - (7) Project management oversight projects funded under 49 U.S.C. 5327.
- (f) The TIP shall contain all regionally significant projects requiring an action by the FHWA or the FTA whether or not the projects are to be funded under title 23 U.S.C. Chapters 1 and 2 or title 49 U.S.C. Chapter 53 (e.g., addition of an interchange to the Interstate System with State, local, and/or private funds and congressionally designated projects not funded under 23 U.S.C. or 49 U.S.C. Chapter 53). For public information and conformity purposes, the TIP shall include all regionally significant projects proposed to be funded with Federal funds other than those administered by the FHWA or the FTA, as well as all regionally significant projects to be funded with non-Federal funds.
- (g) The TIP shall include, for each project or phase (e.g., preliminary engineering, environment/NEPA, right-of-way, design, or construction), the following:
 - (1) Sufficient descriptive material (i.e., type of work, termini, and length) to identify the project or phase;
 - (2) Estimated total project cost, which may extend beyond the 4 years of the TIP;
 - (3) The amount of Federal funds proposed to be obligated during each program year for the project or phase (for the first year, this includes the proposed category of Federal funds and source(s) of non-Federal funds. For the second, third, and fourth years, this includes the likely category or possible categories of Federal funds and sources of non-Federal funds);
 - (4) Identification of the agencies responsible for carrying out the project or phase;
 - (5) In nonattainment and maintenance areas, identification of those projects that are identified as TCMs in the applicable SIP;
 - (6) In nonattainment and maintenance areas, included projects shall be specified in sufficient detail (design concept and scope) for air quality analysis in accordance with the EPA transportation conformity regulations (40 CFR part 93, subpart A); and
 - (7) In areas with Americans with Disabilities Act required paratransit and key station plans, identification of those projects that will implement these plans.
- (h) Projects that are not considered to be of appropriate scale for individual identification in a given program year may be grouped by function, work type, and/or geographic area using the applicable classifications under 23 CFR 771.117(c) and (d) and/or 40 CFR part 93. In nonattainment and maintenance areas, project classifications must be consistent with the "exempt project" classifications contained in the EPA transportation conformity regulations (40 CFR part 93, subpart A). In addition, projects proposed for funding under title 23 U.S.C. Chapter 2 that are not regionally significant may be grouped in one line item or identified individually in the TIP.
- (i) Each project or project phase included in the TIP shall be consistent with the approved metropolitan transportation plan.

- (j) The TIP shall include a financial plan that demonstrates how the approved TIP can be implemented, indicates resources from public and private sources that are reasonably expected to be made available to carry out the TIP, and recommends any additional financing strategies for needed projects and programs. In developing the TIP, the MPO, State(s), and public transportation operator(s) shall cooperatively develop estimates of funds that are reasonably expected to be available to support TIP implementation in accordance with § 450.314(a). Only projects for which construction or operating funds can reasonably be expected to be available may be included. In the case of new funding sources, strategies for ensuring their availability shall be identified. In developing the financial plan, the MPO shall take into account all projects and strategies funded under title 23 U.S.C., title 49 U.S.C. Chapter 53, and other Federal funds; and regionally significant projects that are not federally funded. For purposes of transportation operations and maintenance, the financial plan shall contain system-level estimates of costs and revenue sources that are reasonably expected to be available to adequately operate and maintain Federal-aid highways (as defined by 23 U.S.C. 101(a)(6)) and public transportation (as defined by title 49 U.S.C. Chapter 53). In addition, for illustrative purposes, the financial plan may include additional projects that would be included in the TIP if reasonable additional resources beyond those identified in the financial plan were to become available. Revenue and cost estimates for the TIP must use an inflation rate(s) to reflect "year of expenditure dollars," based on reasonable financial principles and information, developed cooperatively by the MPO, State(s), and public transportation operator(s).
- (k) The TIP shall include a project, or a phase of a project, only if full funding can reasonably be anticipated to be available for the project within the time period contemplated for completion of the project. In nonattainment and maintenance areas, projects included in the first 2 years of the TIP shall be limited to those for which funds are available or committed. For the TIP, financial constraint shall be demonstrated and maintained by year and shall include sufficient financial information to demonstrate which projects are to be implemented using current and/or reasonably available revenues, while federally supported facilities are being adequately operated and maintained. In the case of proposed funding sources, strategies for ensuring their availability shall be identified in the financial plan consistent with paragraph (h) of this section. In nonattainment and maintenance areas, the TIP shall give priority to eligible TCMs identified in the approved SIP in accordance with the EPA transportation conformity regulations (40 CFR part 93, subpart A) and shall provide for their timely implementation.
- (I) In cases that the FHWA and the FTA find a TIP to be fiscally constrained and a revenue source is subsequently removed or substantially reduced (i.e., by legislative or administrative actions), the FHWA and the FTA will not withdraw the original determination of fiscal constraint. However, in such cases, the FHWA and the FTA will not act on an updated or amended TIP that does not reflect the changed revenue situation.
- (m) Procedures or agreements that distribute suballocated Surface Transportation Program funds to individual jurisdictions or modes within the MPA by pre-determined percentages or formulas are inconsistent with the legislative provisions that require the MPO, in cooperation with the State and the public transportation operator, to develop a prioritized and financially constrained TIP and shall not be used unless they can be clearly shown to be based on considerations required to be addressed as part of the metropolitan transportation planning process.
- (n) As a management tool for monitoring progress in implementing the transportation plan, the TIP should:
 - (1) Identify the criteria and process for prioritizing implementation of transportation plan elements (including multimodal trade-offs) for inclusion in the TIP and any changes in priorities from previous TIPs;
 - (2) List major projects from the previous TIP that were implemented and identify any significant delays in the planned implementation of major projects; and
 - (3) In nonattainment and maintenance areas, describe the progress in implementing any required TCMs, in accordance with 40 CFR part 93.
- (o) In metropolitan nonattainment and maintenance areas, a 12-month conformity lapse grace period will be implemented when an area misses an applicable deadline, according to the Clean Air Act and the

