PERFORMANCE MEASURES

NATIONAL GOALS AND PERFORMANCE MEASURES

The Moving Ahead for Progress in the 21st Century Act, or MAP-21, integrated performance measures into the planning and programming aspects of transportation investment. MAP-21 established seven National Goals as the focus of the Federal-aid highway program. The FAST (Fixing America's Surface Transportation) Act provided for continuation of these goals. Guidance has been released listing the required performance measures to achieve the national goals. The state DOTs, MPOs, and transit agencies are required to coordinate target setting for these measures. MPOs must set their targets within 180 days of the state. MPOs may choose to set their own targets or to program in support of the state and transit agency targets. OTO will make this decision on a case-by-case basis.

1. Safety

To achieve a significant reduction in traffic fatalities and serious injuries on all public roads.

Measures:

- Number of Fatalities
- Rate of Fatalities per 100 million VMT
- Number of Serious Injuries
- Rate of Serious Injuries per 100 million VMT
- Number of Non-Motorized Fatalities and Non-Motorized Serious Injuries

2. Infrastructure Condition

To maintain the highway infrastructure asset system in a state of good repair.

Measures:

- Percentage of NHS Bridges Classified as in Good Condition
- Percentage of NHS Bridges Classified as in Poor Condition
- Percentage of Pavements of the Interstate in Good Condition
- Percentage of Pavements of the Interstate in Poor Condition
- Percentage of Pavements of the non-Interstate NHS in Good Condition
- Percentage of Pavements of the non-Interstate NHS in Poor Condition

3. Transit Asset Management:

To maintain transit assets in a state of good repair.

Measures:

- Equipment (non-revenue service vehicles) State of Good Repair
- Facilities State of Good Repair
- Infrastructure State of Good Repair
- Rolling Stock State of Good Repair

4. Congestion Reduction

To achieve a significant reduction in congestion on the National Highway System.

Measures:

- Peak Hour Excessive Delay (PHED) Measure – Annual Hours of PHED per Capita (not applicable to OTO)
- Non-Single Occupancy Vehicle Travel (SOV) Measure – Percent of non-SOV Travel (not applicable to OTO)

5. System Reliability

To improve the efficiency of the surface transportation system.

Measures:

- Interstate Travel Time Reliability Measure – Percent of Person-Miles Traveled on the Interstate that are Reliable
- Non-Interstate NHS Travel Time Reliability Measure – Percent of Person-Miles Traveled on the non-Interstate NHS that are Reliable

6. Freight Movement and Economic Vitality

To improve the national freight network, strengthen the ability of rural communities to access national and international trade markets, and support regional economic development.

Measures:

- Freight Reliability Measure – Truck Travel Time Reliability (TTTR) Index

7. Environmental Sustainability

To enhance the performance of the transportation system while protecting and enhancing the natural environment.

Measures:

- Emissions Measure – Total Emissions Reduction (not applicable to OTO)

8. Reduced Project Delivery Delays

To reduce project costs, promote jobs and the economy, and expedite the movement of people and goods by accelerating project completion through eliminating delays in the project development and delivery process, including reducing regulatory burdens and improving agencies' work practices.

TRANSIT STATE OF GOOD REPAIR TARGETS

Transit is the first area where targets were set. Targets must be established within 180 days of the date targets are set by the State and transit agency.

City Utilities is partnering with the State of Missouri on their Transit Asset Management Plan. State, and thereby CU, targets for the Plan were required by January 1, 2017. MoDOT collected and evaluated transit data and used this information to set targets, which will be evaluated on an annual basis as inventory changes. These targets have been set by the State. City Utilities agrees to manage their assets in support of the state targets. At its regularly scheduled meeting on February 16, 2017, the OTO Board of Directors accepted the Transit Asset Management Targets as set forth by MoDOT and City Utilities.

Assets: Only those for which agency has direct capital responsibility	Performance Measure	Targets
Equipment Non-revenue support-service and maintenance vehicles	Percentage of vehicles met or exceeded Useful Life Benchmark	50 percent
Rolling Stock Revenue vehicles by mode	Percentage of vehicles met or exceeded Useful Life Benchmark	50 percent
Infrastructure (not applicable in state plan) Only rail fixed-guideway, track, signals and systems	Percentage of track segments w/performance restrictions by class	Not Applicable
Facilities	Percentage of assets with condition rating below 3.0 on FTA TERM Scale	25 percent with condition rating below 3.0 on FTA TERM* Scale

*TERM is a Federal Transit Administration Transit Economic Requirements Model which helps transit agencies assess their state of good repair backlog, level of annual investment to attain state of good repair, impact of variations in funding, and investment priorities.

