

STUDY FACT SHEET

Focus Areas

Safety Conditions

Roadway Operations

Projected Traffic

Regional Connectivity

Access Considerations

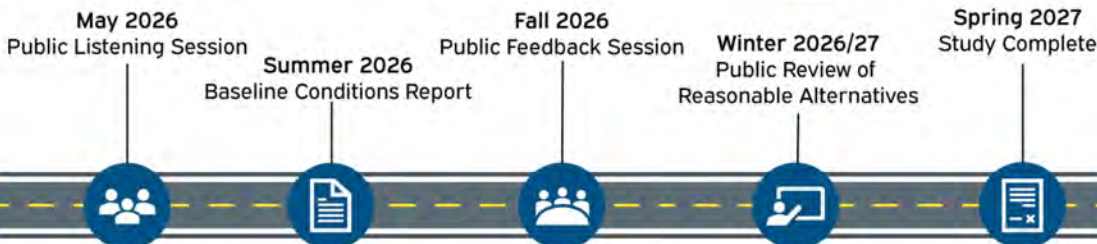

Goals

- Evaluate existing conditions for safety, capacity & operations
- Identify future access, safety, capacity & operational needs aligned with regional growth & economic development
- Develop reasonable improvement alternatives to address current & future regional transportation needs
- Facilitate a robust public input process & environmental factor review to shape proposed alternatives

⚠️ What is PEL?

A Planning & Environmental Linkages Study (PEL) is an FHWA-recognized planning process that identifies transportation needs and improvement alternatives.