transportation conformity regulations (40 CFR part 93, subpart A). At the end of this 12-month grace period, the existing conformity determination will lapse. During a conformity lapse, MPOs may prepare an interim TIP as a basis for advancing projects that are eligible to proceed under a conformity lapse. An interim TIP consisting of eligible projects from, or consistent with, the most recent conforming metropolitan transportation plan and TIP may proceed immediately without revisiting the requirements of this section, subject to interagency consultation defined in 40 CFR part 93. An interim TIP containing eligible projects that are not from, or consistent with, the most recent conforming transportation plan and TIP must meet all the requirements of this section.

(p) Projects in any of the first 4 years of the TIP may be advanced in place of another project in the first 4 years of the TIP, subject to the project selection requirements of § 450.332. In addition, the MPO may revise the TIP at any time under procedures agreed to by the State, MPO, and public transportation operator(s) consistent with the TIP development procedures established in this section, as well as the procedures for the MPO participation plan (see § 450.316(a)) and FHWA/FTA actions on the TIP (see § 450.330).

TIP AND AMENDMENT APPROVAL PROCESS Ozarks Transportation Organization

CHANGES TO THE TRANSPORTATION IMPROVEMENT PROGRAM

Project sponsors may find it necessary to request revisions to the adopted TIP. Pursuant to 23 CFR §450.104, changes to the TIP are categorized as Amendments or Administrative Modifications.

TIP AMENDMENTS

TIP amendments are major revisions which require official approval by the OTO Board of Directors. This is followed by submission to the Missouri Department of Transportation (MoDOT) for approval by the Governor of Missouri and subsequent approval by ONEDOT (FHWA and FTA). TIP amendments require a public comment period of 15 days prior to consideration by the OTO Board of Directors. Notice is given by press release and through the OTO website.

REVISIONS REQUIRING TIP AMENDMENTS

- 1. Addition or deletion of any project (except as noted in the Administrative Modifications section);
- 2. Substantial changes to the scope of a project (e.g. changing the number of through traffic lanes, changing the type of project such as from rehabilitation to system expansion);
- 3. Changes in the availability (adding or deleting funds by Congressional action) of earmarked (special appropriation) funds;
- 4. Moving a project into or out of the first four Federal Fiscal Years of a TIP;
- 5. Changes in a project's total programmed amount greater than 25% (or any amount greater than \$2,000,000);
- 6. Changes in a project's fund source(s) from non-Federal to Federal, unless the fund sources(s) change from Advanced Construction to an identified Federal funding source; and
- 7. Changes in the termini of a capacity improvement project of any length OR any project in which the total length changes more than 1/4 mile.

ADMINISTRATIVE MODIFICATIONS

TIP administrative modifications are minor revisions which can simply be made by OTO staff after verification that the change(s) falls into this category. Notification of administrative modifications are provided to the Technical Planning Committee, Board of Directors, MoDOT, and ONEDOT. TIP administrative modifications require no public comment period.

