Howdy, I'm a resident of Spring Creek in SE Springfield (2008 E Lakewood, Springfield, MO 65804). I was very excited when I heard about the potential of the "*Springfield Harvard Sidewalk Swallow to Aladdin (EN1913-19A3)*" project in [this KY3 article](#). I'm a big proponent of this sidewalk and have asked a city planner about it in the past. I drive this route to work every day and frequently have to avoid pedestrians walking on the road (I've attached a few photos demonstrating what I'm talking about). I have four kids and the ability to walk from my neighborhood to the Farmer's Park would be *amazing*.

**On this section of Harvard  
it's especially treacherous  
to be a pedestrian due to  
the steep drop off**