SAFETY TARGETS

Safety is the second area where targets were set. OTO can choose to set MPO targets or can choose to plan and program in support of the MoDOT targets. After review of the information, at its meeting on December 14, 2017, the OTO Board of Directors unanimously voted to support the statewide safety targets for CY 2018, which are based on a rolling five-year average:

Performance Measure	Statewide Target for CY2018
Number of Fatalities	857.7
Fatality Rate per 100 Million VMT	1.163
Number of Serious Injuries	4,559.3
Serious Injury Rate per 100 Million VMT	6.191
Number of Non-Motorized Fatalities and Serious Injuries	431.9

Besides the programming efforts described at the end of this Section, the OTO works with many safety programs in the region, including the MoDOT Southwest District Blueprint for Safety and the hosting of the Traffic Incident Management Committee. Through the Blueprint, OTO has been able to secure cones and safety vests for emergency responders in the region. Bicycle and pedestrian safety is monitored by the OTO Bicycle and Pedestrian Advisory Committee through review of crash data and discussion among local jurisdictions on ways to improve safety.

OTO GOALS AND PERFORMANCE MEASURES

MAP-21 and the FAST Act further requires a discussion of performance target achievement in the Transportation Improvement Program. OTO has not yet set all of the performance targets based on the National Goals, since the targets are not yet due. OTO did, however, adopt regional, non-federally required goals and performance measures in its long range transportation plan, *Journey 2035*, adopted in December 2011. These same regional performance measures were carried into *Transportation Plan 2040*. As targets are set for the nationally prescribed performance measures, the Plan and TIP will continue to be amended to address them.

Integration of these regional performance measures into the OTO prioritization process for the statewide transportation improvement program can be found in Section E: Roadways.

JOURNEY 2040 GOALS

1. Support the economic vitality of the region
2. Encourage productive land use through consistency between planned growth, economic development patterns and transportation improvements
3. Increase the safety and security of the transportation system for all users
4. Increase accessibility and mobility for all transportation modes
5. Improve connections within and between all modes of transportation

PROGRAMMING FOR PERFORMANCE

The projects included in the FY 2018-FY 2021 Transportation Improvement Program address these national and regional measures, targets, and goals in a variety of ways. Programmed projects include ADA, pedestrian, and bicycle accommodations. This adds to the reduction of VMT per capita, increased modal balance, bicycle/pedestrian network completion, improved average commute and peak travel time, and maintaining acceptable air quality. The TIP includes numerous safety projects that address roadway and bicycle/pedestrian infrastructure, work-zone safety, and the safety and security of the transit system. These projects support a reduced crash rate and the improved condition of area roads and bridges. Many pavement improvements and railroad crossing improvements benefit these factors as well. Almost \$6 million is programmed for bicycle and pedestrian projects. Over \$10 million in specific Safety funding has been programmed, though most projects address safety regardless of their funding source. Several roadways and intersections in the region suffer from congestion, per the OTO Congestion Management Process. These bottlenecks are addressed through capacity and efficiency improvements. The TIP continues to support the transit system as well, including technology projects that will improve transit operations. Coordination of service, with support for service outside of the City Utilities Transit region is also addressed. Transit State of Good Repair is provided by preventative maintenance and fixed route bus replacement projects totaling \$6.37 million.

On-Time Performance of Transit System	The CU service standard is 90 percent. The system will be considered to have acceptable on-time performance at this 90 percent level	Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Housing Units within ¼-mile of a Bus Route	That the percent of housing units within the CU Transit service area and the OTO area within ¼-mile of a bus route is on the upward trend between now and 2035	Transit operations; Transit service coordination
Average Commute Time	Keep the average commute time less than 25 minutes by 2035	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination

Performance Measure	Target	FY 2018-2021 TIP Projects
Peak Travel Time	That less than 20 percent of the OTO area roadways will be severely delayed	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination
Percent of Roadways in Good Condition	That 85 percent or more of the Major Roads in the OTO region are in Good condition	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Bridge Condition	That the percent of bridges in fair or better condition will stay above 90 percent	Pavement and railroad crossing improvements; Capacity and efficiency improvements
Ozone Levels	That the region will be able to demonstrate transportation conformity for its plans, programs, and projects	ADA, pedestrian, and bicycle accommodations; Safety – infrastructure, work zone, transit; Pavement and railroad crossing improvements; Capacity and efficiency improvements; Transit technology; Transit operations; Transit service coordination

The projects included in the FY 2018-FY 2021 Transportation Improvement Program address these measures and goals in a variety of ways. Programmed projects include ADA, pedestrian, and bicycle accommodations. This adds to the reduction of VMT per capita, increased modal balance, bicycle/pedestrian network completion, improved average commute and peak travel time, and maintaining acceptable air quality. The TIP includes numerous safety projects that address roadway infrastructure, work-zone safety, and the safety and security of the transit system. These projects support a reduced crash rate and the improved condition of area roads and bridges. Many pavement improvements and railroad crossing improvements benefit these factors as well. Several roadways and intersections in the region suffer from congestion, per the OTO Congestion Management Process. These bottlenecks are addressed through capacity and efficiency improvements. The TIP continues to support the transit system as well, including technology projects that will improve transit operations. Coordination of service, with support for service outside of the City Utilities Transit region, is addressed as well.