REVISIONS ALLOWED AS ADMINISTRATIVE MODIFICATIONS

- 1. Changes in a project's total programmed amount less than 25% (up to \$2,000,000);
- 2. Minor changes to the scope of a project;
- 3. Minor changes to the termini of a non-capacity project (one that increases or decreases the total length of the project by no more than 1/4 mile);
- 4. Adding or deleting a project development phase of a project (Environmental Assessment, PE Design, ROW, Construction, or other) without major changes to the scope of the project;
- 5. Moving funds between development phases of a project (Environmental Assessment, PE Design, ROW, Construction, or other) without major changes to the scope of the project;

- 6. Moving a project's funds to another fiscal year, provided they are not being moved into or out of the first four fiscal years of the TIP;
- 7. Minor changes to funding sources between federal funding categories or between state and local sources;
- 8. Changes in a project's fund source(s) from federal to non-federal with no changes to the project's scope (however, the disposition of the "freed-up" Federal funds remain under the authority of the OTO and are subject to TIP Revisions as appropriate);
- 9. Changes from Advance Construction to Federal funding or from Federal funding to Advance Construction;
- 10. Changing a project's lead agency when agreed upon by the two agencies affected;
- 11. Changes made to an existing project's amount of local or state non-matching funds provided no other funding, scoping or termini changes (beyond what is allowed administratively) are being made to the project;
- 12. Changes made to an existing project's programmed federal funds, to reflect the actual amount awarded by the federal agency and the corresponding required matching funds (up to 25% or \$2,000,000);
- 13. Adding a project to the TIP which is split from a "parent project" provided the cumulative total amount of Federal funding in each funding category in the parent and split projects remains intact and the overall scope of work intended to be accomplished does not change (an additional administrative modification may be made to the split project, as allowed elsewhere in this list);
- 14. Combining two or more projects already in the TIP provided the cumulative, total amount of federal funding in each funding category of the combined projects remains intact and the overall scope of work intended to be accomplished does not change; and
- 15. Technical corrections.

METROPOLITAN TRANSPORTATION PLANNING PROCESS CERTIFICATION

The Ozarks Transportation Organization, which is the Metropolitan Planning Organization for the Springfield, Missouri Urbanized Area, and the Missouri Department of Transportation hereby certify that the metropolitan transportation planning process is being carried out in accordance with all applicable requirements including:

- 1. 23 U.S.C. 134, 49 U.S.C. 5303, and 23 CFR 450 subpart C;
- 2. In nonattainment and maintenance areas, sections 174 and 176 (c) and (d) of the Clean Air Act, as amended (42 U.S.C. 7504, 7506 (c) and (d)) and 40 CFR part 93; (NOT APPLICABLE)
- 3. Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- 4. 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex, or age in employment or business opportunity;
- 5. Section 1101(b) of the FAST Act (Pub. L. 114-357) and 49 CFR part 26 regarding the involvement of disadvantaged business enterprises in DOT funded projects;
- 6. 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal Aid highway construction contracts;
- 7. The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 et seq.) and 49 CFR parts 27, 37, and 38;
- 8. The Older Americans Act, as amended (42 U.S.C. 6101), prohibiting discrimination on the basis of age in programs or activities receiving Federal financial assistance;
- 9. Section 324 of title 23 U.S.C. regarding the prohibition of discrimination based on gender; and
- 10. Section 504 of the Rehabilitation Act of 1973 (29 U.S.C. 794) and 49 CFR part 27 regarding discrimination against individuals with disabilities.

FINANCIAL CAPACITY ANALYSIS CERTIFICATION

(FTA CIRCULAR 7008.1A)

I certify that the agencies requesting Federal Transit Administration grants under Sections 5307, 5309, and 5339 have the financial capacity to undertake the programmed projects listed in the FY 2025-2028 Transportation Improvement Program (TIP). The financial capacity statements were reviewed by the Ozarks Transportation Organization. This analysis reflects the financial condition of the City Utilities Transportation Department, OATS, Inc., and Missouri State University. OTO verifies their financial capacity to undertake their programmed projects and provide for the transit needs of Springfield, Missouri.

PUBLIC INPUT

PUBLIC COMMENT

INTRODUCTION

City of Springfield

David Cameron

City of Republic

At the commencement of the development process for the annual TIP update, OTO solicits input from the community regarding needs and projects. OTO maintains a mailing list of interested parties and key transportation stakeholders. These persons and groups are specifically targeted in addition to the general public. OTO responds as appropriate to each comment received and forwards any comments, as appropriate, to the local jurisdictions or agencies which may also wish to respond. Included in this Appendix is the list of transportation stakeholders and the input OTO received.

PUBLIC INPUT RECEIVED

OTO receives input from the public throughout the year and shares this input with the Technical Planning Committee and Board of Directors at the next possible meeting after the input is received. Comments are also shared with relevant local agencies and MoDOT as received. This input is then compiled to share with the OTO member jurisdictions ahead of each TIP update. Public input OTO has received in 2023 and to-date in 2024 is linked here, with a summary of such comments:

2023 Public Comment

2024 Public Comment through March 1

2023

- Bus to Airport (Springfield, Greene) > (In response to Airport Master Plan Post) Haven't been able to get anywhere near it via transit for years. Thought 35 might get close but nope.
- Chadwick Flyer Trail (Springfield, Greene) > Hello! I know that this bid section most likely is further south than our home at 2316 S Oak Grove Avenue, 65804. My purpose with this message is to remind you to keep the lines of communication open with the home owners along the route. On our street specifically, just south of Seminole, the tracks run directly behind our homes. Letting us know the specific plans and timeframe of the project would go a long way toward support for this project. Last year I reached out to the city to ask about the specifics of the design at our area; where does the property line lay, who will maintain the green space, what is required of us as homeowners? Even though we attended the open house those issues specific to our location were not answered. I understand that some of these things may not have even been decided. My plea to you is to remember that you are literally going to be working in our back yards. The few neighbors I have spoken to support this project, but that doesn't mean we don't deserve to be informed about it's impact on our neighborhood. I welcome any discussion if it would be helpful.
- Clifton Madison (Springfield, Greene) > At the corner of Clifton & Madison, we would like a flashing stop sign to replace the stop sign on Clifton. There have been several near misses from people not seeing the stop signs on Clifton.
- Crosswalk Seminole & Brentwood (Springfield, Greene) > Sidewalks that touch on both sides but no crosswalk.
- Crosswalk Sunset & Glenstone (Springfield, Greene) > Current crosswalk is unmaintained and unsignaled
 should be a 4 way crossing
- Crosswalk Glenstone & Barataria & Mall (Springfield, Greene) > 4-way crossing here would be great, allowing safe and quick transfers to the Brentwood Center and the mall. As well as allowing transit riders to quickly and safely transfer across the street from 5, 25, and 31 to 12 and vice versa. Daylighting and traffic calming would be nice to help enforce the frequently disregarded speed limit.
- Farm Road 131 Between Weaver Rd & Elm Street (Battlefield, Greene) > We live off of FR 131 in Battlefield, MO and are in desparate need of a sidewalk along FR 131 between Elm/Plainview & Weaver. It's a narrow road with several hills & many people use this road to walk/bike daily. More importantly, elementary and intermediate schools are not providing bus service to this neighborhood and children are expected to walk/bike on this road, which is sometimes very dark in the mornings. It is also busy with traffic from cars and buses around the same time kids would be walking. It's been a concern of mine since

- I've lived in the area for about 10 years. We would greatly appreciate any assistance you could provide to help facilitate a sidewalk for this road. Feel free to contact me if needed.
- Farm Road 131 Between Weaver Rd & Elm Street (Battlefield, Greene) > This is in regards to our hopes for a sidewalk along FR 131 between Weaver Rd & Plainview Rd. We are asking for a sidewalk due to this being an extremely busy street traveled by many families in the area. This road leads to three different schools and the park. It is a dangerous road to walk or bike on and the sidewalk would improve the safety of many people. Please consider this improvement!! Thank you!!
- Farm Road 131 Between Weaver Rd & Elm Street (Battlefield, Greene) > FR 131 between Weaver Rd & Elm St needs a sidewalk for connectivity. Children walking from Walker Ridge Sub to McBride Elem and to Wilson Creek Elem must walk on the street or in the grass to reach existing sidewalks. Rezoning of buses seems like there are more children walking. City of Battlefield Sidewalk Project from 2019 plans on adding a sidewalk on Elm St which would be helpful to connect to a new sidewalk on FR 131. This would also connect this subdivision & homes to parks in the area such as McBride Elem Park & Battlefield City Park allowing for all ages & families to walk safely. There are also a lot of bikers in this area as well.
- Farm Road 131 Between Weaver Rd & Elm Street (Battlefield, Greene) > I am a resident of Battlefield. I want to express the need for a sidewalk along FR 131 between the cross roads of Weaver & Elm St. Cars fly down this road and there are children walking down this street to go to school. There is a slight hill and sometimes it is hard to see if a car is coming or if someone is in the road. I live in the Waller Ridge subdivision and there are no sidewalks that lead out of our subdivision for walking or biking. Please consider a sidewalk along FR 131.
- Farm Road 131 Between Weaver & Planview (Battlefield, Greene) > I am proposing the grant (SS4A?) go towards a sidewalk along FR 131 between FR 178/Weaver & FR182/Plainview. This is a very dangerous road for our children and families surrounding this area. It is a main road that leads to 3 different schools that our children attend. Many times I have had to jump onto the grass while walking this road to avoid getting hit by a car. I have seen mother pushing their babies in strollers so they could go up to the McBride School to walk along the path. I have seen small children having to walk in the grass almost as tall as they are along this pathway. A lot of children have to walk this pathway daily in order to get to and from school since they live so close and they don't qualify for the bus. PLEASE consider this sidewalk to help improve the safety to our community!! Thank you for your consideration.
- Fassnight Greenway (Springfield, Greene) > I see that a historic marker is on this map (attached) at Creekside at Elfindale. Please pass along my appreciation and thanks to the planners on the Fassnight Greenway Planning Team. The Indian, Power, Telegraph, Butterfiled Overland Mail Route, Military Road and Old Wire Road in its many names over the years is a place to be remembered and commemorated. That location on Elfindale Court Street close to the clubhouse would be honored and maintained by Creekside and would not fall victim to damage or graffiti. Many of our ancestors traveled down the road to Booneville afer being outfitted along the Missouri River and its tributaries. The easy part of the journey on the steamboats was over and their goods were placed into wagons for transport. Happily some decided to stay once they saw the beautiful Ozarks!
- FF Extension (Nixa, Christian) > I called on this last year. I was told it was no longer practical to development. What changed? Where will it be? Seems kinda poor planning to say one thing, do another, yet release no plans/proposals. Right?
- Glenstone Cherry Crosswalk (Springfield, Greene) > There is no crosswalk at this intersection which makes crossing Glenstone from the northbound bus stop to Rountree neighborhood risky.
- Glenstone Erie (Springfield, Greene) > This interchange is challenging for cars exiting the side road from Glenstone Marketplace. The short distance from the entrance to the side road to the left turn lane (from

Erie onto Glenstone) often causes vehicles to block the straight and right turn from Erie on/through Glenstone. Cars in the turning lane also block visibility of cars turning right onto Erie from SB Glenstone. It is a scary place to exit no matter which way you're going.

- Highway 13 Corridor (Springfield, Greene) > Facebook: Has there been any recent updates? (OTO referred them to our study update page) Thank you! I see the final report from August 2022. Do you know if the project has been approved? (OTO Funding has not been identified yet. Thank you fory our inquiry)
- Highway 13 Kansas Expressway (Springfield, Greene) > In one of your email updates you said "The interchange with Highway 13/Kansas Exp should still include the flyover installed for southbound to eastbound traffic." Do you know yet if there will be access from Kansas Exp SB to I44 EB w/out having to go through a signal light at Norton Rd?
- Highway 14 Truman (Nixa, Christian) > I live on the south side of MO14 in Nixa and an wheelchair bound. I use my wheelchair to get around Nixa for everything. At present the only marked crosswalk on MO14 is at the intersection of MO14 and 160. If I use this crosswalk I am 1/2 mile east of City Hall, bank utilities, police, etc. That is a long way in a wheelchair, especially without a sidewalk, which forces me into the street, with the traffic coming at me from the rear where I cannot even see if I may be getting into trouble. I request that a marked crosswalk be installed at the intersection of MO14 and Truman, right in from of the Nixa City Hall. Further, the sidewalk on the north side of MO14 should be extended to the west to intersect the new crosswalk at Truman.
- Highway 60 MM (Republic, Greene) > The entrance to the gas station regularly inhibits traffic flow, and even safety, at times. The entrance is blocked by waiting EB vehicles & someone wanting to turn left into the gas station in the WB lane will stop and wait for an opening and traffic backs up, often to 60. Sometimes traffic is kept from getting through the light because the WB lane backed up so far & cars can even block part of SB 60 traffic. EB MM traffic is moving, but busy, and a WB traveler wants to turn into the station & must wait for traffic to clear. This results in the same problems mentioned above. Some solutions: Paint a do not block intersection pattern & woods on the road in the EB lane at that entrance & post signs that fines or tickets can be levied for violations. Prohibit people from turning left in that gas station, or at least from stopping traffic during certain hours if they are unable to immediately turn left into it. WB traffic crossing 60 could turn left at the light & then turn right into the gas station, & there is an Eagle stop a mile further down MM hwy. People on SB 60 can turn right on the gas station entrance that's on 60.
- Highway 60 Around Republic (Republic, Greene) > Hwy 60 must be diverted around Republic's growing community. The existing Hwy60 through Republic could be a business route, while taking JRF just north of MM intersection and merge to new east/west 4 lane Hwy 60 to be reconnected to existing Hwy 60 west of Billings before 413 interchange. There is then an ability to 4 lane in future expansion Hwy 60 to Oklahoma line while saving hundreds of accidents and lives. Hwy 60 from Republic interchange west to stateline does not match that east of same exit. This should have been done a few years ago when some idiot decided that the 174 intersection would correct the traffic congestion caused by growth of community. That was a waste of money! Bandaid for skull fracture, No foresight.
- Highway 60 James River Freeway (Republic, Greene) > Expansion of Hwy 60 from JRF thru Republic west
 to or past Billings including outer road construction eliminating the numerous entrances to businesses as
 they currently exist. The addition of a pedestrian overpass or tunnel would be helpful as many children
 are pedestrians trying to cross that highway before & after school
- Highway 60 Republic to Billings (Republic, Greene) > 4 lane extension from Republic through Billings

- Highway 60 Republic to JRF (Republic, Greene) > We need to emphasize the expansion of highway 60 to three lanes between Republic and JRF.
- Highway 60 Where the city & school purchased land (Republic, Greene) > We need some serious master
 planning on Hwy 60 where the city & school district have purchased property and plan to build. We need
 two efficient entrances & exits to/from this area. During the next 15 years we could have at least three
 school buildings in this area, which will mean buses, employee traffic, and probably 200 car riders per
 school twice per day during the school year.
- Highway 60 Rose Hill Road (Republic, Greene) > A traffic light at Hwy 60 & Rose Hill Rd. Impossible to access 60 from Rose Hill during rush hours and actually anytime.
- Highway 160 I-44 (Springfield, Greene) > This intersection needs to be a diverging diamond for safety and traffic flow.
- Highway 174 Highway 60 (Republic, Greene) > An alternate road from 174 to Lowes parallel to Hwy 60
- Highway 174 Main/N Hwy (Republic, Greene) > Improvements to intersection of 174 and Main/N Hwy to better allow traffic flow around the schools. Dangerous 2 lane.
- Highway 174 Main Street (Republic, Greene) > We need help expanding the intersection of Hwy 174 and Main St in Republic. This is a very busy area and backs up frequently during the mornings, afternoon dismissal, and during 5pm travel home.
- Highway MM Highway ZZ (Republic, Greene) > MM widening and re-routing past 60 to ZZ to eliminate
 the railroad crossings currently creating traffic issues. Elimination of or improvements to allow better
 traffic flow throughout Republic around railroad crossings. There is only one overpass at 174 that allows
 traffic to avoid railroad delays.
- Highway MM Highway ZZ (Republic, Greene) > Need to prioritize MM connecting to ZZ in Republic as the new city/MoDOT graphs demonstrate.
- Highway ZZ near Republic HS (Republic, Greene) > ZZ improvements around HS to assist traffic flow with all the new subdivisions in the area and school traffic.
- J Turns (,) > We enjoy cycling in the Ozarks and we love sharing our rural roads with others in the tandem cycling community. However, J Turns are extremely dangerous for cyclists and limit cycling options. As a driver and cyclist crossing these are hazardous and place you in danger with no easy way to get to a safe haven. Lots of states we have ridden in have bike path style crossings that provide a safe way to cross busy intersections. This is a good way to cross and is cheaper than a bridge. Please consider this when planning. J turns block getting access to the rural areas.
- James River Freeway (,) > Big picture what about expanding JRF to the north near Willard and Ash Grove and then eventually connecting to Hwy 65
- Kansas Extension (Springfield, Greene) > Fully fund the Kansas Exp Extension in GC
- Light Timing (Springfield, Greene) > Another thing that causes a lot of accidents is whenever you make a left hand turn it will only let two cars through, people gets aggravated having a set through the cycle all over again. And there's also such as Fremont going north getting on the sunshine that light will only let three cars through at a time and then you have to wait for the whole cycle to be start all over again. People gets impatient they don't want to sit through two or three cycles just to get through.
- Mt. Vernon sidewalk Scenic to Kansas Exp (Springfield, Greene) > A continuous sidewalk along west Mt. Vernon from Scenic to Kansas Exp. We have a lot of foot traffic in our neighborhood, and when people are walking, pushing carts etc. It is dangerous for them to be in the street.
- Mt. Vernon W Bypass (Springfield, Greene) > Would like something done with the traffic backup on Mt.
 Vernon at W Bypass, in the morning and evening this intersection on the east side of the Bypass on Mt
 Vernon gets so far backed up, it would be nice to alleviate this congestion for the motorists.

- OATS (,) > *(In response to a previous Facebook shared post for OATS) Except they have limited their transportation in many rural areas and no longer transport in those areas due to a "lack of drivers". I live in Peculiar, MO and can no longer get my 80-year old mother to the doctor via OATS. I'm struggling to find an alternative. The OATS website also lists that Harrisonville, MO is the next to go.
- Old Route 66 Washington Ave (Strafford, Greene) > Needs pedestrian infrastructure for people to cross. Students are dashing across the road, many more would be able to walk to school, home, and to shops, taking cars off the road and reducing traffic.
- Pedestiran Beacons (RRFB) (Springfield, Greene) > They have audio that tells blind pedestrians it's active but it's still just a caution light; they don't HAVE to stop and there's nothing preventing them from turning right in front of us and cutting us off. I wish we could get rid of the caution light concept altogether and go with a solid red light like they've got near MSU on National.
- Route 66 Trail Study (Strafford, Greene) > Hi! If this were to connect Strafford to East Springfield...maybe...but, not to north Springfield. We are close enough to the homeless situation there. We don't want a super highway foot trail to Strafford.
- Roads (,) > Don't build and they won't come. Widening streets, when will it end. Invest in a Montreal train system (above ground).
- Roundabouts (,) > I know how to deal w/them from the bike but not as a pedestrian. Since traffice can't
 stop it seems like a case of look/listen behind you and run since there's no way to know how long you've
 got before the next car shows up. (Just part of her comment)
- Seminole Golden (Springfield, Greene) > Intersection could be improved.
- Seminole Sidewalks Scenic to W Bypass (Springfield, Greene) > The section of W Seminole St between S Scenic to W Bypass is in desparte need of a sidewalk along the entire stretch. It is a major connection road for many of the surrounding residential streets. Most importantly, it is the only way for many kids to walk or cycle to Sherwood Elementary and Carver Middle School.
- State Route N Farm Road 168 (Republic, Greene) > Improvement of intersection at N & FR 168. Blind hilltop coming up on the intersection as drivers on N approach 168. Very dangerous especially for those trying to travel across N.
- Sunshine St Bike Lane National / Grand (Springfield, Greene) > Can you plance bike lanes on Sunshine St between National and Grand Ave to further commuter transportation beyond the Grant Ave corridor?
- Thank you (,) > I just recently moved to the area. And you guys are leaps and bounds above all the places I've lived, in terms of actually seeming to care and trying to do the right thing for our community. I for one really appreciate it, and I bet you all don't hear it enough. But Thank You, I think I'm gonna live out my days as a proud Missouri(an).
- Trails Springfield Lake (Springfield, Greene) > Would love to be on the contact list for development of
 trails around the lake! I love Sequiota Park and Trail of Honor and look forward to the expansion of the
 Chadwick Flyer to Ozark connecting all of these together making Springfield a trail destination. I live along
 the Chadwick Branch ROW in Fremont Hills.
- Transit for Disabled (Springfield, Greene) > I live in the Mark Twain neighborhood in Springfield and I live in an apartment complex, we are all disabled and some in electric wheelchairs and I think it would benefit everyone if we had an on demand app transportation service like Uber with wheelchair vans so it would be easier to get to and from work/errands outside of access express which is a great service but something that goes until 1 or 2 am but is still public transportation.

- FF Alignment (Nixa, Christian) > Are there any updates on this?
- Farm Road 129 Sunshine to University (Springfield, Greene) > The stretch of FR 129 from the intersection with Sunshine north to the intersection with University needs to be restriped. It doesn't help that the NB thru lane on FR 129 doesn't line up even remotely close going from south to north across the intersection. Some organization (county?) tried to do some striping in spring, but they did a very poor job. Also, the timing of the green light going north on 129 thru the intersection is very short compared to other comparable intersections.
- I-44 (Springfield, Greene) > I-44 needs to be 6 lanes. I wouldn't waste money on just repaying it when it needs to widened to 6 lanes. There is so much semi-truck traffic on I-44. It's acutally scary on I-44 during rush hour or any time for that matter.
- Bike/Ped (Springfield, Greene) > I took the survey (SS4A) but forgot to add a comment about walking routes. Seems like we should identify more than one complete bike/ped connection (The Link) in our city. I think we need to identify at least two or three in each directions (N-S / E-W). Also why is it that we US citizens decide we can walk 10 miles when we go to Europe but can't walk to the coffee shop when we get home?
- Campbell / US 160 (, Greene) > The terminating left lane SB on US 160 is a terrible idea. It causes a lot of
 dangerous driving behavior, C&I driving, etc. Every time I drive through there I witness a near accident.
 The left lane is now for anyone who has enough horsepower to pass other cars, the center lane is where
 you go to get cut off, and the right lane is where you go in hopes of avoiding the pending crashes.
- Cox Road Vincent & Warren (Springfield, Greene) > Construct a raised median island on S Cox Road from W Vincent to S Warren. Not only will it create a traffic calming effect and slow down the speeding vehicles, it will prevent bad drivers from using the center turn lane as a dangerous passing lane. Now driveways are in this area so there will be no impact on the resident.
- Fremont Jackson (Ozark, Greene) > Even with improvements, this intersection is still difficult to turn left from Fremont during busy times of day. Cars coming from the West tend to drive in the lefthand lane making it difficult to pull into traffic.
- Highway N Farm Road 168 (, Greene) > The intersection of FR 168 and N Highway north of Republic is
 extremely dangerous. Can this area be considered for a roundabout or something to make it safer? Plus N
 Highway (FR81) needs widen from this intersection to Highway 174 to handle the traffic that is on it.
 Thank you for the work you do and for considering this request.
- Lyon El Camino Alto (Springfield, Greene) > This area of road is constant bottleneck. Traffic stopped at the light block vehicles trying to enter and exit Lyon Avenue.
- OATS (,) > Hello & thank you for reading my input. I ride the OATS bus and sometimes scheduling is difficult because there are so many riders in Springfield. My ride is never on time causing me to be late for my medical appointments. Some doctors will forfeit the appointment if the patient is late. Also, I think the OATS' drivers are overworked. They deal with a lot of disabled drivers who need help boarding the bus and help getting off of the bus. I think a helper riding along would save time and wear and tear on the driver. I am never asked to pay for my ride but I would be happy to do so. My daughter, who is disabled, rides with me and we are both willing to pay. These funds could be used to enhance the program. Presently, I think it is difficult for the driver to collect and account for fees. They are just too busy. A helper could take care of fees. Thank you for allowing my input.

- OATS (,) > There is a huge need for OATS transportation for individuals with disabilites. Navigating the
 city bus system can be overwhelming and unsafe for this population so having OATS available is very
 important.
- Scenic between Grand/Sunshine (Springfield, Greene) > This bridge is very narrow and highly trafficked by cars, bicycles, and pedestrians. The bridge needs to be widened and sidewalks need to be added the entire length of Scenic between Grand and Sunshine.
- "Sidewalks Public Transportation Access (OTO MPO Area,) > The two biggest things you can do to make our streets safer is
- Add sidewalks to streets that don't have them
- Expand public transportation access
- Anything else is superfluous."
- "Sunshine Street Multi Use Path (Springfield, Greene) > I saw some info about a proposed median in the Sunshine street project. I wanted to take this opportunity to throw in a plug for a adding a "multi-use protected side path" to this project. We just don't have enough protected bike lanes in Springfield. If you are not a savvy cyclist the options for getting around town are too intimidating, overwhelming, and unsafe for most people. People just won't use cycling as a means of commuting is we don't build any infrastructure. Look at Fayetteville, AR or Bentonville, AR and other towns that focus on this, and you'll find the impact has been overwhelmingly positive. We should be actively looking for ways to decrease motor vehicle traffic and increase other forms of commuting such as cycling. I enjoy riding my bicycle to and from work. Not getting in a car and riding my bike is less stressful, allows me time to decompress from a day at work, and also has the added benefit of some exercise. What I can tell you is that a lot more people would do this sort of thing if we made it safe and convenient. I encourage you to take a look at the Facebook page "Melissa & Chris Bruntlett" or their website "modacitylife.com". They are authors of "Building the Cycling City: The Dutch Blueprint for Urban Vitality" and "Curbing Traffic: The Human Case for Fewer Cars in Our Lives" This isn't something that happens overnight. It has taken the Dutch many years to make cycling a seamless part of the overall transportation system. What they have done is truly amazing. We can start by making the conscious decision to make Springfield a better place to live. It's time to start thinking outside the box.
- I am a husband, father of 3 kids, physician, avid cyclist, coach and team director of Springfield Youth Cycling Club (nationalmtb.org, missourimtb.org), and outdoor enthusiast. I love living in Springfield, and I'm hopeful that we can continue to enrich our outdoor spaces. Increasing the connection and vibrancy of our town by making it more pedestrian/cycling friendly would help make Springfield more appealing to visit and live in."
- Sunshine Street Haseltine (Springfield, Greene) > There really needs to be a streetlight to make it more
 visible at night where the north side of Haseltine/115 intersects with Sunshine. It's really tough making
 the left turn from WB Sunshine to NB 115 at night, you can't even see where the road is it's so dark.
- US 65 Bluegrass Road (, Greene) > Patron called with safety concerns over the J-turn going in at 65 & Bluegrass Road. Specific examples included buses and semi-trucks being able to use them safely.
- US 65 Buffalo to Warsaw (,) > The same road that carries Springfield and Branson with tons of improvements, turns into the final destination franchise a half hour north... There are four fatality crosses within 12 miles Buffalo to Urbana, approx. every 3 minutes. Today was a brutal head on north of Preston.. CONSTANT tractor trailers, winging 70 oncoming make for toxic chunks with nothing to stop disaster.
 DIVIDING THE ROADWAY from Buffalo to Warsaw needs to be completed and continually gets shuffled under the rug.. please help this area Thank you

- West Bypass James Rikver Freeway (Springfield, Greene) > The striping on the West Bypass overpass
 over James River Freeway is awful. They never redid it after they did the bridge maintenance/surface
 treatment. Particularly bad for the center turn lanes. It's tough to see even during the day and good
 weather. And it's been like this for over a year now. Can MODOT just restripe it?????
- Sidewalks

DRAFT PUBLIC COMMENT

To be completed after public comment period.

This report was prepared in cooperation with the USDOT, including FHWA and FTA, as well as the Missouri Department of Transportation. The opinions, findings, and conclusions expressed in this publication are those of the authors and not necessarily those of the Missouri Highways and Transportation Commission, the Federal Highway Administration or the Federal Transit Administration.
